

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Acknowledgments

Lars B. Johanson was responsible for the technical supervision and coordination of this volume under the general direction of **Glenn W. King**, Chief, Statistical Compendia Branch. Assisting in the research and analytical phases of assigned sections and in the developmental aspects of new tables were **Rosemary E. Clark**, **David J. Fleck**, **Stacey M. Lowe**, and **Jean F. Maloney**. **Catherine Lavender** provided primary editorial assistance. Other editorial assistance was rendered by **Susan Antroinen**, **Deena Grover**, **Kristen Iversen**, **Patricia S. Lancaster**, **Connie Nadzadi**, **Barbara Shugart**, and **Daphanie Smallwood**.

Maps were designed and produced by **Connie Beard** and **Scott Wilcox** of the Cartographic Operations Branch within the Geography Division.

Greg Carroll, **Penny Helston**, **Gloria Davis**, **Shirley Clark**, **Jan Sweeney**, **Patricia Edwards**, and **Arlene C. Butler** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **Gary J. Lauffer**, Chief, Publications Services Branch.

The cooperation of many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private agencies that have collaborated in furnishing information for the *Statistical Abstract*. In a few instances, contributors have requested that their data be designated as subject to copyright restrictions, as indicated in the source notes to the tables affected. Permission to use copyright material should be obtained directly from the copyright owner.

Preface

The *Statistical Abstract of the United States*, published since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which comprises the Guide to Sources of Statistics, the Guide to State Statistical Abstracts, and the Guide to Foreign Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both government and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from unpublished records are identified in the source notes as unpublished data. More information on the subjects covered in the tables so noted may generally be obtained from the source.

Except as indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is primarily given to national data, many tables present data for regions and individual states and a smaller number for metropolitan areas and cities. Appendix II, Metropolitan Area Concepts and Components, presents explanatory text, a complete current listing and population data for metropolitan statistical areas (MSAs), the primary metropolitan statistical areas (PMSAs), and the consolidated metropolitan statistical areas (CMSAs) defined as of June 30, 1999. Table 30, in Section 1, presents population numbers for MSAs with population of 250,000 or more. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in many state tables and are supplemented by information in Section 29.

Additional information for states, cities, counties, metropolitan areas, and other small units, as well as more historical data are available in various supplements to the *Abstract* (see inside back cover).

Statistics in this edition are generally for the most recent year or period available by summer 2002. Each year over 1,400 tables and charts are reviewed and evaluated; new tables and charts of current interest are added, continuing series are updated, and less timely data are condensed or eliminated. Text notes and appendices are revised as appropriate.

USA Statistics in Brief, a pocket-size pamphlet highlighting many statistical series in the *Abstract* is available and will be provided along with this edition. Additional copies can be obtained free from U.S. Census Bureau, Customer Service, Call Center, Washington, DC 20233 (telephone 301-763-INFO(4636)). We attempt to update the pamphlet several times during the year. The latest data can be found on our Web site: <<http://www.census.gov/statab/www/brief.html>>.

Changes in this edition—This year we have added a new section which includes Census 2000 Sample Data. The 30 new tables in this section include data covering the educational attainment, disability status, ancestry of and language spoken at home by the resident population, as well as household income, poverty and selected housing characteristics. The layout of Appendix III has been revised. In this edition, Appendix III has been organized by the source agency and title of the survey rather than by section and table number in which the survey data appeared, as was the format in earlier editions.

In addition to the above, we have introduced 49 new tables throughout our core sections. These cover a variety of topics including unmarried households, state children's health insurance programs, limitation of activity level caused by chronic

conditions, characteristics of home-schooled students, computer use by children, firearm use offenders, home-based work and flexible schedules by workers, computer use in the workplace, employee benefits in private industry as well as computer and internet use. For a complete list of new tables see Appendix VI, p. 942.

Statistical Abstract on other media—

The *Abstract* is available on the Internet and on CD-ROM, an enhanced version (except for a few copyrighted tables deleted by the request of source organizations). Our Internet site, <<http://www.census.gov/statab/www>>, contains this 2002 edition and earlier editions of the book, as well as— Statistics in Brief.

The CD-ROM version of the *Abstract* is also available. Information for the CD-ROM is located in the inside back cover.

Statistics for counties and cities—

Extensive data for counties can be found in the *County and City Data Book: 2000*. It features 191 data items covering everything from age and agriculture to water use and wholesale trade for all states and counties with U.S. totals for comparison. Also included are 103 data items for cities with population of 25,000 or more. The primary sources are Census 2000 and the 1997 Economic Census. Two tables present 11 data items from Census 2000 for all places and MCDs with a population of 2,500 or more.

This publication, as well as selected rankings will be available on our Internet site at <<http://www.census.gov/statab/www/ccdb.html>>. Some data items that appear in the book from private sources are not available on the Internet or CD-ROM versions because we did not receive copyright permission to release the data items in these formats. For a

database with over 5,000 county items, check out USA Counties at <<http://www.census.gov/statab/www/county.html>>.

Statistics for states and metropolitan areas—Extensive data for the states and metropolitan areas of the United States can be found in the *State and Metropolitan Area Data Book: 1997-98*.

This publication minus some data items, as well as selected rankings of the states and metropolitan areas, is available on our Internet site at <<http://www.census.gov/statab/www/smadb.html>>. The CD-ROM version is also available. See the inside back cover for more information.

Limitations of the data—The contents of this volume were taken from many sources. All data from either censuses and surveys or from administrative records are subject to error arising from a number of factors: Sampling variability (for statistics based on samples), reporting errors in the data for individual units, incomplete coverage, nonresponse, imputations, and processing error. (See also Appendix III, pp. 903.) The Census Bureau cannot accept the responsibility for the accuracy or limitations of the data presented here, other than those for which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Census Bureau.

For additional information on data presented—Please consult the source publications available in local libraries or write to the agency indicated in the source notes. Write to the Census Bureau only if it is cited as the source.

Suggestions and comments—Users of the Statistical Abstract and its supplements (see inside back cover) are urged to make their data needs known for consideration in planning future editions. Suggestions and comments for improving coverage and presentation of data should be sent to the Director, U.S. Census Bureau, Washington, DC 20233.

Contents

[Numbers following subjects are page numbers]

	Page
Guide to Tabular Presentation	ix
Telephone and Internet Contacts	xi
Sec. 1. Population (Tables 1 - 65)	1
Immigration	10
Population characteristics	13
States, metro. areas, cities	22
Population profiles, foreign born	41
Marital status and households	47
Religion	55
Sec. 2. Vital Statistics (Tables 66 - 111)	57
Births	59
Life expectancy	71
Deaths	74
Sec. 3. Health and Nutrition (Tables 112 - 197)	89
Health expenditures, insurance	91
Health facilities, workforce	104
Health measures	118
Food consumption, nutrition	127
Sec. 4. Education (Tables 198 - 282)	131
Education projections	134
Educational attainment	139
Internet access	155
Degrees conferred	175
Sec. 5. Law Enforcement, Courts, and Prisons (Tables 283 - 334)	179
Crime arrests, and victimizations ..	188
Courts	197
Juveniles, child abuse	201
Prisoners and inmates	202
Sec. 6. Geography and Environment (Tables 335 - 369)	207
Land and water	210
Air quality	218
Hazardous waste sites	222
Climate	226
Sec. 7. Elections (Tables 370 - 404)	233
Vote results	235
Campaign finances	257
Sec. 8. State and Local Government Finances and Employment (Tables 405 - 448)	259
Governmental units	260
State government finances	279
Local government finances	286
Employment and payroll	296
Sec. 9. Federal Government Finances and Employment (Tables 449 - 483)	303
Budget receipts, outlays, debt	305
Federal employment and payroll	319
Sec. 10. National Defense and Veterans Affairs (Tables 484 - 509)	325
National defense outlays	326
Military manpower	329
Sec. 11. Social Insurance and Human Services (Tables 510 - 559)	337
Government transfer payments	340
Social security	345
Public aid, federal food programs ..	353
Child care, child support	355

Canadian.....	1,000	5.7	3.4	3.5	2.7	2.9	2.3	2.7	2.2
Other.....	1,000	42.8	28.4	27.2	24.0	22.4	30.5	41.8	37.3
Number of seizures by									
Border Patrol.....	Number	17,275	9,134	9,327	11,129	11,792	14,401	16,803	17,269
Value of seizures by Border Patrol.	Mill. dol.	843.6	1,622.0	2,011.8	1,256.0	1,094.6	1,405.0	2,004.0	1,945.0
Narcotics.....	Mill. dol.	797.8	1,555.7	1,965.3	1,208.8	1,046.3	1,340.0	1,919.0	1,848.0
Aliens expelled:									
Formal removals ¹	1,000	30.0	45.7	45.2	69.7	114.4	173.0	180.3	184.8
Voluntary departures ²	1,000	1,022.5	1,029.1	1,313.8	1,573.4	1,440.7	1,570.1	1,574.5	1,675.3

NA Not available. ¹ Include deportations, exclusions, and removals. ² Includes aliens under docket control required to depart and voluntary departures not under docket control.

Source: U.S. Immigration and Naturalization Service, Statistical Yearbook, annual; and unpublished data.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators show the *specified quantities* in which data items are presented. They are used for two primary reasons. Sometimes data are not available in absolute form and are estimates (as in the case of many surveys). In other cases we round the numbers in order to save space to show more data, as in the case above.

EXAMPLES OF UNIT INDICATOR INTERPRETATION FROM TABLE

Year	Item	Unit Indicator	Number shown	Multiplier
1990	Deportable aliens located	Thousands	1,169.9	1,000
1990	Value of seizures by Border Patrol	\$ Millions	843.6	1,000,000

To Determine the Figure It Is Necessary to Multiply the Number Shown by the Unit Indicator:

Deportable aliens located - $1,169.9 \times 1,000 = 1,169,900$ (over 1 million)
 Value of seizures by Border Patrol - $843.6 \times \$1,000,000 = \$843,600,000$ (over \$843 million).

When a table presents data with more than one unit indicator, they are found in the headnotes and column headings (Tables 2 and 4), spanner (Table 40), stub (Table 27), or unit column (shown above). When the data in a table are shown in the same unit indicator, it is shown in boldface as the first part of the headnote (Table 2). If no unit indicator is shown, data presented are in absolute form (Table 1).

Vertical rules are used to separate independent sections of a table, (Table 1), or in tables where the stub is continued into one or more additional columns (Table 2).

Averages—An average is a single number or value that is often used to represent the “typical value” of a group of numbers. It is regarded as a measure of “location” or “central tendency” of a group of numbers.

The **arithmetic mean** is the type of average used most frequently. It is derived by summing the individual item values of a particular group and dividing the total by the number of items. The arithmetic mean is often referred to as simply the “mean” or “average.”

The **median** of a group of numbers is the middle number or value when each item in the group is arranged according to size (lowest to highest or *visa versa*); it generally has the same number of items above it as well as below it. If there is an even number of items in the group, the median is taken to be the average of the two middle numbers.

Per capita (or per person) quantities. A per capita figure represents an average computed for every person in a specified group (or population). It is derived by taking the total for an item (such as income, taxes, or retail sales) and dividing it by the number of persons in the specified population.

Index numbers—An index number is the measure of difference or change, usually expressed as a percent, relating one quantity (the variable) of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time but may also be used to express differences between related subjects for a single point in time.

To compute a price index, a base year or period is selected. The base year price (of the commodity or service) is then designated as the base or reference price to which the prices for other years or periods are related. Many price indexes use the year 1982 as the base year; in tables this is shown as "1982=100." A method of expressing the price relationship is: The price of a set of one or more items for a related year (e.g. 1990) **divided by** the price of the same set of items for the base year (e.g. 1982). The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Average annual percent change—Unless otherwise stated in the *Abstract* (as in Section 1, Population), average annual percent change is computed by use of a *compound interest formula*. This formula assumes that the rate of change is constant throughout a specified compounding period (1 year for average annual rates of change). The formula is similar to that used to compute the balance of a savings account which receives compound interest. According to this formula, at the end of a compounding period the amount of accrued change (e.g. school enrollment or bank interest) is added to the amount which existed at the beginning of the period. As a result, over time (e.g., with each year or quarter), the same rate of change is applied to a larger and larger figure.

The *exponential formula*, which is based on continuous compounding, is often used to measure population change. It is preferred by population experts because they view population and population-related subjects as changing without interruption, ever ongoing. Both exponential and compound interest formulas assume a constant rate of change. The former, however, applies the amount of change continuously to the base rather than at the end of each compounding period. When the average annual rates are small (e.g., less than 5 percent) both formulas give virtually the same results. For an explanation of these two formulas as

they relate to population, see U.S. Census Bureau, *The Methods and Materials of Demography*, Vol. 2, 3d printing (rev.), 1975, pp. 372-381.

Current and constant dollars—Statistics in some tables in a number of sections are expressed in both current and constant dollars (see, for example, Table 643 in Section 13, Income, Expenditures, and Wealth). Current dollar figures reflect actual prices or costs prevailing during the specified year(s). Constant dollar figures are estimates representing an effort to remove the effects of price changes from statistical series reported in dollar terms. In general, constant dollar series are derived by dividing current dollar estimates by the appropriate price index for the appropriate period (for example, the Consumer Price Index). The result is a series as it would presumably exist if prices were the same throughout, as in the base year—in other words as if the dollar had constant purchasing power. Any changes in this constant dollar series would reflect only changes in real volume of output, income, expenditures, or other measure.

Explanation of Symbols

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- B Base figure too small to meet statistical standards for reliability of a derived figure.
- D Figure withheld to avoid disclosure pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
- NS Percent change irrelevant or insignificant.
- S Figure does not meet publication standards for reasons other than that covered by symbol B, above.
- X Figure not applicable because column heading and stub line make entry impossible, absurd, or meaningless.
- Z Entry would amount to less than half the unit of measurement shown.

In many tables, details will not add to the totals shown because of rounding.

Telephone and Internet Contacts

To help *Abstract* users find more data and information about statistical publications, we are issuing this list of contacts for federal agencies with major statistical programs. The intent is to give a single, first-contact point-of-entry for users of statistics. These agencies will provide general information on their statistical programs and publications, as well as specific information on how to order their publications. We are also including the Internet (World Wide Web) addresses for many of these agencies. These URLs were current in August 2002.

Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys relating to population characteristics. For a list of relevant publications, see the Guide to Sources of Statistics in Appendix I.

Decennial censuses—The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of members of the House of Representatives among the states. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Census Bureau was established as a permanent federal agency, responsible for enumerating the population and also for compiling statistics on other population and housing characteristics.

Historically, the enumeration of the population has been a complete count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, in addition to the complete count information, some data have been obtained from representative samples of the population. In the 1990 and 2000 censuses, variable sampling rates were employed. For most of the country, 1 in every 6 households (about 17 percent) received the long form or sample questionnaire; in governmental units estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data for small areas. Exact agreement is not to be expected between sample data and the 100-percent count. Sample data may be

used with confidence where large numbers are involved and assumed to indicate trends and relationships where small numbers are involved.

Census Bureau data presented here have not been adjusted for underenumeration. Results from the evaluation program for the 1990 census indicate that the overall national undercount was between 1 and 2 percent. The estimate from the Post Enumeration Survey (PES) was 1.6 percent, and the estimate from Demographic Analysis (DA) was 1.8 percent. Both the PES and DA estimates show disproportionately high undercounts for some demographic groups. For example, the PES estimates of percent net undercount for Blacks (4.4 percent), Hispanics (5.0 percent), and American Indians (4.5 percent) were higher than the estimated undercount of non-Hispanic Whites (0.7 percent). Historical DA estimates demonstrate that the overall undercount rate in the census has declined significantly over the past 50 years (from an estimated 5.4 percent in 1940 to 1.8 percent in 1990), yet the undercount of Blacks has remained disproportionately high.

Current Population Survey (CPS)—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 754 areas with coverage in every state and the District of Columbia and is subject to sampling error. At the present time, about 60,000 occupied households are eligible for interview every month; of these about 7.5 percent are, for various reasons, unavailable for interview.

While the primary purpose of the CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Bureau issues a series of publications

under the general title of *Current Population Reports*, which cover population characteristics (P20), consumer income (P60), special studies (P23), and other topics.

Estimates of population characteristics based on the CPS will not agree with the counts from the census because the CPS and the census use different procedures for collecting and processing the data for racial groups, the Hispanic population, and other topics. Caution should also be used when comparing estimates for various years because of the periodic introduction of changes into the CPS. Beginning in January 1994, a number of changes were introduced into the CPS that effect all data comparisons with prior years. These changes include the results of a major redesign of the survey questionnaire and collection methodology and the introduction of 1990 census population controls, adjusted for the estimated undercount. This change in population controls had relatively little impact on derived measures such as means, medians, and percent distribution, but did have a significant impact on levels.

Population estimates and projections—National population estimates start with decennial census data as benchmarks and add annual population component of change data. Component of change data come from various agencies, as follows: National Center for Health Statistics (births and deaths), Immigration and Naturalization Service (legal immigrants), Office of Refugee Resettlement (refugees), U.S. Census Bureau's International Programs Center (net movement between Puerto Rico and the U.S. mainland), Armed Forces, Department of Defense, and Office of Personnel Management (movement of military and civilian citizens abroad). Emigration and net undocumented immigration are projected based on research using census data. Estimates for states, counties, and smaller areas are based on the same component of change data and sources as the national estimates. School statistics from state departments of education and parochial school systems, federal income tax returns from the Internal Revenue Service, group quarters from the Federal-State Cooperative program and the Veterans

Administration, and medicare data from the Centers for Medicare and Medicaid Services are also included.

Data for the population by age for April 1, 1990 (shown in Table 12) are modified counts. The review of detailed 1990 information indicated that respondents tended to provide their age as of the date of completion of the questionnaire, not their age as of April 1, 1990. In addition, there may have been a tendency for respondents to round-up their age if they were close to having a birthday. A detailed explanation of the age modification procedure appears in 1990 Census of Population and Housing Data Paper Listing (CPH-L-74).

Population estimates and projections are published in the P25 Series of *Current Population Reports* and on the Census Bureau Internet site <<http://www.census.gov>>. These estimates and projections are generally consistent with official decennial census figures and do not reflect the amount of estimated census underenumeration. However, these estimates and projections by race have been modified and are not comparable to the census race categories (see section below under "Race"). For details on methodology, see the sources cited below the individual tables.

Immigration—The principal source of immigration data is the *Statistical Yearbook of the Immigration and Naturalization Service*, published annually by the Immigration and Naturalization Service (INS), a unit of the Department of Justice. Immigration statistics are prepared from entry visas and change of immigration status forms. Immigrants are aliens admitted for legal permanent residence in the United States. The procedures for admission depend on whether the alien is residing inside or outside the United States at the time of application for permanent residence. Eligible aliens residing outside the United States are issued immigrant visas by the U.S. Department of State. Eligible aliens residing in the United States are allowed to change their status from temporary to permanent residence at INS district offices. The category, immigrant, includes persons who may have entered the United States as nonimmigrants or

refugees, but who subsequently changed their status to that of a permanent resident. Nonresident aliens admitted to the United States for a temporary period are nonimmigrants (Table 1243). Refugees are considered nonimmigrants when initially admitted into the United States but are not included in nonimmigrant admission data. A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution.

U.S. immigration law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, or persons who qualify as refugees. Immigration to the United States can be divided into two general categories: (1) those subject to the annual worldwide limitation and (2) those exempt from it. The Immigration Act of 1990 established major revisions in the numerical limits and preference system regulating legal immigration. The numerical limits are imposed on visas issued and not on admissions. The maximum number of visas allowed to be issued under the preference categories in 2000 was 436,900 – 294,601 for family-sponsored immigrants and 142,299 for employment-based immigrants. There are nine categories among which the family-sponsored and employment-based immigrant visas are distributed, beginning in fiscal year 1992. The family-sponsored preferences are based on the alien's relationship with a U.S. citizen or legal permanent resident (see Table 6). The employment-based preferences are (1) priority workers (persons of extraordinary ability, outstanding professors and researchers, and certain multinational executives and managers); (2) professionals with advanced degrees or aliens with exceptional ability; (3) skilled workers, professionals without advanced degrees, and needed unskilled workers; (4) special immigrants; and (5) employment creation immigrants (investors). Within the overall limitations the per-country limit for independent countries is set to 7 percent of the total family-sponsored and employment-based limits, while dependent areas are limited to 2 percent of the total. The 2000 limit allowed no more than 30,583 preference

visas for any Independent country and 8,738 for any dependency. Those exempt from the worldwide limitation include immediate relatives of U.S. citizens, refugees and asylees adjusting to permanent residence, and other various classes of special immigrants (see Table 6).

The Refugee Act of 1980, effective April 1, 1980, provides for a uniform admission procedure for refugees of all countries, based on the United Nations' definition of refugees. Authorized admission ceilings are set annually by the President in consultation with Congress. After 1 year of residence in the United States, refugees are eligible for immigrant status. The Immigration Reform and Control Act of 1986 (IRCA) allows two groups of illegal aliens to become temporary and then permanent residents of the United States: aliens who have been in the United States unlawfully since January 1, 1982 (legalization applicants), and aliens who were employed in seasonal agricultural work for a minimum period of time (Special Agricultural Worker (SAW) applicants). The application period for temporary residency for legalization applicants began on May 5, 1987, and ended on May 4, 1988, while the application period for SAW applicants began on June 1, 1987, and ended on November 30, 1988. Legalization applicants became eligible for permanent residence beginning in fiscal year 1989. Beginning 1989 immigrant data include temporary residents who were granted permanent residence under the legalization program of IRCA.

Metropolitan Areas (MAs)—The general concept of a metropolitan area is one of a core area containing a large population nucleus, together with adjacent communities that have a high degree of social and economic integration with that core. Metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs) are defined by the Office of Management and Budget (OMB) as a standard for federal agencies in the preparation and publication of statistics relating to metropolitan areas. The entire territory of the United States is classified as metropolitan (inside MSAs or CMSAs—PMSAs are components of CMSAs) or non-metropolitan (outside MSAs or CMSAs).

MSAs, CMSAs, and PMSAs are defined in terms of entire counties except in New England, where the definitions are in terms of county subdivisions (primarily cities and towns). The OMB also defines New England County Metropolitan Areas (NECMAs), which are county-based alternatives to the MSAs and CMSAs in the six New England states. Over time, new MAS are created and the components of others change. The analysis of historical trends, therefore, must be made cautiously. For descriptive details and a listing of titles and components of MAS, see Appendix II.

Urban and rural—For Census 2000, the Census Bureau classified as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). A UA consists of densely settled territory that contains 50,000 or more people, while a UC consists of densely settled territory with at least 2,500 people but fewer than 50,000 people. (UCs are a new type of geographic entity for Census 2000.) Prior to Census 2000—from the 1950 census through the 1990 census—the urban population consisted of all people living in UAs and most places outside of UAs with a census population of 2,500 or more.

UAs and UCs encompass territory that generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time,
- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time, and
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

They also may include an airport located adjacent to qualifying densely settled area if it has an annual enplanement (aircraft boarding) of at least 10,000 people.

“Rural” for Census 2000 consists of all territory, population, and housing units located outside of UAs and UCs. Prior to

Census 2000, rural consisted of all territory, population, and housing outside of UAs and outside of other places designated as “urban.” For Census 2000, many more geographic entities, including metropolitan areas, counties, county subdivisions, and places, contain both urban and rural territory, population, and housing units.

Residence—In determining residence, the Census Bureau counts each person as an inhabitant of a usual place of residence (i.e., the place where one usually lives and sleeps). While this place is not necessarily a person’s legal residence or voting residence, the use of these different bases of classification would produce the same results in the vast majority of cases.

Race—For the 1990 census, the Census Bureau collected and published racial statistics as outlined in Statistical Policy Directive No. 15 issued by the U.S. Office of Management and Budget. This directive provided standards on ethnic and racial categories for statistical reporting to be used by all federal agencies. According to the directive, the basic racial categories were American Indian or Alaska Native, Asian or Pacific islander, Black, and White. (The directive identified Hispanic origin as an ethnicity.) The question on race for Census 2000 was different from the one for the 1990 census in several ways. Most significantly, respondents were given the option of selecting one or more race categories to indicate their racial identities. Because of these changes, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses. Caution must be used when interpreting changes in the racial composition of the U.S. population over time. Census 2000 adheres to the federal standards for collecting and presenting data on race and Hispanic origin as established by the Office of Management and Budget (OMB) in October 1997. Starting with Census 2000, the OMB requires federal agencies to use a minimum of five race categories: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. For respondents unable to identify with any of these five race categories, OMB approved and included a sixth category—“Some other

race”—on the Census 2000 questionnaire. The Census 2000 question on race included 15 separate response categories and three areas where respondents could write in a more specific race group. The response categories and write-in answers can be combined to create the five minimum OMB race categories plus “Some other race.” People who responded to the question on race by indicating only one race are referred to as the race *alone* population, or the group that reported only one race category. Six categories make up this population: *White alone*; *Black or African American alone*; *American Indian and Alaska Native alone*; *Asian alone*; *Native Hawaiian and Other Pacific Island alone*; and *Some other race alone*. Individuals who chose more than one of the six race categories are referred to as the *Two or more races* population, or as the group that reported *more than one race*.

The concept of race the Census Bureau uses reflects self-identification by respondents; that is the individual’s perception of his/her racial identity. The concept is not intended to reflect any biological or anthropological definition. Furthermore, the Census Bureau recognizes that the categories of the race item include both racial and national origin or sociocultural groups.

Data for the population by race for April 1, 1990 (shown in Table 10) are modified counts and are not comparable to the 1990 census race categories. These numbers were computed using 1990 census data by race which had been modified to be consistent with the guidelines in Federal Statistical Policy Directive No. 15 issued by the Office of Management and Budget. A detailed explanation of the race modification procedure appears in 1990 Census of Population and Housing Data Paper Listing (CPH-L-74).

In the CPS and other household sample surveys in which data are obtained through personal interview, respondents are asked to classify their race as: (1) *White*; (2) *Black*; (3) *American Indian, Aleut, or Eskimo*; or (4) *Asian or Pacific Islander*. The procedures for classifying

persons of mixed races who could not provide a single response to the race question are generally similar to those used in the census.

Hispanic population—The question on Hispanic origin for Census 2000 was similar to the 1990 census question, except for its placement on the questionnaire. For Census 2000, the question on Hispanic origin was asked directly before the question on race. For the 1990 census, the order was reversed—the question on race preceded questions on age and marital status, which were followed by the question on Hispanic origin. In the 1990 census, the Census Bureau collected data on the Hispanic origin population in the United States by using a self-identification question. Persons of Spanish/Hispanic origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—Mexican, Puerto Rican, Cuban, as well as those who indicated that they were of Other Spanish/Hispanic origin. Persons of Other Spanish/Hispanic origin are those whose origins are from Spain, the Spanish-speaking countries of Central or South America, or the Dominican Republic. In 1980, 1990, and 2000, the Hispanic-origin question contained prelisted categories for the largest Hispanic-origin groups—Mexican, Puerto Rican, Cuban, and Other Spanish/Hispanic. The 1990 Hispanic-origin question differed from the 1980 question in that it contained a write-in line for the Other Spanish/Hispanic category. This was coded only for sample data. Another difference between the 1980 and 1990 Hispanic-origin question is that in 1980 the wording of the Hispanic-origin question read: “Is this person of Spanish/Hispanic origin or descent?” while in 1990 the word “descent” was dropped from the question. Persons of Hispanic origin may be of any race.

In the CPS information on Hispanic persons is gathered by using a self-identification question. Persons classify themselves in one of the Hispanic categories in response to the question: “What is the origin or descent of each person in this household?” Hispanic persons in the CPS are persons who report themselves as

Mexican-American, Chicano, Mexican, Puerto Rican, Cuban, Central or South American (Spanish countries), or other Hispanic origin.

Nativity—The native population consists of all persons born in the United States, Puerto Rico, or an outlying area of the United States. It also includes persons born in a foreign country who had at least one parent who was a U.S. citizen. All other persons are classified as “foreign born.”

Mobility status—The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. Nonmovers are all persons who were living in the same house or apartment at the end of the period as at the beginning of the period. Movers are all persons who were living in a different house or apartment at the end of the period than at the beginning of the period. Movers are further classified as to whether they were living in the same or different county, state, or region or were movers from abroad. Movers from abroad include all persons, either U.S. citizens or noncitizens, whose place of residence was outside the United States at the beginning of the period; that is, in Puerto Rico, an outlying area under the jurisdiction of the United States, or a foreign country.

Living arrangements—Living arrangements refer to residency in households or in group quarters. A “household” comprises all persons who occupy a “housing unit,” that is, a house, an apartment or other group of rooms, or a single room that constitutes “separate living quarters.” A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit is also counted as a household. See text, Section 20, Construction and Housing, for definition of housing unit.

All persons not living in housing units are classified as living in group quarters. These individuals may be institutionalized, e.g., under care or custody in juvenile facilities, jails, correctional centers, hospitals, or nursing homes; or they may be residents in noninstitutional group quarters such as college dormitories, group homes, or military barracks.

Householder—The householder is the first adult household member listed on the questionnaire. The instructions call for listing first the person (or one of the persons) in whose name the home is owned or rented. If a home is owned or rented jointly by a married couple, either the husband or the wife may be listed first. Prior to 1980, the husband was always considered the household head (householder) in married-couple households.

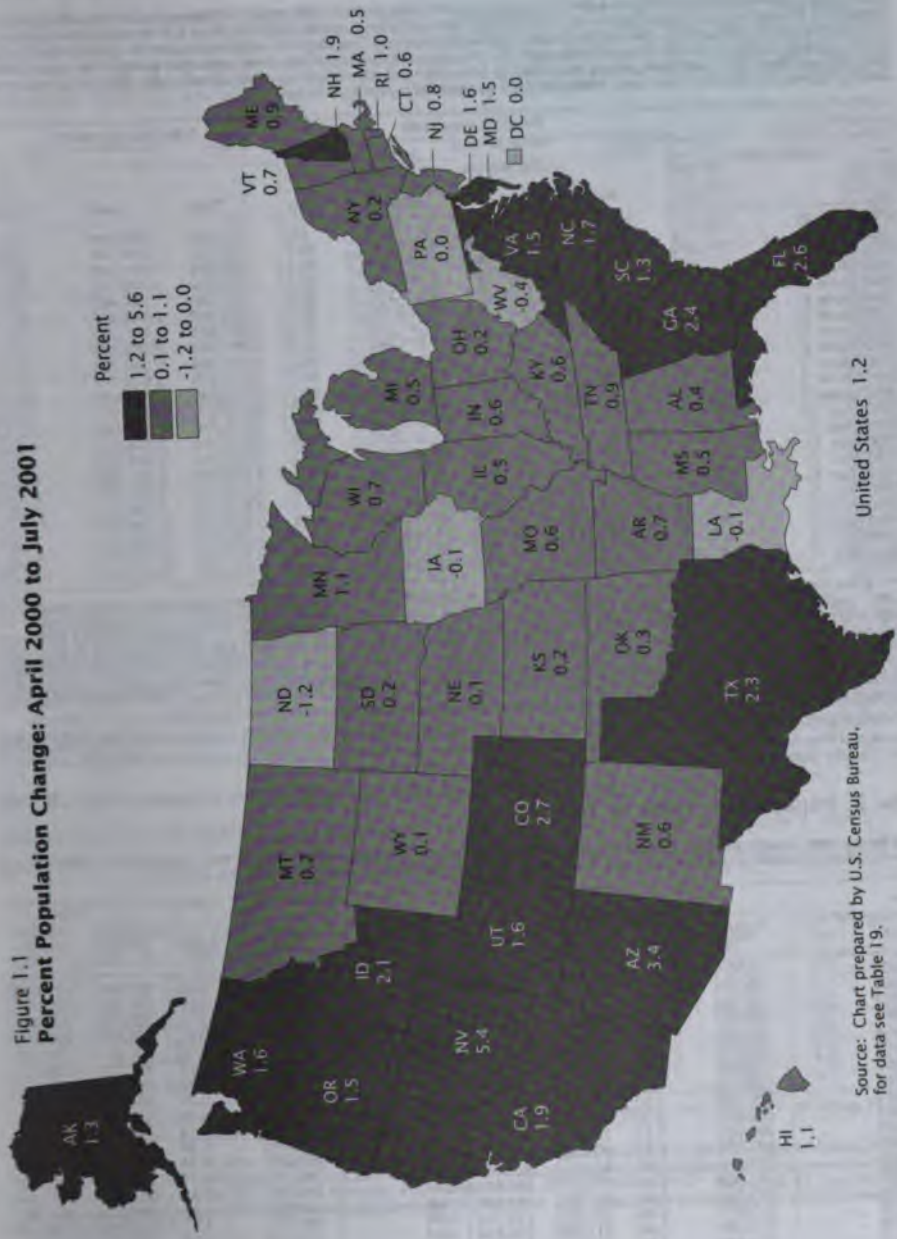

Family—The term family refers to a group of two or more persons related by birth, marriage, or adoption and residing together in a household. A family includes among its members the householder.

Subfamily—A subfamily consists of a married couple and their children, if any, or one parent with one or more never-married children under 18 years old living in a household. Subfamilies are divided into “related” and “unrelated” subfamilies. A related subfamily is related to, but does not include, the householder. Members of a related subfamily are also members of the family with whom they live. The number of related subfamilies, therefore, is not included in the count of families. An unrelated subfamily may include persons such as guests, lodgers, or resident employees and their spouses and/or children; none of whom is related to the householder.

Married couple—A married couple is defined as a husband and wife living together in the same household, with or without children and other relatives.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Figure 1.1
Percent Population Change: April 2000 to July 2001

Source: Chart prepared by U.S. Census Bureau, for data see Table 19.

No. 1. Population and Area: 1790 to 2000

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Total area figures for 1790 to 1970 have been recalculated on the basis of the remeasurement of states and counties for the 1980 census, but not on the basis of the 1990 census. The land and water area figures for past censuses have not been adjusted and are not strictly comparable with the total area data for comparable dates because the land areas were derived from different base data, and these values are known to have changed with the construction of reservoirs, draining of lakes, etc. Density figures are based on land area measurements as reported in earlier censuses]

Census date	Resident population				Area (square miles)		
	Number	Per square mile of land area	Increase over preceding census		Total	Land	Water ¹
			Number	Percent			
1790 (Aug. 2)	3,929,214	4.5	(X)	(X)	891,364	864,746	24,065

X Not applicable. ¹ Data for 1790 to 1980 cover inland water only. Data for 1990 comprises Great Lakes, inland, and coastal water. Data for 2000 comprises Great Lakes, inland, territorial and coastal water. Revised to include adjustments for underenumeration in southern states; unrevised number is 38,558,371 (13.0 per square mile). ² Figures corrected after 1870 final reports were issued. ³ Total population count has been revised since the 1980 census publications. Numbers by age, race, Hispanic origin, and sex have not been corrected. ⁴ The April 1, 1990, census count includes count question resolution corrections processed through December 1997, and does not include adjustments for census coverage errors. ⁵ Data reflect corrections made after publication of the results. ⁶ The revised April 1, 2000 census count includes count question resolution corrections processed through May 2002, and does not include adjustments for census coverage errors.

No. 3. Resident Population Projections: 2002 to 2100

[In thousands (280,306 represents 280,306,000). As of July 1. The projections are based on assumptions about future childbearing, mortality, and migration. The level of childbearing among women for the middle series is assumed to remain close to present levels, with differences by race and Hispanic origin diminishing over time. Mortality is assumed to decline gradually with less variation by race and Hispanic origin than at present. International migration is assumed to vary over time and decrease generally relative to the size of the population. Assumptions for the lowest and highest series are summarized in "Methodology and Assumptions for the Population Projections of the United States: 1999 to 2100, Working Paper #38"]

Year	Middle series ¹	Lowest series ²	Highest series ³	Zero international migration series ⁴
2002	280,306	278,801	282,087	276,709
2003	282,798	280,624	285,422	278,112
2004	285,266	282,352	288,841	279,493
2005	287,716	284,000	292,339	280,859
2006	290,153	285,581	295,911	282,219
2007	292,583	287,106	299,557	283,579
2008	295,009	288,583	303,274	284,945

2016	314,793	299,197	336,069	296,144
2017	317,325	300,379	340,589	297,539
2018	319,860	301,521	345,192	298,921
2019	322,395	302,617	349,877	300,288
2020	324,927	303,664	354,642	301,636
2025	337,815	308,229	380,397	307,923
2030	351,070	311,656	409,604	313,219
2035	364,319	313,819	441,618	317,534
2040	377,350	314,673	475,949	321,167
2045	390,398	314,484	512,904	324,449
2050	403,687	313,546	552,757	327,641
2075	480,504	303,970	809,243	349,032
2100	570,954	282,706	1,182,390	377,444

¹ Total fertility rate in 2050 = 2.219; life expectancy in 2050 = 83.9 years; and annual net immigration in 2050 = 984,000. These are middle level assumptions. For explanation of total fertility rate; see headline, Table 71. ² Total fertility rate in 2050 = 1.800; life expectancy in 2050 = 82.2 years; and annual net immigration in 2050 = 169,000. These are lowest level assumptions. ³ Total fertility rate in 2050 = 2.647; life expectancy in 2050 = 86.1 years; and annual net immigration in 2050 = 2,812,000. These are highest level assumptions. ⁴ Middle level assumptions for fertility and mortality; zero level assumption for international migration.

NA Not available. ¹ Persons of Hispanic origin may be of any race. ² The revised 1970 resident population count is 203,302,031; which incorporates changes due to errors found after tabulations were completed. The race and sex data shown here reflect the official 1970 census count. ³ The race data shown have been modified; see text of this section for explanation. ⁴ See footnote 4, Table 1. ⁵ The April 1, 1990, estimates base (248,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1990 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons. ⁶ Middle series projection; for assumptions, see Table 3.

X Not applicable. ¹ Total population count has been revised since the 1980 census publications. Numbers by age, race, Hispanic origin, and sex have not been modified from the official 1980 census counts. See text of this section for explanation. The April 1, 1990, estimates base (246,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1988 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons.

² The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (246,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1988 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons.

No. 5. Immigration: 1901 to 2000

[In thousands, except rate (8,795 represents 8,795,000). For fiscal years ending in year shown; see text, Section 8, State and Local Government Finance and Employment. For definition of immigrants, see text of this section. Data represent immigrants admitted. Rates based on Census Bureau estimates as of July 1 for resident population through 1929 and for total population thereafter (excluding Alaska and Hawaii prior to 1959)]

Period	Number	Rate ¹	Year	Number	Rate ¹
1901 to 1910	8,795	10.4	1990	1,536	6.1
1911 to 1920	5,736	5.7	1991	1,827	7.2
1921 to 1930	4,107	3.5	1992	974	3.8
1931 to 1940	528	0.4	1993	904	3.5
1941 to 1950	1,035	0.7	1994	804	3.1
1951 to 1960	2,515	1.5	1995	720	2.7
1961 to 1970	3,322	1.7	1996	916	3.4
1971 to 1980	4,493	2.1	1997	798	3.0
1981 to 1990	7,338	3.1	1998	654	2.4
1991 to 2000	9,095	3.4	1999	647	2.4
			2000	650	3.1

¹ Annual rate per 1,000 U.S. population. Rate computed by dividing sum of annual immigration totals by sum of annual U.S. population totals for same number of years.

NA Not available. ¹ Persons of Hispanic origin may be of any race. ² The revised 1970 resident population count is 203,302,031; which incorporates changes due to errors found after tabulations were completed. The race and sex data shown here reflect the official 1970 census count. ³ The race data shown have been modified; see text of this section for explanation. ⁴ See footnote 4, Table 1. ⁵ The April 1, 1990, estimates base (248,790,825) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons. ⁶ Middle series projection; for assumptions, see Table 3.

X Not applicable. ¹ Total population count has been revised since the 1980 census publications. Numbers by age, race, Hispanic origin, and sex have not been corrected. ² The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (246,790,825) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons.

- Represents zero. ¹ State estimates are constrained to sum to an independently derived estimate of the national population. The residual is the difference between a state's population before and after imposing this constraint. The residual is not a demographic component of population change; rather, it is a statistical artifact of the procedures employed to produce the estimates.

No. 30. Large Metropolitan Areas—Population: 1980 to 2000

[In thousands, except percent (825 represents 825,000). As of April 1. Covers 18 consolidated metropolitan statistical areas (CMSAs), their 73 component primary metropolitan statistical areas (PMSAs), and the remaining 128 MSAs with 250,000 and over population in 2000 as defined by the U.S. Office of Management and Budget as of June 30, 1999. For definitions and components of metropolitan areas and population of NECMAs (New England County Metropolitan Areas), see Appendix II. Minus sign (-) indicates decrease]

X Not applicable. ¹ Reflects revisions to an area's 1990 census population count that may occur as the result of (1) post-1990 census corrections of political boundaries or geographic misallocations or documented underenumerations or overenumerations and (2) geographic boundary updates made after the 1990 census, resulting from annexations, de-annexations, new incorporations, and governmental mergers. Includes revisions processed through January 1, 1998.

Metropolitan Places With 100,000 or More Inhabitants in 2000— Population, 1970 to 2000, and Land Area, 2000

Population in 1970 represents 90,000. Data for 1990 and 2000 refer to boundaries in effect on January 1, 2000; data for 1970 refer to boundaries in effect for those censuses. Minus sign (-) indicates decrease.

Metropolitan area	1970, total population (1,000)	1980, total population (1,000)	1990, total population (1,000)	Population, 2000		Per square mile	Land area, 2000 (square miles)

No. 42. Foreign-Stock Population by Nativity and Parentage: 1960 to 2000

[34.1 represents 34,100,000. Information on the birthplace of parents may be used to classify the native population by parentage: native of native parentage (both parents native), native of foreign parentage (both parents foreign born), and native of mixed parentage (one parent native and one parent foreign born). The term foreign stock includes the foreign-born population and the native population of foreign or mixed parentage. For 1960 and 1970, resident population. For 2000, civilian noninstitutional population plus Armed Forces living off post or with their families on post]

No. 49. Unmarried-Partner Households by Sex of Partners: 2000

[As of April]

Item	Number
Total households	105,480,101
Unmarried-partner households	5,475,768
Male householder and male partner	301,026
Male householder and female partner	2,615,119
Female householder and female partner	293,365
Female householder and male partner	2,266,258
All other households	100,004,333

No. 65. Christian Church Adherents, 2000, and Jewish Population, 2001—States

[Christian church adherents were defined as "all members, including full members, their children and the estimated number of other regular participants who are not considered as communicant, confirmed or full members." The Jewish population includes Jews who define themselves as Jewish by religion as well as those who define themselves as Jewish in cultural terms. Data on Jewish population are based primarily on a compilation of individual estimates made by local Jewish federations. Additionally, most large communities have completed Jewish demographic surveys from which the Jewish population can be determined]

Section 2

Vital Statistics

This section presents vital statistics data on births, deaths, abortions, fetal deaths, fertility, life expectancy, marriages, and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *National Vital Statistics Reports* (formerly *Monthly Vital Statistics Report*). Reports in this field are also issued by the various state bureaus of vital statistics. Data on fertility, on age of persons at first marriage, and on marital status and marital history are compiled by the U.S. Census Bureau from its Current Population Survey (CPS; see text, Section 1) and published in *Current Population Reports, P20 Series*. Data on abortions are published by the Alan Guttmacher Institute, New York, NY, in selected issues of *Family Planning Perspectives*.

Registration of vital events—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a state and local function. The civil laws of every state provide for a continuous and permanent birth- and death-registration system. Many states also provide for marriage- and divorce-registration systems. Vital events occurring to U.S. residents outside the United States are not included in the data.

Births and deaths—The live-birth, death, and fetal-death statistics prepared by NCHS are based on vital records filed in the registration offices of all states, of New York City, and of the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of 10 states and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with 10 reporting states and the District of Columbia. Since 1933, the birth- and death-registration areas have comprised

the entire United States, including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for states participating in the Vital Statistics Cooperative Program (VSCP) (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Beginning 1986, all reporting areas participated in the VSCP. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to and deaths of nonresident aliens of the United States and U.S. citizens outside the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization regulations according to the *International Classification of Diseases* (ICD). The ICD is revised approximately every 10 years. The tenth revision of the ICD was employed beginning in 1999. Deaths for prior years were classified according to the revision of the ICD in use at the time. Each revision of the ICD introduces a number of discontinuities in mortality statistics; for a discussion of those between the ninth and tenth revisions of the ICD, see *National Vital Statistics Reports*, Vol. 49, Nos. 2 and 8. Preliminary mortality data are based on a percentage of death records weighted up to the total

number of deaths reported for the given year; for a discussion of preliminary data, see *National Vital Statistics Reports*, Vol. 49, No. 3. Information on tests of statistical significance, differences between death rates, and standard errors can also be found in the reports mentioned above.

Some of the tables present age-adjusted death rates in addition to crude death rates. Age-adjusted death rates shown in this section were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition.

Fertility and life expectancy—The total fertility rate, defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, is compiled and published by NCHS. Other data relating to social and medical factors which affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Census Bureau. NCHS figures are based on information in birth and fetal death certificates and on the periodic National Surveys of Family Growth; Census Bureau data are based on decennial censuses and the CPS.

Data on life expectancy, the average remaining lifetime in years for persons who attain a given age, are computed and published by NCHS. For details, see *National Vital Statistics Reports*, Vol. 50, No. 6.

Marriage and divorce—The compilation of nationwide statistics on marriages and divorces in the United States began in 1887-88 when the National Office of Vital Statistics prepared estimates for the years 1867-86. Although periodic updates took place after 1888, marriage and divorce statistics were not collected and published annually until 1944 by that office. In 1957 and 1958, respectively, the same

office established marriage- and divorce-registration areas. Beginning in 1957, the marriage-registration area comprised 30 states, plus Alaska, Hawaii, Puerto Rico, and the Virgin Islands; it currently includes 42 states and the District of Columbia. The divorce-registration area, starting in 1958 with 14 states, Alaska, Hawaii, and the Virgin Islands, it currently includes a total of 31 states and the Virgin Islands. Procedures for estimating the number of marriages and divorces in the registration states are discussed in *Vital Statistics of the United States*, Vol. III—Marriage and Divorce. Total counts of events for registration and nonregistration states are gathered by collecting already summarized data on marriages and divorces reported by state offices of vital statistics and by county offices of registration.

Vital statistics rates—Except as noted, vital statistics rates computed by NCHS are based on decennial census population figures as of April 1 for 1940, 1950, 1960, 1970, 1980, and 1990; and on mid-year population figures for other years, as estimated by the Census Bureau (see text, Section 1).

Race—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. The Census Bureau's Current Population Survey obtains information on race by asking respondents to classify their race as (1) White, (2) Black, (3) American Indian, Eskimo, or Aleut, or (4) Asian or Pacific Islander.

Beginning with the 1989 data year, NCHS is tabulating its birth data primarily by race of the mother. In 1988 and prior years, births were tabulated by race of the child, which was determined from the race of the parents as entered on the birth certificate.

Trend data by race shown in this section are by race of mother beginning with the 1980 data. Hispanic origin of the mother is reported and tabulated independently of race. Thus persons of Hispanic origin maybe of any race. In 1994, 91 percent of women of Hispanic origin were reported as White.

No. 66. Live Births, Deaths, Marriages, and Divorces: 1950 to 2001

[3,632 represents 3,632,000. Prior to 1960, excludes Alaska and Hawaii. Beginning 1970, excludes births to, and deaths of non-residents of the United States. See Appendix III]

No. 71. Total Fertility Rate of Natural Increase: 1970 to 2000

[Based on race of child and registered births only, thru 1979. Beginning 1980, based on race of mother. Beginning 1970, excludes births to nonresidents of United States. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions (assuming no net immigration). The *intrinsic rate of natural increase* is the rate that would eventually prevail if a population were to experience, at each year of age, the birth rates and death rates occurring in the specified year and if those rates remained unchanged over a long period of time. Minus sign (-) indicates decrease. See also Appendix III]

Annual average and year	Total fertility rate			Annual average and year	Total fertility rate

No. 82. Characteristics of Women Who Have Had a Child in the Last Year: 1995 and 2000

[As of June. Covers civilian noninstitutional population. Since the number of women who had a birth during the 12-month period was tabulated and not the actual numbers of births, some small underestimation of fertility for this period may exist due to the omission of: (1) Multiple births, (2) Two or more live births spaced within the 12-month period (the woman is counted only once), (3) Women who had births in the period and who did not survive to the survey date, (4) Women who were in institutions and therefore not in the survey universe. These losses may be somewhat offset by the inclusion in the CPS of births to immigrants who did not have their children born in the United States and births to nonresident women. These births would not have been recorded in the vital registration system. Based on Current Population Survey (CPS); see text, Section 1, and Appendix III]

Characteristic	1995			2000		
	Number of women (1,000)	Women who have had a child in the last year		Number of women (1,000)	Women who have had a child in the last year	
		Total births per 1,000 women	First births per 1,000 women		Total births per 1,000 women	First births per 1,000 women

¹ Live births are those which occurred from July 1 of year shown through June 30 of the following year (to match time of conception with abortions). Births are classified by race of child 1972-1988, and by race of mother after 1988. ² Total numbers of abortions in 1983 and 1986 have been estimated by interpolation; 1989, 1990, 1993, and 1994 have been estimated using trends in CDC data.

No. 89. Abortions by Selected Characteristics: 1990 to 1997

[Number of abortions from surveys conducted by source; characteristics from the U.S. Centers for Disease Control's (CDC) annual abortion surveillance summaries, with adjustments for changes in states reporting data to the CDC each year. Total number of abortions in 1990 have been estimated using trends in CDC data.]

¹ Based on the proportion of the cohort who are alive at the beginning of an indicated age interval who will die before reaching the end of that interval. For example, out of every 1,000 people alive and exactly 50 years old at the beginning of the period, between 4 and 5 (4.44) will die before reaching their 51st birthdays.

No. 94. Deaths and Death Rates by Sex and Race: 1970 to 2000

(1,921 represents 1,921,000. Rates are per 1,000 population for specified groups. Excludes deaths of nonresidents of the United States and fetal deaths. For explanation of age-adjustment, see text; this section. The standard population for this table is the total population of the United States enumerated in 1940. See Appendix III.)

No. 96. Age-Adjusted Death Rates by Race and Sex: 1940 to 2000

[Age adjusted rates per 100,000 population. Populations enumerated as of April 1 for census years and estimated as of July 1 for all other years. Beginning 1970, excludes deaths of nonresidents of the United States. Data for specified races other than White and Black should be interpreted with caution because of inconsistencies reporting race on death certificates and on censuses and surveys.]

NA Not available. ¹ Data are counts of marriages performed, except as noted. ² Based on total population residing in area; population enumerated as of April 1 for 1990; estimated as of July 1 for all other years. ³ Includes annulments. ⁴ U.S. totals for the number of divorces is an estimate which includes states not reporting (CA, CO, IN, and LA). ⁵ Marriage data include nonlicensed marriages registered.

Source: U.S. National Center for Health Statistics, *Vital Statistics of the United States*, annual; *National Vital Statistics Reports (NVSR)* (formerly *Monthly Vital Statistical Report*).

Section 3

Health and Nutrition

This section presents statistics on health expenditures and insurance coverage, including medicare and medicaid, medical personnel, hospitals, nursing homes and other care facilities, injuries, diseases, disability status, nutritional intake of the population, and food consumption. Summary statistics showing recent trends on health care and discussions of selected health issues are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health, United States*. Data on national health expenditures, medical costs, and insurance coverage are compiled by the U.S. Centers for Medicare & Medicaid Services (CMS) (formerly Health Care Financing Administration), and appear in the quarterly *Health Care Financing Review* and in the annual *Medicare and Medicaid Statistical Supplement* to the *Health Care Financing Review*. Statistics on health insurance are also collected by NCHS and are published in Series 10 of *Vital and Health Statistics*. U.S. Census Bureau also publishes data on utilization of insurance coverage. Statistics on hospitals are published annually by the Health Forum, L.L.C., an American Hospital Association Company, in *Hospital Statistics*. Primary sources for data on nutrition are the quarterly *National Food Review* and the annual *Food Consumption, Prices, and Expenditures*, both issued by the U.S. Department of Agriculture. NCHS also conducts periodic surveys of nutrient levels in the population, including estimates of food and nutrient intake, overweight and obesity, hypercholesterolemia, hypertension, and clinical signs of malnutrition.

National health expenditures—CMS compiles estimates of national health expenditures (NHE) to measure spending for health care in the United States. The NHE accounts are structured to show spending by type of expenditure (i.e., hospital care, physician and clinical care, dental care, and other professional care; home health care; retail sales of prescription drugs; other medical nondurables;

vision products and other medical durables; nursing home care and other personal health expenditures; plus non-personal health expenditures for such items as public health, research, construction of medical facilities, administration, and the net cost of private health insurance) and by source of funding (e.g., private health insurance, out-of-pocket payments, and a range of public programs including medicare, medicaid, and those operated by the Department of Veterans Affairs (VA)).

Data used to estimate health expenditures come from existing sources which are tabulated for other purposes. The type of expenditure estimates rely upon statistics produced by such groups as the American Hospital Association, the Census Bureau, and the Department of Health and Human Services (HHS). Source of funding estimates are constructed using administrative and statistical records from the medicare and medicaid programs, the Department of Defense and VA medical programs, the Social Security Administration, Census Bureau's *Governmental Finances*, state and local governments, other HHS agencies, and other nongovernment sources. More information and detailed descriptions of sources and methods are available on the HCFA home page at <<http://cms.hhs.gov/statistics/nhe/default.asp>>.

Medicare and medicaid—Since July 1966, the federal medicare program has provided two coordinated plans for nearly all people age 65 and over: (1) A hospital insurance plan which covers hospital and related services and (2) a voluntary supplementary medical insurance plan, financed partially by monthly premiums paid by participants, which partly covers physicians' and related medical services. Such insurance also applies, since July 1973, to disabled beneficiaries of any age after 24 months of entitlement to cash

benefits under the social security or railroad retirement programs and to persons with end stage renal disease.

Medicaid is a health insurance program for certain low-income people. These include: certain low-income families with children; aged, blind, or disabled people on Supplemental Security Income; certain low-income pregnant women and children; and people who have very high medical bills. Medicaid is funded and administered through a state-federal partnership. Although there are broad federal requirements for medicaid, states have a wide degree of flexibility to design their program. States have authority to establish eligibility standards, determine what benefits and services to cover, and set payment rates. All states, however, must cover these basic services: inpatient and outpatient hospital services, laboratory and X-ray services, skilled nursing and home health services, doctor's services, family planning, and periodic health checkups, diagnosis and treatment for children.

Health resources—Hospital statistics based on data from the American Hospital Association's yearly survey are published annually in *Hospital Statistics* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all U.S. hospitals which meet certain criteria for inclusion. The criteria are published in *Vital and Health Statistics* reports, Series 13. NCHS defines a hospital as a nonfederal short-term general or special facility with six or more inpatient beds with an average stay of less than 60 days.

Statistics on the demographic characteristics of persons employed in the health occupations are compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly) (see Table 588, Section 12, Labor Force, Employment, and Earnings). Data based

on surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, and hospital care are presented in NCHS Series 13 *Data on Health Resources Utilization and Advance Data from Vital and Health Statistics*. Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS Series 10, *National Health Interview Survey Data*.

The CMS's *Health Care Financing Review* and its annual *Medicare and Medicaid Statistical Supplement* present data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the medicare program and differ from those of other sources because they are limited to facilities meeting federal eligibility standards for participation in medicare.

Disability and illness—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological testing are collected by NCHS in its National Health Interview Survey and its National Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, Series 10 and 11, respectively. The Department of Labor compiles statistics on occupational injuries (see Section 12, Labor Force, Employment, and Wealth). Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Centers for Disease Control and Prevention in Atlanta, Georgia, and are published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases is revised annually and includes those which, by mutual agreement of the states and PHS, are communicable diseases of national importance.

Nutrition—Statistics on annual per capita consumption of food and its nutrient value are estimated by the U.S. Department of Agriculture and published quarterly in *National Food Review*. Historical data can be found in *Food Consumption, Prices, and Expenditures*, and online at <<http://www.ers.gov/data/consumption>>. Statistics on food insufficiency and food and nutrient intake are collected by NCHS to estimate the diet

of the nation's population. NCHS also collects physical examination data to assess the population's nutritional status, including growth, overweight/obesity, nutritional deficiencies, and prevalence of nutrition-related conditions, such as hypertension, hypercholesterolemia, and diabetes.

Statistical reliability—For discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and CMS, see Appendix III.

No. 112. National Health Expenditures—Summary, 1960 to 2000, and Projections, 2001 to 2011

[In billions of dollars (27 represents \$27,000,000,000). Includes Puerto Rico and outlying areas]

No. 121. Personal Health Care Expenditures by State, 1990 to 1998, and by Selected Object, 1998

[In millions of dollars (612,246 represents \$612,246,000,000). This series of state health expenditures (SHE) uses the same definitions and, to the extent possible, the same data sources as does the national health expenditures series. For health services, this structure clusters spending according to the establishment providing those services. For retail purchases of medical products, it groups spending according to product classification. Thus, SHE is establishment-based, grouping services together according to place of service or of product sale rather than according to type of service. Establishment-based expenditures are those in which spending is located in the state of the provider rather than in the beneficiary's state of residence. Because people are able to cross state borders to receive health care services, health care spending by provider location is not necessarily an accurate reflection of spending on behalf of persons residing in that state.]

No. 127. Medicare Trust Funds: 1980 to 2001

[In billions of dollars (23.9 represents \$23,900,000,000)]

Type of trust fund	1990	1990	1985	1995	1997	1995	1999	2000	2001
HOSPITAL INSURANCE (HI)									
Net contribution income ¹	23.9	72.2	103.3	115.9	119.5	130.7	140.3	154.5	160.9
Interest received ²	1.1	8.5	10.8	10.2	9.8	9.3	10.1	11.7	14.0
Benefit payments ³	25.1	66.2	116.4	128.6	137.8	134.0	128.8	128.5	141.2
Assets, end of year	13.7	98.9	130.3	124.9	115.6	120.4	141.4	177.5	208.7
SUPPLEMENTARY MEDICAL INSURANCE (SMI)									
Net premium income	3.0	11.3	19.7	18.8	19.3	20.9	19.0	20.6	22.8
Transfers from general revenue	7.5	33.0	39.0	65.0	60.2	64.1	59.1	65.9	72.8
Interest received ²	0.4	1.6	1.6	1.8	2.5	2.7	2.8	3.5	3.1
Benefit payments ³	10.6	42.5	65.0	68.6	72.8	76.1	80.7	88.9	99.7
Assets, end of year	4.5	15.5	13.1	28.3	36.1	46.2	44.8	44.0	41.3

¹ Includes income from taxation of benefits beginning in 1995. Includes premiums from aged ineligible enrolled in HI. ² Includes recoveries of amounts reimbursed from the trust fund. ³ Beginning 1998 monies transferred to the SMI trust fund for home health agency costs, as provided for by P.L. 105-33, are included in HI benefit payments but excluded from SMI benefit payments. ⁴ Premiums withheld from check and associated general revenue contributions that were to occur on Jan. 3, 1999, actually occurred on December 31, 1998. These amounts are therefore excluded from 1999 data.

NA Not available. ¹ Persons who had payments made on their behalf at any time during the fiscal year. ² Payments for fiscal year and reflect federal and state contribution payments. Data exclude disproportionate hospital share payments. Disproportionate share hospitals receive higher Medicaid reimbursement than other hospitals because they treat a disproportionate share of Medicaid patients.

No. 134. State Children's Health Insurance Program-Enrollment by State: 1999 to 2001

[In thousands (1,959 represents 1,959,000). For year ending September 30. Represents the number of children ever enrolled during the year. This program provides health benefits coverage to children living in families whose incomes exceed the eligibility limits for medicaid. Although it is generally targeted to families with incomes at or below 200 percent of the federal poverty level, each state may set its own income eligibility limits, within certain guidelines. States have three options: they may expand their medicaid programs, develop a separate child health program that functions independently of medicaid, or do a combination of both]

No. 135. Health Maintenance Organizations (HMOs): 1980 to 2001

[As of January 1, except 1980 as of June 30 (9.1 represents 9,100,000). An HMO is a prepaid health plan delivering comprehensive care to members through designated providers, having a fixed periodic payment for health care services, and requiring members to be in a plan for a specified period of time (usually 1 year). A group HMO delivers health services through a physician group that is controlled by the HMO unit or contracts with one or more independent group practices to provide health services. An individual practice association (IPA) HMO contracts directly with physicians in independent practice, and/or contracts with one or more associations of physicians in independent practice, and/or contracts with one or more multispecialty group practices. Data are based on a census of HMOs]

Model type	Number of plans						Enrollment ¹ (mil.)

¹ Includes other government insurance, not shown separately. Persons with coverage counted only once in total, even though they may have been covered by more than one type of policy. ² Related to employment of self or other family members. ³ Beginning 1997 persons with no coverage other than access to Indian Health Service are no longer considered covered by health insurance; instead they are considered to be uninsured. The effect of this change on the overall estimates of health insurance coverage is negligible; however, the decrease in the number of people covered by medicaid may be partially due to this change. ⁴ Data based on 1990 census adjusted population controls. ⁵ Estimates reflect results of follow-up verification questions. ⁶ Includes other races not shown separately. ⁷ Persons of Hispanic origin may be of any race.

No. 138. Persons With and Without Health Insurance Coverage by State: 2000

¹ The average is presented for all covered workers and excludes workers without the plan provision. Averages are for plans stating a flat monthly cost. ² Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. ³ Union workers are those whose wages are determined through collective bargaining. ⁴ See map, inside front cover.

Black or African American only	18.4	17.3	46.1	46.7	22.1	23.4	13.5	12.6
American Indian or Alaska Native only	20.7	21.2	35.6	42.9	25.6	20.0	18.1	15.8
Asian only	23.1	20.2	47.3	49.2	19.4	20.9	10.2	9.7
Two or more races	15.2	12.1	40.8	41.6	22.2	28.3	21.8	17.9
Race and Hispanic origin:¹								
White, non-Hispanic	15.5	14.5	45.9	45.4	24.5	26.0	14.1	14.1
Black, non-Hispanic	18.3	17.2	46.1	46.9	22.1	23.4	13.5	12.6
Hispanic	26.2	26.5	44.3	41.8	19.2	20.0	10.3	11.7

¹ Estimates are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. ² Estimates by race and Hispanic origin are tabulated using the 1997 Standards for Federal data on race and ethnicity. Estimates for specific race groups are shown when they meet requirements for statistical reliability and confidentiality. The categories "White only," "Black or African American only," "American Indian and Alaska Native (AI/AN) only," and "Asian only" include persons who reported only one racial group; and the category "two or more races" includes persons who reported more than one of the five racial groups in the 1997 Standards or one of the five racial groups and "Some other race."

No. 154. Hospitals—Summary Characteristics: 1980 to 2000

[For beds, 1,365 represents 1,365,000. Covers hospitals accepted for registration by the American Hospital Association; see this section. Short-term hospitals have an average patient stay of less than 30 days; long-term, an average stay of longer than 30 days. Special hospitals include obstetrics and gynecology; eye, ear, nose, and throat; rehabilitation; orthopedic; and chronic and special hospitals except psychiatric, tuberculosis, alcoholism, and chemical dependency hospitals]

No. 158. Hospital Utilization Rates: 1980 to 2000

[37,832 represents 37,832,000. Represents estimates of inpatients discharged from noninstitutional, short-stay hospitals, exclusive of federal hospitals. Excludes newborn infants. Based on sample data collected from the National Hospital Discharge Survey, a sample survey of hospital records of patients discharged in year shown; subject to sampling variability. Comparisons beginning 1990 with data for 1980 should be made with caution as estimates of change may reflect improvements in the survey design rather than true changes in hospital use.]

¹ Based on Census Bureau estimated civilian population as of July 1. Population figures are adjusted for net underenumeration using the 1990 National Population Adjustment Matrix from the U.S. Census Bureau. ² Average length of stay and rates per 1,000 population are age-adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. ³ Includes other first-listed diagnoses not shown separately. ⁴ Excludes discharges from other types of facilities such as the Dept. of Veterans Affairs or long-term hospitals. ⁵ Estimates are considered unreliable. ⁶ Includes abuse, dependence, and withdrawal. Excludes discharges from other types of facilities such as the Dept. of Veterans Affairs or day treatment programs.

No. 163. Hospital Utilization Measures for HIV Patients: 1985 to 2000

[HIV represents human immunodeficiency virus. See headnote, Table 158]

Measure of utilization	Unit	1985	1990	1995	1998	1999
Number of patients discharged ¹	1,000	23	146	249	189	180
Rate of patient discharges ²	Rate	1.0	5.8	9.4	6.9	6.5
Number of days of care	1,000	387	2,188	2,326	1,503	1,310
Rate of days of care ²	Rate	16.3	86.9	87.6	55.0	47.5
Average length of stay ³	Days	17.1	14.9	9.3	8.0	7.3

¹ Comparisons beginning 1990 with data for earlier years should be made with caution as estimates of change may improvements in the 1988 sample design rather than true changes in hospital use. ² Per 10,000 population. Based on Census Bureau estimated civilian population as of July 1. Population estimates for the 1980's do not reflect revised estimates based on the 1990 Census of Population. Beginning 1998, rates are based on civilian population estimates that have been adjusted underenumeration in the 1990 census. Since population estimates for the 2000 census were not available when this table prepared, the 2000 population estimates were based on the 1990 census. ³ For similar data on all patients, see Table 158.

Source: National Center for Health Statistics, *Vital and Health Statistics*, Series 13; and unpublished data.

No. 164. Skilled Nursing Facilities: 1980 to 1999

[448 represents 448,000. Covers facilities and beds certified for participation under Medicare as of midyear. Includes facilities which have transfer agreements with one or more participating hospitals, and are engaged primarily in providing skilled care and related services for the rehabilitation of injured, disabled, or sick persons]

Item	Unit	1990	1990	1995	1990	1997	1998
Skilled nursing facilities	Number	5,155	9,008	13,281	14,177	14,860	15,037
Beds	1,000	448	512	657	672	685	723
Per 1,000 Medicare enrollees	Rate	16.0	15.2	17.7	17.8	18.0	18.8

¹ Based on total number of beneficiaries enrolled in the Medicare hospital insurance program as of July 1 of year.

Source: U.S. Health Care Financing Administration, *Medicare Participating Providers and Suppliers of Health Services* and unpublished data.

No. 165. Home Health and Hospice Care Agencies by Selected Characteristics: 2000

[In percent, except as indicated (11.4 represents 11,400). Based on the National Home and Hospice Care Survey. Home health care is provided to individuals and families in their place of residence. Hospice care is available in both the home and inpatient settings. See source for details. For composition of regions, see map, inside front cover]

No. 177. Estimated Persons Living With Acquired Immunodeficiency Syndrome (AIDS) by Selected Characteristics: 1995 to 2000

[These numbers do not represent actual cases of persons living with AIDS. Rather, these numbers are point estimates of persons living with AIDS derived by subtracting the estimated cumulative number of deaths in persons with AIDS from the estimated cumulative number of persons with AIDS diagnosed. Estimated AIDS incidence and estimated deaths are adjusted for reporting delays, but not for incomplete reporting]

Characteristic	1995	1996	1997	1998	1999	2000

No. 179. Persons With Limitation of Activity Caused by Chronic Conditions: 1997 and 1999

[In percent. Limitation of activity is assessed by asking respondents a series of questions about limitations in their ability to perform activities usual for their age group because of a physical, mental, or emotional problem. Respondents are asked about limitations in activities of daily living, or instrumental activities of daily living, play, school, work, difficulty walking or remembering, and any other activity limitations. For reported limitations, the causal health conditions are determined and respondents are considered limited if one or more of these conditions is chronic. Based on the National Health Interview Survey, a sample survey of the civilian noninstitutionalized population; see Appendix III]

Characteristic	1997	1999	Characteristic	1997	1999
	Total ^{1 2}	13.3		12.2	Male ²
Under 18 years	6.6	6.0	Female ²	13.4	12.2
18 to 44 years	7.0	6.3			
45 to 54 years	14.2	13.1	White, non-Hispanic ²	13.2	12.3
55 to 64 years	22.2	21.1	Black, non-Hispanic ²	17.0	15.3
65 to 74 years	30.0	27.5	Hispanic ^{2 3}	12.8	10.4
75 years and over	50.2	45.6	Mexican ^{2 3}	12.5	9.6

¹ Includes all other races not shown separately. ² Estimates for all persons are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. ³ Persons of Hispanic origin may be of any race.

No. 180. Persons 65 Years Old and Over With Limitation of Activity Caused by Chronic Conditions: 1997 to 1999

[In percent. Covers noninstitutionalized persons 65 years old and over. To determine activities of daily living (ADL) limitations respondents were asked "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons with personal care needs, such as eating, bathing, dressing, or getting around inside this home?" Instrumental activities of daily living (IADL) were determined by asking respondents "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons in handling routine needs, such as everyday household chores, doing necessary business, shopping, or getting around for other purposes?" See also headnote, Table 179]

Characteristic	Percent with ADL limitation			Percent with IADL limitation		
	1997	1998	1999	1997	1998	1999
Total ^{1 2}	6.7	6.3	6.3	13.7	13.5	12.4
65 to 74 years	3.4	3.3	3.1	6.9	7.1	6.2
75 years and over	10.4	9.6	9.9	21.2	20.5	19.1

No. 183. Estimated Use of Selected Drugs by State: 1999

[15,193 represents 15,193,000. Current users are those persons 12 years old and over who used drugs at least once within month prior to this study. Based on national sample of respondents (see also headnote, Table 182). The state estimates were produced by combining the prevalence rate based on the state sample data and the prevalence rate based on a national regression model applied to local-area county and census block group/tract-level estimates from the state. The parameters of the regression model are estimated from the entire national sample. For comparison purposes, the data shown here display estimates for all 50 States and the District of Columbia utilizing the modeled estimates for all 51 areas]

¹ Any illicit drug indicates use at least once of marijuana/hashish, cocaine (including crack), inhalants, hallucinogens (including PCP and LSD), heroin, or any prescription-type psychotherapeutic used nonmedically. Any illicit drug other than marijuana indicates use at least once of any of these listed drugs, regardless of marijuana/hashish use; marijuana/hashish users who also have used any of the other listed drugs are included. ² Binge use is defined as drinking five or more drinks on the same occasion on at least 1 day in the past 30 days. By "occasion" is means at the same time or within a couple hours of each other.

No. 187. Cancer—Estimated New Cases, 2002, and Survival Rates, 1980-82 to 1992-98

[1,285 represents 1,285,000. The 5-year relative survival rate, which is derived by adjusting the observed survival rate for expected mortality, represents the likelihood that a person will not die from causes directly related to their cancer within 5 years. Survival data shown are based on those patients diagnosed while residents of an area listed below during the time periods shown. Data are based on information collected as part of the National Cancer Institute's Surveillance, Epidemiology and End Results (SEER) program, a collection of population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound, and San Francisco-Oakland]

No. 190. Percent of U.S. Adults Who Were Overweight and Percent Who Were Obese: 1999

[Percent who are overweight includes those who are obese and represent those who have a body mass index (BMI) equal to or above 25. Percent who are obese represent those who have a BMI equal to or above 30. BMI is a measure that adjusts body weight for height. It is calculated as weight in kilograms divided by height in meters squared. These estimates are based on definitions provided in the *Dietary Guidelines for Americans*, published by the U.S. Dept. of Agriculture and the U.S. Dept. of Health and Human Services. Based on the National Health Interview Survey; for details, see Appendix III]

Characteristic	Both sexes		Males		Females	
	Overweight	Obese	Overweight	Obese	Overweight	Obese
All ages (age-adjusted) ¹	56.5	21.1	65.0	21.6	48.3	20.6

No. 192. Households and Persons Having Problems With Access to Food: 1995 to 2000

[100,445 represents 100,445,000. Food secure means that a household had access at all times to enough food for an active healthy life, with no need for recourse to emergency food sources or other extraordinary coping behaviors to meet their basic food needs. A food insecure household did not have this same access to enough food to fully meet basic needs at all times. Food insecure households with hunger were those with one or more household members who were hungry at least sometime during the period due to inadequate resources for food. The omission of homeless persons may be a cause of underreporting. The Federal food security measure was developed through a collaborative process between private non-government experts, academic researchers, and a Federal interagency working group, with leadership from the U.S. Dept. of Agriculture and the U.S. Dept. of Health and Human Services. The severity of food insecurity and hunger in households is measured through a series of questions about experiences and behaviors generally known to characterize households that are having difficulty meeting basic food needs. These experiences and behaviors generally occur in an ordered sequence as the severity of food insecurity increases. As resources become more constrained, adults in typical households first worry about having enough food, then they stretch household resources and juggle other necessities, then decrease the quality and variety of household members' diets, then decrease the frequency and quantity of adults' food intake, and finally decrease the frequency and quantity of children's food intake. All questions refer to the previous 12 months and include a qualifying phrase reminding respondents to report only those occurrences that resulted from inadequate financial resources. Restrictions to food intake due to dieting or busy schedules are excluded. Data are from the Food Security Supplement to the Current Population Survey (CPS); for details about the CPS, see text, Section 1, Population, and Appendix III]

Household food security level	Number (1,000)				Percent distribution			
	1995	1999 ¹	1998 ²	2000	1995	1999 ¹	1998 ²	2000

With hunger	4,100	3,259	3,369	2,950	5.8	4.6	4.7	4.1
With hunger among children ³	(NA)	(NA)	716	562	(NA)	(NA)	1.0	0.8

NA Not available. ¹ Adjusted data. These data are comparable to those of earlier years. ² Data as collected. These data are comparable to those for 2000. ³ One or more children in these households was hungry because of the household's food insecurity. Percent distribution of households with hunger among children excludes households with no child from the denominator. ⁴ Most of these children did not, themselves, face hunger, but adults or older children in the household did.

No. 193. Nutrition—Nutrients in Foods Available for Civilian Consumption Per Capita Per Day: 1970 to 1999

[Computed by the Center for Nutrition Policy and Promotion (CNPP). Based on Economic Research Service (ERS) estimates of per capita quantities of food available for consumption from "Food Consumption, Prices, and Expenditures," on imputed consumption data for foods no longer reported by ERS, and on CNPP estimates of quantities of produce from home gardens. Food supply estimates do not reflect loss of food or nutrients from further marketing or home processing. Enrichment and fortification levels of iron, zinc, thiamin, riboflavin, niacin, vitamin A, vitamin B₆, vitamin B₁₂, and ascorbic acid are included]

Section 4

Education

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, computer usage in schools, distance education, and adult education. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the U.S. Census Bureau (see text, Section 1, Population); annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics (NCES), a part of the U.S. Department of Education; and surveys conducted by the National Education Association.

The censuses of population have included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment periodically since 1947.

The NCES is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, including government expenditures, and organization at the elementary, secondary, and higher education levels. It is also a primary source for detailed information on federal funds for education, projections of enrollment, graduates, and teachers. *The Condition of Education*, issued annually, presents a summary of information on education of particular interest to policymakers. NCES also conducts special studies periodically.

The census of governments, conducted by the Census Bureau every 5 years (for the years ending in "2" and "7"), provides data on school district finances and state and local government expenditures for education. Reports published by the

Bureau of Labor Statistics contain data relating civilian labor force experience to educational attainment (see also Tables 564, 590, and 598 in Section 12, Labor Force, Employment, and Earnings).

Types and sources of data—The statistics in this section are of two general types. One type, exemplified by data from the Census Bureau, is based on direct interviews with individuals to obtain information about their own and their family members' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual, or beginning 1992, the highest diploma or degree received.

Starting in October 1994, the CPS used 1990 census population controls plus adjustment for undercount. Also the survey changed from paper to computer assisted technology. For years 1981 through 1993, 1980 census population controls were used; 1971 through 1980, 1970 census population controls had been used. These changes had little impact on summary measures (e.g., medians) and proportional measures (e.g., enrollment rates); however, use of the controls may have significant impact on absolute numbers.

The second type, generally exemplified by data from the NCES and the National Education Association, is based on reports from administrators of educational institutions and of state and local agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the nation, individual states, and local areas.

Unlike the NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence

schools in its surveys. The NCES includes nursery schools and kindergartens that are part of regular grade schools in their enrollment figures. The Census Bureau includes all nursery schools and kindergartens. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

School attendance—All states require that children attend school. While state laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 6 and continue to age 16.

Schools—The NCES defines a school as "a division of the school system consisting of students composing one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

Regular schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools.

Public schools are schools controlled and supported by local, state, or federal governmental agencies; private schools are

those controlled and supported mainly by religious organizations or by private persons or organizations.

The Census Bureau defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and universities and graduate or professional schools. Statistics reported by the NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Census Bureau because the grades included at the two levels vary, depending on the level assigned to the middle or junior high school by the local school systems.

School year—Except as otherwise indicated in the tables, data refer to the school year which, for elementary and secondary schools, generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30. Enrollment data generally refer to a specific point in time, such as fall, as indicated in the tables.

Statistical reliability—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to the Census Bureau and the NCES data, see Appendix III.

No. 198. School Enrollment: 1965 to 2011

No. 223. Students Who Are Homeschooled by Selected Characteristics: 1999

[As of spring, (50,188 represents 50,188,000). For students 5 to 17 with a grade equivalent of K-12. Homeschooled are students whose parents reported them to be schooled at home instead of a public or private school. Excludes students who were enrolled in school for more than 25 hours a week or were homeschooled due to a temporary illness. Based on the Parent Survey of the National Household Education Surveys Program; see source for details]

NA Not available. ¹ Beginning 1990, number of institutions includes count of branch campuses. Due to revised survey procedures, data beginning 1990 are not comparable with previous years. Beginning 1996 data reflect a new classification of institutions; this classification includes some additional, primarily 2-year, colleges than before and excludes a few institutions that did not award degrees. Includes institutions that were eligible to participate in Title IV Federal financial aid programs. ² Due to revised survey methods, data beginning 1990 not comparable with previous years. ³ Beginning 1980, branch campuses counted according to actual status, e.g., 2-year branch in 2-year category; previously a 2-year branch included in university category. ⁴ Includes unclassified students. (Students taking courses for credit, but are not candidates for degrees.) ⁵ Includes items not shown separately. ⁶ Data for 1970 are not strictly comparable with later years. ⁷ Beginning 1980, includes schools accredited by the National Association of Trade and Technical Schools. See footnote 1 for information pertaining to data beginning 1996.

Section 5

Law Enforcement, Courts, and Prisons

This section presents data on crimes committed, victims of crimes, arrests, and data related to criminal violations and the criminal justice system. The major sources of these data are the Bureau of Justice Statistics (BJS), the Federal Bureau of Investigation (FBI), and the Administrative Office of the U.S. Courts. BJS issues several reports, including *Sourcebook of Criminal Justice Statistics*, *Criminal Victimization in the United States*, *Prisoners in State and Federal Institutions*, *Children in Custody*, *Census of State Correctional Facilities and Survey of Prison Inmates*, *Census of Jails and Survey of Jail Inmates*, *Parole in the United States*, *Capital Punishment*, and the annual *Expenditure and Employment Data for the Criminal Justice System*. The Federal Bureau of Investigation's major annual reports are *Crime in the United States*, *Law Enforcement Officers Killed and Assaulted*, annual, and *Hate Crimes*, annual, which presents data on reported crimes as gathered from state and local law enforcement agencies.

Legal jurisdiction and law enforcement—Law enforcement is, for the most part, a function of state and local officers and agencies. The U.S. Constitution reserves general police powers to the states. By act of Congress, federal offenses include only offenses against the U.S. government and against or by its employees while engaged in their official duties and offenses which involve the crossing of state lines or an interference with interstate commerce. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 states, 1 in the District of Columbia, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the states, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts: Investigation of crimes and

arrests of persons suspected of committing them; prosecution of those charged with crime; and the punishment or treatment of persons convicted of crime.

Crime—There are two major approaches taken in determining the extent of crime. One perspective is provided by the FBI through its Uniform Crime Reporting Program (UCR). The FBI receives monthly and annual reports from law enforcement agencies throughout the country, currently representing 94 percent of the national population. Each month, city police, sheriffs, and state police file reports on the number of index offenses, hate crimes and law enforcement assaults that become known to them. Additionally, data are collected for officers killed in the line of duty.

The FBI Crime Index offenses are as follows: *Murder and nonnegligent manslaughter* is based on police investigations, as opposed to the determination of a medical examiner or judicial body, includes willful felonious homicides and excludes attempts and assaults to kill, suicides, accidental deaths, justifiable homicides, and deaths caused by negligence; *forcible rape* includes forcible rapes and attempts; *robbery* includes stealing or taking anything of value by force or violence or threat of force or violence and includes attempted robbery; *aggravated assault* includes assault with intent to kill; *burglary* includes any unlawful entry to commit a felony or a theft and includes attempted burglary and burglary followed by larceny; *larceny* includes theft of property or articles of value without use of force and violence or fraud and excludes embezzlement, "con games," forgery, etc.; *motor vehicle theft* includes all cases where vehicles are driven away and abandoned but excludes vehicles taken for temporary use and returned by the taker. Arson was added as the eighth Index offense in April 1979 following a Congressional mandate. *Arson* includes any willful or malicious burning

or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The monthly Uniform Crime Reports also contain data on crimes cleared by arrest and on characteristics of persons arrested for all criminal offenses. In summarizing and publishing crime data, the FBI depends primarily on the adherence to the established standards of reporting for statistical accuracy, presenting the data as information useful to persons concerned with the problem of crime and criminal law enforcement.

National Crime Victimization Survey (NCVS)—A second perspective on crime is provided by this survey of the Bureau of Justice Statistics. Details about the crimes come directly from the victims. No attempt is made to validate the information against police records or any other source.

The NCVS measures rape, robbery, assault, household and personal larceny, burglary, and motor vehicle theft. The NCVS includes offenses reported to the police, as well as those not reported.

Police reporting rates (percent of victimizations) varied by type of crime. In 1994, for instance, 32 percent of the rapes/sexual assaults were reported; 55 percent of the robberies; 40 percent of assaults; 33 percent of personal thefts; 51 percent of the household burglaries; and 78 percent of motor vehicle thefts.

Murder and kidnaping are not covered. Commercial burglary and robbery were dropped from the program during 1977. The so-called victimless crimes, such as drunkenness, drug abuse, and prostitution, also are excluded, as are crimes for which it is difficult to identify knowledgeable respondents or to locate data records.

Crimes of which the victim may not be aware also cannot be measured effectively. Buying stolen property may fall into this category, as may some instances of embezzlement. Attempted crimes of many types probably are under recorded

for this reason. Events in which the victim has shown a willingness to participate in illegal activity also are excluded.

In any encounter involving a personal crime, more than one criminal act can be committed against an individual. For example, a rape may be associated with robbery or a household offense, such as burglary, can escalate into something more serious in the event of a personal confrontation. In classifying the survey-measured crimes, each criminal incident has been counted only once—by the most serious act that took place during the incident and ranked in accordance with the seriousness classification system used by the Federal Bureau of Investigation. The order of seriousness for crimes against persons is as follows: Rape, robbery, assault, and larceny. Personal crimes take precedence over household offenses.

A *victimization*, basic measure of the occurrence of crime, is a specific criminal act as it affects a single victim. The number of victimizations is determined by the number of victims of such acts. Victimization counts serve as key elements in computing rates of victimization. For crimes against persons, the rates are based on the total number of individuals age 12 and over or on a portion of that population sharing a particular characteristic or set of traits. As general indicators of the danger of having been victimized during the reference period, the rates are not sufficiently refined to represent true measures of risk for specific individuals or households.

An *incident* is a specific criminal act involving one or more victims; therefore the number of incidents of personal crimes is lower than that of victimizations.

Courts—Statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many states individually. The only national compilations of such statistics were made by the Census Bureau for 1932 to 1945 covering a maximum of 32 states and by the Bureau of Justice Statistics for 1986, 1988, 1990, and 1992 based on a nationally representative sample survey.

The bulk of civil and criminal litigation in the country is commenced and determined in the various state courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the federal courts may civil or criminal litigation be heard and decided by them. Generally, the federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different states; civil cases involving admiralty, maritime, or prize jurisdiction; and all matters in bankruptcy. The Administrative Office of the United States Courts has compiled statistics on the caseload of the federal courts annually since 1940.

There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A court of original jurisdiction is one having the authority initially to try a case and pass judgment on the law and the facts; a court of appellate jurisdiction is one with the legal authority to review cases and hear appeals; a court of general jurisdiction is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a court of limited or special jurisdiction is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every state and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and Guam. Appeals from the district courts are taken to intermediate appellate

courts of which there are 13, known as U.S. courts of appeals and the United States Court of Appeals for the Federal Circuit. The Supreme Court of the United States is the final and highest appellate court in the federal system of courts.

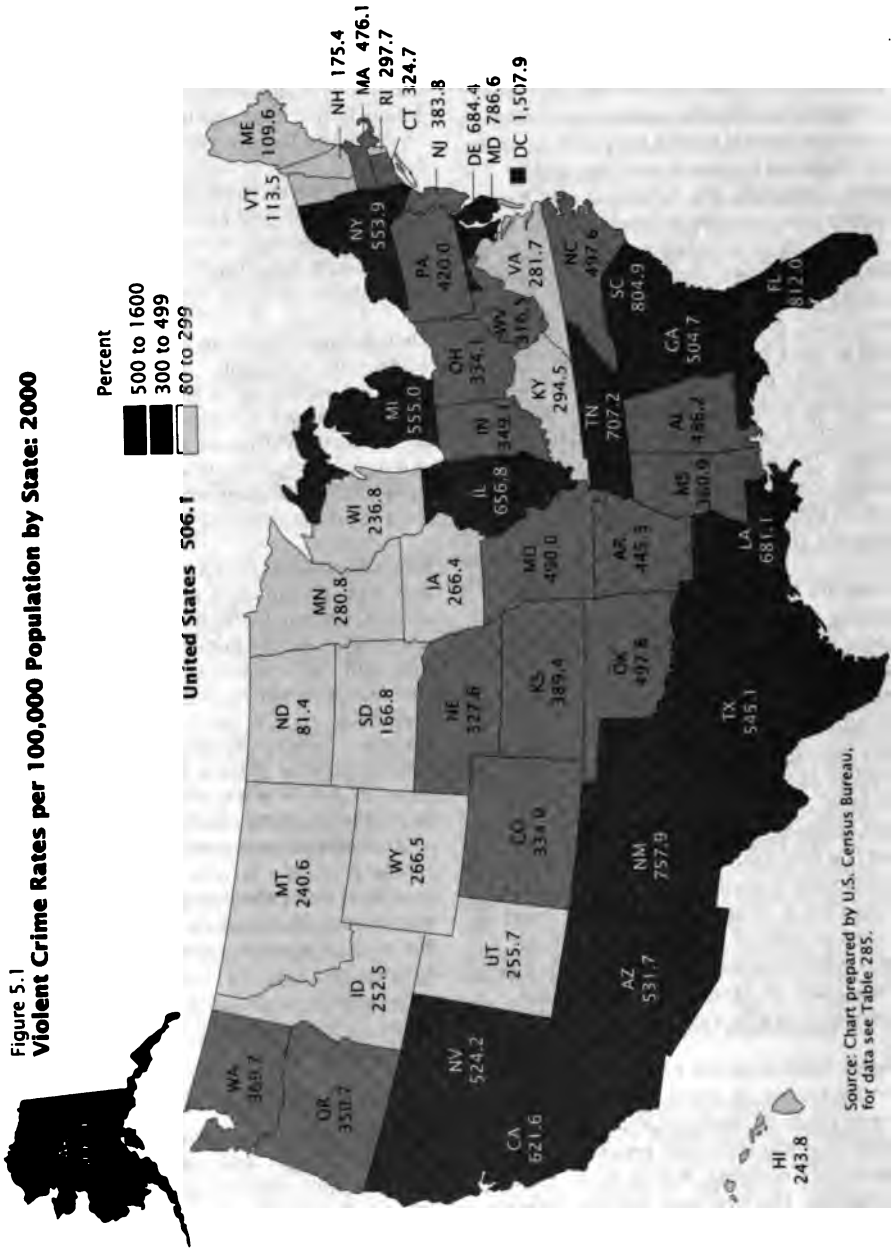

Juvenile offenders—For statistical purposes, the FBI and most states classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "anti-social" conduct. Several types of facilities are available for those adjudicated delinquent, ranging from the short-term physically unrestricted environment to the long-term very restrictive atmosphere.

Prisoners—Data on prisoners in federal and state prisons and reformatories were collected annually by the Census Bureau until 1950, by the Federal Bureau of Prisons until 1971, transferred then to the Law Enforcement Assistance Administration, and, in 1979, to the Bureau of Justice Statistics. Adults convicted of criminal activity may be given a prison or jail sentence. A *prison* is a confinement facility having custodial authority over adults sentenced to confinement of more than 1 year. A *jail* is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to 1 year or less. Nearly every state publishes annual data either for its whole prison system or for each separate state institution.

Statistical reliability—For discussion of statistical collection, estimation and sampling procedures, and measures of statistical reliability pertaining to the National Crime Victimization Survey and Uniform Crime Reporting Program, see Appendix III.

¹ Includes nonnegligent manslaughter. ² Forcible rape figures furnished by the state-level uniform crime reporting (UCR) Program administered by the Delaware State Bureau of Investigation were not in accordance with the national UCR guidelines; therefore, it was necessary that the forcible rape count be estimated. ³ Includes offenses reported by the police at the Natchez Zoo. ⁴ Complete data were not available; therefore, it was necessary for the crime counts to be estimated for Illinois, Kansas, Kentucky, and Montana, for all years shown, for Maine in 1999, and for New Hampshire and Wisconsin for 1998.

No. 289. Homicide Victims by Race and Sex: 1980 to 1999

[Rates per 100,000 resident population in specified group. Excludes deaths to nonresidents of United States. Deaths classified according to the tenth revision of the *International Classification of Diseases as of 1999*; see text, Section 2, Vital Statistics]

Year	Homicide victims					Homicide rate ²				
	White			Black		White			Black	
	Total ¹	Male	Female	Male	Female	Total ¹	Male	Female	Male	Female
1980	24,278	10,381	3,177	8,385	1,898	10.7	10.9	3.2	66.6	11.1
1985	19,893	8,122	3,041	6,616	1,666	8.3	8.2	2.9	48.4	10.1
1990	24,932	9,147	3,006	9,981	2,163	10.0	9.0	2.8	69.2	11.1
1992	25,488	9,456	3,012	10,131	2,187	10.0	9.1	2.8	67.5	11.1
1993	26,009	9,054	3,232	10,640	2,297	10.1	8.6	3.0	69.7	11.1
1994	24,928	9,055	2,921	10,083	2,124	9.6	8.5	2.6	65.1	11.1
1995	22,895	8,336	3,028	8,847	1,936	8.7	7.8	2.7	56.3	11.1
1996	20,971	7,570	2,747	8,183	1,800	7.9	7.0	2.5	51.5	11.1
1997	19,846	7,343	2,570	7,601	1,652	7.4	6.7	2.3	47.1	11.1
1998	18,272	6,707	2,534	6,873	1,547	6.8	6.1	2.2	42.1	11.1
1999 ³	16,889	6,162	2,466	6,214	1,434	6.2	5.6	2.2	37.5	11.1

¹ Includes races not shown separately. ² Rate based on enumerated population figures as of April 1 for 1980 and July 1 estimates for other years. ³ Effective with data for 1999, causes of death are classified by The Tenth Revision International Classification of Diseases (ICD-10), replacing the Ninth Revision (ICD-9) used for 1979-98 data. Breaks in the comparability of some cause of death statistics result from changes in category titles, changes in the structure and content of the classification, changes in coding rules used to select the underlying cause of death. In ICD-9, the category Homicide also includes death resulting from legal intervention. ICD-10 has two separate categories for these two causes of death. Some caution should be used comparing data between 1998 and 1999.

No. 319. Delinquency Cases and Case Rates by Sex and Race: 1992 to 1999

[A delinquency offense is an act committed by a juvenile for which an adult could be prosecuted in a criminal court. Disposition of a case involves taking a definite action such as waiving the case to criminal court, dismissing the case, placing the youth on probation, placing the youth in a facility for delinquents, or such actions as fines, restitution, and community service. Offenses may not add to total sex and race categories due to rounding]

No. 320. Child Abuse and Neglect Cases Substantiated and Indicated—Victim Characteristics: 1990 to 2000

[Based on reports alleging child abuse and neglect that were referred for investigation/assessment by the respective child protective services agency in each state. The reporting period may be either calendar or fiscal year. Children are counted each time they were subjects of an investigation report. In 2000, the data are from 49 states. Victims are children whose alleged maltreatments have been substantiated, indicated, or assessed as maltreatments. A substantiated case represents a type of investigation disposition that determines that there is sufficient evidence under state law to conclude that maltreatment occurred or that the child is at risk of maltreatment. An indicated case represents a type of disposition that concludes that there was a reason to suspect maltreatment had occurred. An alternative response-victim case represents a type of disposition that identifies child as a victim within the alternative response system.]

¹ Represents or rounds to zero. NA Not available. ² State-level data excludes federal inmates. ³ Includes both jail and prison inmates (state has combined jail and prison system). ⁴ Numbers are for custody rather than jurisdiction counts. ⁵ 1980 and 1990, data are for custody counts; thereafter, jurisdiction counts are reported. ⁶ Reporting criteria were expanded in 1999 to include home confinement clients in supervised custody facilities. Comparable counts for 1998 were not available. ⁷ Reporting criteria changed in 1999; percent calculated based on counts adjusted for comparable reporting.

Section 6

Geography and Environment

This section presents a variety of information on the physical environment of the United States, starting with basic area measurement data and ending with climatic data for selected weather stations around the country. The subjects covered between those points are mostly concerned with environmental trends but include related subjects such as land use, water consumption, air pollutant emissions, toxic releases, oil spills, hazardous waste sites, municipal waste and recycling, threatened and endangered wildlife, and the environmental industry.

The information in this section is selected from a wide range of federal agencies that compile the data for various administrative or regulatory purposes, such as the Environmental Protection Agency, U.S. Geological Survey, National Oceanic and Atmospheric Administration (NOAA), Natural Resources Conservation Service, and General Services Administration.

Area—For the 2000 census, area measurements were calculated by computer based on the information contained in a single, consistent geographic database, the TIGER® database, rather than relying on historical, local, and manually calculated information. New information from the 2000 census may be found in Table 335.

Geography—The U.S. Geological Survey conducts investigations, surveys, and research in the fields of geography, geology, topography, geographic information systems, mineralogy, hydrology, and geothermal energy resources as well as natural hazards. The U.S. Geological Survey provides United States cartographic data through the Earth Sciences Information Center, water resources data through the National Water Data Exchange (NAWDEX), and a variety of research and Open-File reports which are announced monthly in *New Publications of the U.S. Geological Survey*.

In a joint project with the U.S. Census Bureau, during the 1980s, the U.S. Geological Survey provided the basic information on geographic features for input into a national geographic and cartographic database prepared by the Census Bureau, called the TIGER® (Topologically Integrated Geographic Encoding and Referencing) database. Since then, using a variety of sources, the Census Bureau has updated these features and their related attributes (names, descriptions, etc.) and inserted current information on the boundaries, names, and codes of legal and statistical geographic entities; very few of these updates added aerial water features, however. Maps prepared by the Census Bureau using the TIGER database show the names and boundaries of entities and are available on a current basis.

The Census Bureau maintains a current inventory of governmental units and their legal boundaries primary through its Boundary and Annexation Survey. The information is available to the public in the several files, all available on line: TIGER/Line®, there are also several series of maps for Census 2000: P.L. County Block Maps, Census Tract Outline Maps, and Voting District/ State Legislative District Outline Maps. These maps can be obtained online via the American Fact-Finder.

An inventory of the nation's land resources by type of use/cover was conducted by the National Resource Recovery Conservation Service (formerly the Soil Conservation Service) every 5 years beginning in 1982. The most recent survey results, which were published in the 1997 National Resources Inventory, cover all nonfederal land in Puerto Rico, the Virgin Islands, and the United States except Alaska. Tables 337 and 338 provide results from the survey.

Environment—The principal federal agency responsible for pollution abatement and control activities is the Environmental Protection Agency (EPA). It is

responsible for establishing and monitoring national air quality standards, water quality activities, solid and hazardous waste disposal, and control of toxic substances. Many of these series now appear on the EPA Web site at the Center for Environmental Information and Statistics and can be accessed at <<http://www.epa.gov/ceis/>>.

National Ambient Air Quality Standards (NAAQS) for suspended particulate matter, sulfur dioxide, photochemical oxidants, carbon monoxide, and nitrogen dioxide were originally set by the EPA in April 1971. Every 5 years, each of the NAAQS is reviewed and revised if new health or welfare data indicates that a change is necessary. The standard for photochemical oxidants, now called ozone, was revised in February 1979. Also, a new NAAQS for lead was promulgated in October 1978 and for suspended particulate matter in 1987. Table 347 gives some of the health-related standards for the six air pollutants having NAAQS. Data gathered from state networks are periodically submitted to EPA's National Aerometric Information Retrieval System (AIRS) for summarization in annual reports on the nationwide status and trends in air quality; for details, see *National Air Quality and Emissions Trends Report*. More current information on emissions may be found on the EPA Web site at <<http://www.epa.gov/ttn/chief/trends>>.

The Toxics Release Inventory (TRI), published by the U.S. EPA, is a valuable source of information regarding toxic chemicals that are being used, manufactured, treated, transported, or released into the environment. Two rules, Section 313 of the Emergency Planning and Community Right-To-Know Act (EPCRA) and Section 6607 of the Pollution Prevention Act (PPA), mandate that a publicly accessible toxic chemical database be developed and maintained by U.S. EPA. This database, known as the TRI, contains

information concerning waste management activities and the release of toxic chemicals by facilities that manufacture, process, or otherwise use said materials.

Data on the release of these chemicals are collected from manufacturing facilities and facilities added in 1998 that have the equivalent of 10 or more full-time employees and meet the established thresholds for manufacturing, processing, or "otherwise use" of listed chemicals. Facilities must report their releases and other waste management quantities. Federal facilities have been required to report since 1994, regardless of industry classification. In May 1997, EPA added seven new industry sectors that reported to the TRI for the first time in July 1999 for the 1998 reporting year.

Climate—NOAA, through the National Weather Service and the National Environmental Satellite, Data, and Information Service, is responsible for data on climate. NOAA maintains about 11,600 weather stations, of which over 3,000 produce autographic precipitation records, about 600 take hourly readings of a series of weather elements, and the remainder record data once a day. These data are reported monthly in the *Climatological Data* and *Storm Data*, published monthly, and annually in the *Local Climatological Data* (published by location for major cities).

The normal climatological temperatures, precipitation, and degree days listed in this publication are derived for comparative purposes and are averages for the 30-year period, 1971-2000. For stations that did not have continuous records for the entire 30 years from the same instrument site, the normals have been adjusted to provide representative values for the current location. The information in all other tables is based on data from the beginning of the record at that location through 2000, except as noted.

No. 340. U.S. Wetland Resources and Deepwater Habitats by Type: 1986 and 1997

[In thousands of acres (144,673.3 represents 144,677,300). Wetlands and deepwater habitats are defined separately because the term wetland does not include permanent water bodies. Deepwater habitats are permanently flooded land lying below the deepwater boundary of wetlands. Deepwater habitats include environments where surface water is permanent and often deep, so that water, rather than air, is the principal medium within which the dominant organisms live, whether or not they are attached to the substrate. As in wetlands, the dominant plants are hydrophytes; however, the substrates are in general terms, wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plant and animal communities living in the soil and on its surface. The single feature that most wetlands share is soil or substrate that is at least periodically saturated with or covered by water. Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water]

Wetland or deepwater category	1986		1997		Change, 1997 to 1987

Freshwater forested ⁷	51,829.6	50,728.5	50,728.5	50,728.5	-1,201.1
Freshwater shrub	17,235.2	18,365.6	18,365.6	18,365.6	1,130.4

¹ The lacustrine system includes deepwater habitats with all of the following characteristics: (1) situated in a topographic depression or a dammed river channel; (2) lacking trees, shrubs, persistent emergents, emergent mosses or lichens with greater than 30 percent coverage; (3) total area exceeds 20 acres. ² The riverine system includes deepwater habitats contained within a channel, with the exception of habitats with water containing ocean derived salts in excess of 0.5 parts per thousand. ³ The estuarine system consists of deepwater tidal habitats and adjacent tidal wetland that are usually semi-enclosed by land but have open, partly obstructed, or sporadic access to the open ocean, and in which ocean water is at least occasionally diluted by freshwater runoff from the land. Subtidal is where the substrate is continuously submerged by marine or estuarine waters. ⁴ Intertidal is where the substrate is exposed and flooded by tides. Intertidal includes the splash zone of coastal waters. ⁵ Emergent wetlands are characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants. ⁶ Forested wetlands are characterized by woody vegetation that is 20 feet tall or taller. ⁷ Shrub wetlands include areas dominated by woody vegetation less than 20 feet tall. The species include true shrubs, young trees, and trees or shrubs that are small or stunted because of environmental conditions.

Tanana	Alaska	Nabesna River, AK	659	41	44.5
Gila	Arizona	Middle Fork Gila River, NM	649	-	58.2

¹ Represents zero. ² From source to mouth. ³ Drainage area includes both the United States and Canada. ⁴ The length from the source of the Missouri River to the Mississippi River and thence to the Gulf of Mexico is about 3,710 miles. ⁵ Includes about 167,000 cubic ft. per second diverted from the Mississippi into the Atchafalaya River but excludes the flow of the Red River. ⁶ Excludes the drainage areas of the Red and Atchafalaya Rivers. ⁷ In east-central Louisiana, the Red River flows into the Atchafalaya River, a distributary of the Mississippi River. Data on average discharge, length, and drainage area include the Red River, but exclude all water diverted into the Atchafalaya from the Mississippi River.

U.S. Water Quality Conditions by Type of Waterbody: 1998

Section 305(b) of the Clean Water Act requires states and other jurisdictions to assess the health of their waters and the extent to which they support water quality standards. Section 305(b) requires that states submit reports describing water quality to the Environmental Protection Agency every 2 years. Water quality standards have three elements (designated uses, criteria to protect each use, and an antidegradation policy. For information on survey methodology and assessment criteria]

1. Available. 1. Includes waterbodies assessed as not attainable for one or more uses. Most states do not assess all waterbodies during the 2-year reporting cycle, but use a "rotating basin approach" whereby all waters are monitored over a 5-year period. 2. Based on assessment of available data, water quality supports all designated uses. Water quality meets or exceeds numeric criteria adopted to protect and support a designated use. 3. Although all assessed uses are currently in compliance with water quality standards, projections based on this trend indicate water quality will be impaired in the future, and corrective action is taken to prevent further degradation. 4. Impaired or not attainable. The reporting state or jurisdiction has used "attainability analysis" and demonstrated that support of one or more designated beneficial uses is not attainable due to biological, chemical, physical, or economic/social conditions. 5. Excludes unknown and natural sources. U.S. Environmental Protection Agency, National Water Quality Inventory: 1998 Report to Congress, June 2000.

Oil Spills in U.S. Water—Number and Volume: 1997 to 2000

Reported discharges into U.S. navigable waters, including territorial waters (extending 3 to 12 miles from the coastline), contiguous zone, onto shoreline, or into other waters that threaten the marine environment. Data found in Marine Environment System]

Characteristic	Number of spills				Spill volume (gallons)			
	1997	1998	1999	2000	1997	1998	1999	2000
Total	8,624	8,315	8,539	8,354	942,574	885,303	1,172,448	1,431,370
By volume:								
Less than 100 gallons	8,299	7,962	8,212	8,058	39,082	38,093	39,119	39,355

No. 347. National Ambient Air Pollutant Concentrations: 1990 to 1999

[Data represent annual composite averages of pollutant based on daily 24-hour averages of monitoring stations, except carbon monoxide is based on the second-highest, nonoverlapping, 8-hour average; ozone, average of the second-highest daily maximum 1-hour value; and lead, quarterly average of ambient lead levels. Based on data from the Aerometric Information Retrieval System. $\mu\text{g}/\text{m}^3$ =micrograms of pollutant per cubic meter of air; ppm=parts per million]

Pollutant	Unit	Monitoring stations, number	Air quality standard ¹	1999	1994	1995	1996	1997	1998	1999
				Carbon monoxide	ppm	388	9	5.8	5.1	4.6
Ozone	ppm	703	30.12	0.112	0.107	0.112	0.105	0.105	0.110	0.107
Ozone	ppm	705	40.08	0.085	0.084	0.087	0.083	0.082	0.088	0.085
Sulfur dioxide	ppm	480	0.03	0.0081	0.0069	0.0056	0.0056	0.0054	0.0053	0.0052
Particulates (PM-10)	$\mu\text{g}/\text{m}^3$	954	50	29.2	26.0	24.8	23.9	23.8	23.6	23.9
Nitrogen dioxide	ppm	230	0.053	0.020	0.020	0.019	0.018	0.018	0.018	0.018
Lead	$\mu\text{g}/\text{m}^3$	175	61.5	0.1	0.05	0.05	0.04	0.04	0.04	0.04

¹ Refers to the primary National Ambient Air Quality Standard that protects the public health. ² Based on 8-hour standard of 9 ppm. ³ Based on 1-hour standard of .12 ppm. ⁴ Based on 8-hour standard of .08 ppm. ⁵ The particulates (PM-10) standard replaced the previous standard for total suspended particulates in 1987. ⁶ Based on 3-month standard of 1.5 $\mu\text{g}/\text{m}^3$. Source: U.S. Environmental Protection Agency, *National Air Quality and Emissions Trends Report*, annual.

No. 348. National Air Pollutant Emissions: 1970 to 2000

[In thousands of tons, except as indicated. PM-10=Particulate matter of less than 10 microns. Methodologies to estimate data for 1970 to 1980 period and 1985 to present emissions differ. Beginning with 1985, the methodology for more recent years is described in the document available at <<http://www.epa.gov/ttn/chieftrends/trends99/neiproc99.pdf>>.]

Year	PM-10	PM-10, fugitive dust ¹	Sulfur dioxide	Nitrogen dioxides	Volatile organic compounds	Carbon monoxide	Lead (tons)
	1970	13,042	(NA)	31,161	20,928	30,982	129,444

No. 354. Toxic Chemical Releases and Transfers by Media: 1988 to 2000

[In millions of pounds (3,211.6 represents 3,211,600,600), except as indicated. Based on reports filed as required by Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA), or Title III of the Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499. Owners and operators of facilities that are classified within Standard Classification Code groups 20 through 39, have 10 or more full-time employees, and that manufacture, process, or otherwise uses any listed toxic chemical in quantities greater than the established threshold in the course of a calendar year are covered and required to report]

Media	Core chemicals ¹

Injuries	432	292	295	577	510	309	306	570	243	364	(NA)

- Represents zero. NA Not available. ¹ Source: U.S. National Weather Service, Internet site <http://www.spc.noaa.gov/clmo/tom/monthlytomstats.html> (accessed 06 June 2002). A violent, rotating column of air descending from a cumulonimbus cloud in the form of a tubular- or funnel-shaped cloud, usually characterized by movements along a narrow path and wind speeds from 100 to over 300 miles per hour. Also known as a "twister" or "waterspout." ² Source: National Hurricane Center (NHC), Coral Gables, FL, unpublished data. For data on individual hurricanes, see the NHC web site at <http://www.nhc.noaa.gov/>. Tropical storms have maximum winds of 39 to 73 miles per hour; hurricanes have maximum winds of 74 miles per hour or higher.

No. 361. Major U.S. Weather Disasters: 1980 to 2001

[5.0 represents \$5,000,000,000. Covers only weather related disasters costing \$1 billion or more]

Event	Description	Time period	Esti- mated cost (bil. dol.)
Tropical Storm Allison . . .	Tropical storm produced rainfall & severe flooding in coastal portions of TX & LA & damage also in MS, FL, VA, & PA .	June 2001	5.0
Midwest and Ohio Valley hail and tornadoes . . .	Storms, tornadoes, and hail in TX, OK, KS, NE, IA, MO, IL, IN, WI, MI, OH, KY, and PA	April 2001	1.7
Southern drought/heat wave	Severe drought and heat over south-central and south-eastern states cause significant agricultural losses	Spring-summer 2000	Over 4.0
Western fire season	Severe fire season in western states due to drought and frequent winds	Spring-summer 2000	Over 2.0
Hurricane Floyd	Category 2 hurricane in NC, causing severe flooding in NC and some flooding in SC, VA, MD, PA, NY, NJ, DE, RI, CT, MA, and VT	Sept. 1999	6.0
Drought/heat wave	Drought/heatwave over eastern U.S.	Summer 1999	1.0
OK-KS tornadoes	Category F4-F5 tornadoes hit OK, KS, TX, and TN	May 1999	1.0
AR-TN tornadoes	Two outbreaks of tornadoes in 6-day period	January 1999	1.3
Texas flooding	Severe flooding in southeast Texas from 2 heavy rain events with 10-20 in. totals	Oct.-Nov. 1998	1.0
Hurricane Georges	Category 2 hurricane in Puerto Rico, Florida Keys, and Gulf coasts of LA, MS, AL, and FL	Sept. 1998	3-4
Hurricane Bonnie	Category 3 hurricane in eastern NC and VA	August 1998	1.0
Southern drought/heat wave	Severe drought and heat wave from TX/OK eastward to the Carolinas	Summer 1998	6.0
Minnesota severe storms/hail	Very damaging severe thunderstorms with large hail over wide areas of Minnesota	May 1998	1.5
Southeast severe weather	Tornadoes and flooding related to strong El Nino in the southeast	Winter/spring 1998	1.0
Northeast ice storm	Intense ice storm hits ME, NH, VT, and NY	January 1998	1.4
Northern plains flooding	Severe flooding in Dakotas and MN due to heavy spring snowmelt	April-May 1997	2.0
MS and OH valleys flooding and tornadoes	Tornadoes and severe flooding hit the states of AR, MO, MS, TN, IL, IN, KY, OH, and WV	March 1997	1.0
West Coast flooding	Flooding from rains & snowmelt in CA, WA, OR, ID, NV, & MT.	Dec. 1996	2-3
Hurricane Fran	Category 3 hurricane in NC and VA	Jan. 1999	5.0
Southern Plains severe drought	Drought in agricultural areas of TX & OK	Sept. 1996	Over 4
Pacific Northwest severe flooding	Flooding from heavy rain & snowmelt in OR, WA, ID, and MT.	Fall 1995	1.0
Blizzard of '96 followed by flooding	Heavy snowstorm followed by severe flooding in Appalachians, Mid-Atlantic, and Northeast	Feb. 1996	3.0
Hurricane Opal	Category 3 hurricane in FL, AL, parts of GA, TN, & Carolinas.	Jan. 1996	Over 3
Hurricane Marilyn	Category 2 hurricane in Virgin Islands	Oct. 1995	2.1
TX/OK/LA/MS severe weather and flooding	Flooding, hail, & tornadoes across TX, OK, parts of LA, MS, Dallas & New Orleans hardest hit	Sept. 1995	5-6
California flooding	Flooding from frequent winter storms across much of CA	May 1995	3.0
Western fire season	Severe fire season in western states due to dry weather	Jan.-Mar. 1995	1.0
Texas flooding	Flooding from torrential rain & thunderstorms across southeast TX	Summer-fall 1994	1.0
Tropical Storm Alberto	Flooding due to 10 to 25 inch rain across GA, AL, part of FL	Oct. 1994	1.0
Southeast ice storm	Intense ice storm in pts of TX, OK, AR, LA, MS, AL, TN, GA, SC, NC, & VA	July 1994	3.0
California wildfires	Out-of-control wildfires over southern CA	Feb. 1994	1.0
Midwest flooding	Extreme flooding across central U.S.	Fall 1993	15-20
Drought/heat wave	Extreme drought/heatwave across southeastern U.S.	Summer 1993	1.0
Storm/blizzard	"Storm of the Century" hits entire eastern seaboard	Summer 1993	3-6
Nor'easter of 1992	Slow-moving storm batters northeast U.S. coast, New England hardest hit	Mar. 1993	1-2
Hurricane Iniki	Category 4 hurricane hit Hawaiian island of Kauai	Dec. 1992	1.8
Hurricane Andrew	Category 4 hurricane hit FL & LA	Sept. 1992	27.0
Oakland firestorm	Oakland, CA firestorm due to low humidity & high winds	Aug. 1992	1.5
Hurricane Bob	Category 2 hurricane—mainly coastal NC, Long Island, & New England	Oct. 1991	1.5
TX/OK/LA/AR flooding	Torrential rains cause flooding along Trinity, Red, and Arkansas rivers	Aug. 1991	1.0
Hurricane Hugo	Category 4 hurricane hit Puerto Rico & Virgin Islands, devastated NC & SC	May 1990	Over 9
Drought/heat wave	Drought/heatwave over central & eastern U.S.	Sept. 1989	40.0
Hurricane Juan	Category 1 hurricane, flooding most severe problem, hit LA and southeast U.S.	Summer 1988	1.5
Hurricane Elena	Category 3 hurricane across FL to LA	Oct.-Nov. 1985	1.3
Florida freeze	Severe freeze central/northern FL, damage to citrus ind.	Aug.-Sept. 1985	1.2
Florida freeze	Severe freeze central/northern FL, damage to citrus ind.	Jan. 1985	2.0
Hurricane Alicia	Category 3 hurricane across TX	Dec. 1983	3.0
Drought/heat wave	Drought/heatwave over central & eastern U.S.	Aug. 1983	20.0
		June-Sept. 1980	

- Represents zero. NA Not available or not reported.

Section 7

Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on congressional legislation; state legislatures; Black, Hispanic, and female officeholders; population of voting age; voter participation; and campaign finances.

Official statistics on federal elections, collected by the Clerk of the House, are published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Federal and state elections data appear also in *America Votes*, a biennial volume published by Congressional Quarterly, Inc., Washington, DC. Federal elections data also appear in the U.S. Congress, *Congressional Directory*, and in official state documents. Data on reported registration and voting for social and economic groups are obtained by the U.S. Census Bureau as part of the Current Population Survey (CPS) and are published in *Current Population Reports*, Series P20 (see text, Section 1).

Almost all federal, state, and local governmental units in the United States conduct elections for political offices and other purposes. The conduct of elections is regulated by state laws or, in some cities and counties, by local charter. An exception is that the U.S. Constitution prescribes the basis of representation in Congress and the manner of electing the President and grants to Congress the right to regulate the times, places, and manner of electing federal officers. Amendments to the Constitution have prescribed national criteria for voting eligibility. The 15th Amendment, adopted in 1870, gave all citizens the right to vote regardless of race, color, or previous condition of servitude. The 19th Amendment, adopted in 1919, further extended the right to vote to all citizens regardless of sex. The payment of poll taxes as a prerequisite to voting in federal elections was banned by the 24th Amendment in

1964. In 1971, as a result of the 26th Amendment, eligibility to vote in national elections was extended to all citizens, 18 years old and over.

Presidential election—The Constitution specifies how the President and Vice President are selected. Each state elects, by popular vote, a group of electors equal in number to its total of members of Congress. The 23d Amendment, adopted in 1961, grants the District of Columbia three presidential electors, a number equal to that of the least populous state. Subsequent to the election, the electors meet in their respective states to vote for President and Vice President. Usually, each elector votes for the candidate receiving the most popular votes in his or her state. A majority vote of all electors is necessary to elect the President and Vice President. If no candidate receives a majority, the House of Representatives, with each state having one vote, is empowered to elect the President and Vice President, again, with a majority of votes required.

The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to two elective terms of 4 years each or to one elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years.

Congressional election—The Constitution provides that Representatives be apportioned among the states according to their population, that a census of population be taken every 10 years as a basis for apportionment, and that each state have at least one Representative. At the time of each apportionment, Congress decides what the total number of Representatives will be. Since 1912, the total has been 435, except during 1960 to 1962 when it increased to 437, adding one Representative each for Alaska and Hawaii. The total reverted to 435 after

reapportionment following the 1960 census. Members are elected for 2-year terms, all terms covering the same period. The District of Columbia, American Samoa, Guam, and the Virgin Islands each elect one nonvoting Delegate, and Puerto Rico elects a nonvoting Resident Commissioner.

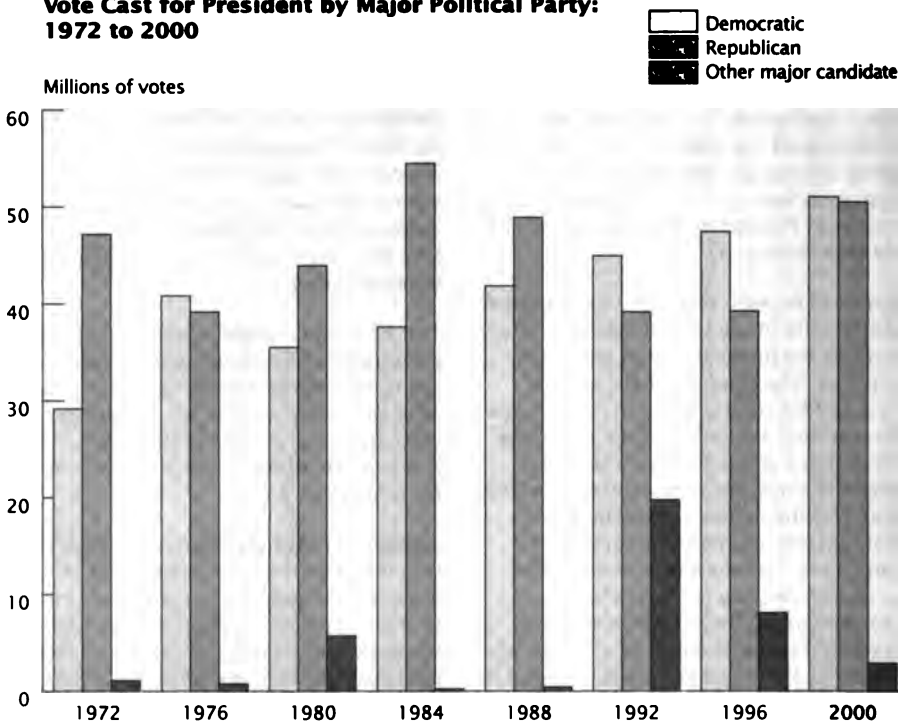

The Senate is composed of 100 members, 2 from each state, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the state legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Voter eligibility and participation—The Census Bureau publishes estimates of the population of voting age and the

percent casting votes in each state for Presidential and congressional election years. These voting-age estimates include a number of persons who meet the age requirement but are not eligible to vote, (e.g. aliens and some institutionalized persons). In addition, since 1964, voter participation and voter characteristics data have been collected during November of election years as part of the CPS. These survey data include noncitizens in the voting age population estimates but exclude members of the Armed Forces and the institutional population.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

K. Democratic and Republican Percentages of Two-Party Presidential Vote by Selected Characteristics of Voters: 1996 and 2000

Covers citizens of voting age living in private housing units in the contiguous United States. Percentages for presidential vote are computed by subtracting the percentage Republican vote from 100 percent; third-party or write-in votes are not included as valid data. Data are from the National Election Studies and are based on a sample and subject to sampling variability; for details, see source]

Characteristic	1996		2000		Characteristic	1996		2000	
	Democrat	Republican	Democrat	Republican		Democrat	Republican	Democrat	Republican
Age	58	42	52	48	Race:

No. 376. Apportionment of Membership in House of Representatives by State: 1790 to 2000

Total membership includes Representatives assigned to newly admitted states after the apportionment acts. Population figures used for apportionment purposes are those determined for states by each decennial census. No reapportionment based on 1920 population census. For method of calculating apportionment and a short history of apportionment, see House Report 91-1314, 91st Congress, 2d session, The Decennial Population Census and Congressional Apportionment.

X Not applicable. ¹ No candidate. ² According to state law, it is not required to tabulate votes for unopposed candidates. Louisiana holds an open-primary election with candidates from all parties running on the same ballot. Any candidate who receives a majority is elected; if no candidate receives 50 percent, there is a run off election in November between the top two finishers. Sanders, an Independent, was elected with 69.2 percent of the vote. ³ Goode, an Independent, was elected in the Virginia 5th with 67.4 percent of the vote.

No. 397. Political Party Financial Activity by Major Political Party: 1981 to 2000

[In millions of dollars (\$39.3 represents \$39,300,000). Covers financial activity during 2-year calendar period indicated. Some political party financial activities, such as building funds and State and local election spending, are not reported to the source. Also excludes contributions earmarked to Federal candidates through the party organizations, since some of those funds never passed through the committees' accounts]

No. 398. National Party Nonfederal Activity: 1996 to 2000

[In dollars. During the 2000 election cycle, both major parties raised record amounts of nonfederal or "soft money." Soft money is used to pay a portion of the overhead expenses of party organizations, as well as other shared expenses that benefit both federal and nonfederal elections. In addition, it is used for issue advocacy, as well as generic party advertising. It may also be transferred from national committees to state and local party committees as well as being used to support construction and maintenance of party headquarters]

Section 8

State and Local Government Finances and Employment

tion presents data on revenues,itures, debt, and employment of d local governments. Nationwide s relating to state and local govts, their numbers, finances, and ment are compiled primarily by Census Bureau through a pro-censuses and surveys. Every fifth r years ending in "2" and "7" the Bureau conducts a census of govts involving collection of data for rnemental units in the United n addition, the Census Bureau s annual surveys which cover all e governments and a sample of vernments.

y, the Census Bureau releases tion on the Internet which pre-rancial data for the federal gov-t, nationwide totals for state and vernments, and state-local data by Also released annually is a series i, city, county, and school finances state and local public employ- here is also a series of quarterly eases covering tax revenue and s of major public employee retire- stems.

formation for Census Bureau stan governments is obtained by ivass from state and local officials; r, financial data for each of the vernments and for many of the cal governments are compiled eir official records and reports by Bureau personnel. In over two- f the states, all or part of local nent financial data are obtained . central collection arrangements te governments. Financial data on :ral government are primarily n the *Budget* published by the f Management and Budget (see ction 9, Federal Government s and Employment).

imental units—The governmen- ture of the United States includes, ion to the federal government and

the states, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." In 1997, 87,453 local governments were identified by the census of governments (see Tables 413-415). As defined by the census, governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which states, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, state institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances—The financial statistics relate to government fiscal years ending June 30 or at some date within the 12 previous months. The following governments are exceptions and are included as though they were part of the June 30 group; ending September 30, the state governments of Alabama and Michigan, the District of Columbia, and Alabama school districts; and ending August 31, the state government of Texas and Texas school districts. New York State ends its fiscal year on March 31. The federal government ended the fiscal year June 30 until 1976 when its fiscal year, by an act of Congress, was revised to extend from Oct. 1 to Sept. 30. A 3-month quarter (July 1 to Sept. 30, 1976) bridged the transition.

Nationwide government finance statistics have been classified and presented in

terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure utilized by individual governments.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. *General government* comprises all activities except utilities, liquor stores, and insurance trusts. Utilities include government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 states and by local governments in 6 states. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by the federal, state, and local governments.

Data for cities or counties relate only to municipal or county and their dependent agencies and do not include amounts for other local governments in the same geographic location. Therefore, expenditure figures for "education" do not include spending by the separate school districts which administer public schools within most municipal or county areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and

other functions to a lesser degree also have an important effect upon reported amounts of city or county expenditure, revenue, and debt.

Employment and payrolls—These data are based mainly on mail canvassing of state and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (unless otherwise specified) part-time as well as full-time personnel. Beginning 1986, statistics for full-time equivalent employment have been computed with a formula using hours worked by part-time employees. A payroll based formula was used prior to 1985. Full-time equivalent employment statistics were not computed for 1985. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

State and local	512.4	542.4	548.4	557.7	566.8	573.8	584.9	598.9

¹ Represents zero. ² Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures. ³ Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government. ⁴ Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addenda. ⁵ Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return.

0 represents zero. NA Not available. ¹ Estimated. ² Includes bonds not shown separately. ³ Includes funds adjustments, and balances from previous year. ⁴ May or may not include budget stabilization fund transfers, or state accounting practices. ⁵ Resources less expenditures. Total excludes Puerto Rico. ⁶ Ending balance in a budget stabilization fund.

Source: Expenditures by fund from National Association of State Budget Officers, Washington, DC, 2001 State Expenditure and State General Fund from National Governors' Association and NASBO, Fiscal Survey of the States, semi-annual.

No. 428. State Governments—Summary of Finances: 1990 to 2000

[In millions of dollars (673,119 represents \$673,119,000,000), except where indicated. For fiscal year ending in year shown; see text; this section]

Section 9

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the federal government. The fiscal data cover taxes, other receipts, outlays, and debt. The principal sources of fiscal data are the *Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the Department of the Treasury's *United States Government Annual Report* and its *Appendix*. Detailed data on tax returns and collections are published annually by the Internal Revenue Service. The personnel data relate to staffing and payrolls. They are published by the Office of Personnel Management and the Bureau of Labor Statistics. The primary source for data on public lands is *Public Land Statistics*, published annually by the Bureau of Land Management, Department of the Interior. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*.

Budget concept—Under the unified budget concept, all federal monies are included in one comprehensive budget. These monies comprise both federal funds and trust funds. Federal funds are derived mainly from taxes and borrowing and are not restricted by law to any specific government purpose. Trust funds, such as the Unemployment Trust Fund, collect certain taxes and other receipts for use in carrying out specific purposes or programs in accordance with the terms of the trust agreement or statute. Fund balances include both cash balances with Treasury and investments in U.S. securities. Part of the balance is obligated, part unobligated. Prior to 1985, the budget totals, under provisions of law, excluded some federal activities—including the Federal Financing Bank, the Postal Service, the Synthetic Fuels Corporation, and the lending activities of the Rural Electrification Administration. The Balanced Budget

and Emergency Deficit Control Act of 1985 (P.L. 99-177) repealed the off-budget status of these entities and placed social security (federal old-age and survivors insurance and the federal disability insurance trust funds) off-budget. Though social security is now off-budget and, by law, excluded from coverage of the congressional budget resolutions, it continues to be a federal program.

Receipts arising from the government's sovereign powers are reported as governmental receipts; all other receipts, i.e., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis (i.e., outlays are recorded at the time the checks to pay bills are issued).

Debt concept—For most of U.S. history, the total debt consisted of debt borrowed by the Treasury (i.e., public debt). The present debt series, includes both public debt and agency debt. The *gross federal debt* includes money borrowed by the Treasury and by various federal agencies; it is the broadest generally used measure of the federal debt. *Total public debt* is covered by a statutory debt limitation and includes only borrowing by the Treasury.

Treasury receipts and outlays—All receipts of the government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the federal government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Budget receipts such as taxes, customs duties, and miscellaneous receipts, which are collected by government agencies,

and outlays represented by checks issued and cash payments made by disbursing officers as well as government agencies are reported in the *Daily Treasury Statement of Receipts and Outlays of the United States Government* and in the Treasury's *United States Government Annual Report* and its *Appendix*. These deposits in and payments from accounts maintained by government agencies are on the same basis as the unified budget.

The quarterly *Treasury Bulletin* contains data on fiscal operations and related Treasury activities, including financial statements of government corporations and other business-type activities.

Income tax returns and tax collections—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner and Chief Counsel of the Internal Revenue Service* gives a detailed account of tax collections by kind of tax and by regions, districts, and states. The agency's annual *Statistics of Income* reports present detailed data from individual income tax returns and corporation income tax returns. The quarterly *Statistics of Income Bulletin* has, in general, replaced the supplemental *Statistics of Income* publications which presented data on such diverse subjects as tax-exempt organizations, unincorporated businesses, fiduciary income tax and estate tax returns, sales of capital assets by individuals, international income and taxes reported by corporations and individuals, and estate tax wealth.

Employment and payrolls—The Office of Personnel Management collects employment and payroll data from all departments and agencies of the federal government, except the Central Intelligence Agency, the National Security Agency, and the Defense Intelligence Agency. Employment figures represent the number of persons who occupied civilian

positions at the end of the report month shown and who are paid for personal services rendered for the federal government, regardless of the nature of appointment or method of payment. Federal payrolls include all payments for personal services rendered during the report month and payments for accumulated annual leave of employees who separate from the service. Since most federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap.

Federal employment and payroll figures are published by the Office of Personnel Management in its *Federal Civilian Workforce Statistics—Employment and Trends*. It also publishes biennial employment data for minority groups, data on occupations of white- and blue-collar workers, and data on employment by geographic area; reports on salary and wage distribution of federal employees are published annually. General schedule is primarily white-collar; wage system primarily blue-collar. Data on federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings* and by the U.S. Census Bureau in its annual *Public Employment*.

Public lands—The data on applications, entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of federal public lands to nonfederal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed (i.e., allowed). Some types of applications, however, are not reported until issuance of the final certificate, which passes equitable title to the land to the applicant.

Io. 449. Federal Budget—Receipts, Outlays, and Debt: 1960 to 2002

in billions of dollars (\$2.5 represents \$2,500,000,000), except percent. For fiscal years ending in year shown; see text, section 8, State and Local Government Finances and Employment. The Balanced Budget and Emergency Deficit Control Act of 1985 put all the previously off-budget federal entities into the budget and moved social security off-budget. Minus sign (-) indicates deficit or decrease]

No. 463. Tax Returns Filed—Examination Coverage: 1990 to 2000

[In thousands (103,251 represents 103,251,000, except as indicated. Return classification as Schedule C or C-EZ (nonfarm sole proprietorships) or Schedule F (farm proprietorships) for audit examination purposes was based on the largest source of income on the return and certain other characteristics. Therefore, some returns with business activity are reflected in the nonbusiness individual income tax return statistics in the table below (and vice versa), so that the statistics for the number of returns with Schedule C is not comparable to the number of nonfarm sole proprietorship returns in Table 702]

Year and type of return	Returns examined						Average tax and penalty per return (dollars)

No. 470. Federal Individual Income Tax—Tax Liability and Effective and Marginal Tax Rates for Selected Income Groups: 1990 to 1999

[Refers to income after exclusions. Effective rate represents tax liability divided by stated income. The marginal tax rate is the percentage of the first additional dollar of income which would be paid in income tax. Computations assume the low income allowance, standard deduction, zero bracket amount, or itemized deductions equal to 10 percent of adjusted gross income, whichever is greatest. Excludes self-employment tax]

Adjusted gross income	1990	1994	1995	1996	1997	1998	1999

¹ An installation may consist of land, buildings, other structures and facilities, or combinations of them. Examples are national forest, national park, a hydroelectric project, a single office or warehouse building, and an unimproved site. ² Covers cost of land, buildings, and structures and facilities. All properties are reported at actual or estimated cost without considering depreciation, obsolescence, or economic changes in value.

Section 10

National Defense and Veterans Affairs

tion presents data on national and its human and financial tive and reserve military persons, equipment, and aircraft; and sponsored programs and veterans. The principal sources of ta are the annual *Selected Man-istics* and the *Atlas/Data for the United States and Areas* issued by the Office of the r of Defense; *Annual Report of y of Veterans Affairs*, *Department ins Affairs*, and *The Budget of the tates Government*, Office of Man- and Budget. For more data on ures, personnel, and ships, see 10.

Department of Defense (DOD)—The ent of Defense is responsible for g the military forces of the United Includes the Office of the Secre-ense, the Joint Chiefs of Staff, r, the Navy, the Air Force, and the agencies. The President serves as der in Chief of the Armed Forces; 1, the authority flows to the Sec-Defense and through the Joint : Staff to the commanders of uni-pecified commands (e.g., U.S. Command).

Components—Reserve person-e Armed Forces consist of the tional Guard, Army Reserve, ervice, Marine Corps Reserve, Air Guard, Air Force Reserve, and ard Reserve. They provide ersonnel available for active duty med Forces in time of war or emergency and at such other authorized by law.

onal Guard has dual federal-state bilities and uses jointly provided nt, facilities, and budget support.

The President is empowered to mobilize the National Guard and to use such of the Armed Forces as he considers necessary to enforce federal authority in any state.

The ready reserve includes selected reservists who are intended to assist active forces in a war and the individual ready reserve who, in a major war, would be used to fill out active and reserve units and later would be a source of combat replacements; a portion of the ready reserve serves in an active status. The standby reserve cannot be called to active duty unless the Congress gives explicit approval. The retired reserve represents a low potential for mobilization.

Department of Veterans Affairs (VA)—The Department of Veterans Affairs administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the beneficia-ries of deceased members. Veterans ben-efits available under various acts of Con-gress include compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation, educa-tion, and training; home loan insurance; life insurance; health care; special hous-ing and automobiles or other convey-ances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war. Since these benefits are legislated by Con-gress, the dates they were enacted and the dates they apply to veterans may be different from the actual dates the con-flicts occurred.

VA estimates of veterans cover all persons with active duty service during periods of war or armed conflict and until 1982 include those living outside the United States.

No. 484. National Defense Outlays and Veterans Benefits: 1960 to 2003

[For fiscal year ending in year shown; see text, Section 8, State and Local Government Finances and Employment. Includes outlays of Department of Defense, Department of Veterans Affairs, and other agencies for activities primarily related to national defense and veterans programs. For explanation of average annual percent change, see Guide to Tabular Presentation. Minus sign (-) indicates decline]

¹ Military awards for supplies, services, and construction. Net value of contracts of over \$25,000 for work in each state and DC. Figures reflect impact of prime contracting on state distribution of defense work. Often the state in which a prime contractor is located in is not the state where the subcontracted work is done. See also headnote, Table 487. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded.

No. 501. Military Reserve Personnel: 1990 to 2001

[As of end of fiscal year. The Ready Reserve includes the Selected Reserve which is scheduled to augment active forces during times of war or national emergency, and the Individual Ready Reserve which, during times of war or national emergency, would be used to fill out Active, Guard and Reserve units, and which would also be a source for casualty replacements; Ready Reservists serve in an active status (except for the Inactive National Guard - a very small pool within the Army National Guard). The Standby Reserve cannot be called to active duty except in situations where those members are the only available assets with specific required specialties. The Retired Reserve is categorized into three groups, based on age and length of retirement, prioritized for mobilization purposes.

Reserve status and branch of service	1980	1995	1997	1999	1998	2000	2001
Total reserves ¹	1,688,674	1,674,164	1,474,167	1,382,348	1,316,994	1,276,843	1,250,155

- Represents or rounds to zero. NA Not available. ¹ Force levels shown are for the ends of the fiscal years in question. The actual force levels for FY 2000 and FY 2001 will depend on future decisions. ² Number of operational missiles. Not in maintenance or overhaul status. ³ PAI-Primary aircraft inventory. PAI excludes backup and attrition reserve aircraft as well as aircraft in depot maintenance. Total inventory counts will be higher than the PAI figures given here. ⁴ B-1 are accountable under START I but will not be accountable under START II. ⁵ PMAI = Primary mission aircraft inventory for active and reserve components. The numbers shown reflect only combat support and industrial funded PMAI aircraft and not developments/test or training aircraft. ⁶ Includes 37 KC-10s allocated to an airlift code. ⁷ Does not include Department of the Navy aircraft. ⁸ Includes fast sea lift (FSS), afloat prepositioning, and common-user (charter) ships, plus (through FY 1998) aviation support ships. For FY 1999 on, includes LMSR and ready reserve force (RRF) ships tendered to the Military sealift command (MSC). FSS and LMSR vessels are maintained in a reserve, 4-day ready status. ⁹ The RRF includes vessels assigned to 4-, 5-, 10-, or 20-day reactivation readiness groups. The ship counts shown exclude RRF vessels tendered to the MSC. Inventory figures for FY 1999, FY 2000, and FY 2001 include aviation support ships.

Section 11

Social Insurance and Human Services

n presents data related to gov-
expenditures for social insur-
uman services; governmental
or old-age, survivors, disabil-
lth insurance (OASDI); gov-
employee retirement; private
ns; government unemploy-
emporary disability insurance;
plemental security income
nd aid to the needy; child and
re services; and federal food
Also included here are selected
rkers compensation and voca-
bilitation, child support, child
y contributions, and philan-
sts and foundations.

ial source for these data is the
rity Administration's *Annual
Supplement to the Social Secu-
y* which presents current data
f the programs.

**Insurance under the Social
Act**—Programs established by
ecurity Act provide protection
ge loss resulting from retire-
nged disability, death, or
nent, and protection against
medical care during old age
ity. The federal OASDI program
onthly benefits to retired or
sured workers and their depen-
o survivors of insured work-
eligible, a worker must have
ified period of employment in
DI taxes were paid. The age of
or full retirement benefits has
ars old for many years. How-
ersons born in 1938 or later
ll gradually increase until it
e 67 for those born after 1959.
enefits may be obtained as
e 62. The worker's spouse is
same limitations. Survivor ben-
yable to dependents of
sured workers. Disability ben-
yable to an insured worker
retirement age with a pro-
bability and to the disabled
pendents on the same basis as

dependents of retired workers. Disability
benefits are provided at age 50 to the dis-
abled widow or widower of a deceased
worker who was fully insured at the time
of death. Disabled children, aged 18 or
older, of retired, disabled, or deceased
workers are also eligible for benefits. A
lump sum benefit is generally payable on
the death of an insured worker to a
spouse or minor children. For information
on the medicare program, see Section 3,
Health and Nutrition.

Retirement, survivors, disability, and hos-
pital insurance benefits are funded by a
payroll tax on annual earnings (up to a
maximum of earnings set by law) of
workers, employers, and the self-
employed. The maximum taxable earn-
ings are adjusted annually to reflect
increasing wage levels (see Table 517).
Effective January 1994, there is no dollar
limit on wages and self-employment
income subject to the hospital insurance
tax. Tax receipts and benefit payments
are administered through federal trust
funds. Special benefits for uninsured per-
sons; hospital benefits for persons aged
65 and over with specified amounts of
social security coverage less than that
required for cash benefit eligibility; and
that part of the cost of supplementary
medical insurance not financed by contri-
butions from participants are financed
from federal general revenues.

Unemployment insurance is presently
administered by the U.S. Employment
and Training Administration and each
state's employment security agency. By
agreement with the U.S. Secretary of
Labor, state agencies also administer
unemployment compensation for eligible
ex-military personnel and federal employ-
ees. Under state unemployment insurance
laws, benefits related to the individual's
past earnings are paid to unemployed eli-
gible workers. State laws vary concerning
the length of time benefits are paid and
their amount. In most states, benefits are
payable for 26 weeks and, during periods

of high unemployment, extended benefits are payable under a federal-state program to those who have exhausted their regular state benefits. Some states also supplement the basic benefit with allowances for dependents.

Unemployment insurance is funded by a federal unemployment tax levied on the taxable payrolls of most employers. Taxable payroll under the federal act and 12 state laws is the first \$7,000 in wages paid each worker during a year. Forty-one states have taxable payrolls above \$7,000. Employers are allowed a percentage credit of taxable payroll for contributions paid to states under state unemployment insurance laws. The remaining percent of the federal tax finances administrative costs, the federal share of extended benefits, and advances to states. About 97 percent of wage and salary workers are covered by unemployment insurance.

Retirement programs for government employees—The Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS) are the two major programs providing age and service, disability, and survivor annuities for federal civilian employees. In general, employees hired after December 31, 1983, are covered under FERS and the social security program (OASDHI), and employees on staff prior to that date are members of CSRS and are covered under Medicare. CSRS employees were offered the option of transferring to FERS during 1987 and 1998. There are separate retirement systems for the uniformed services (supplementing OASDHI) and for certain special groups of federal employees. State and local government employees are covered for the most part by state and local retirement systems similar to the federal CSRS. In many jurisdictions these benefits supplement OASDHI coverage.

Workers' compensation—All states provide protection against work-connected injuries and deaths, although some states exclude certain workers (e.g., domestic help). Federal laws cover federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Social Security Administration and the Department of

Labor administer "black lung" benefits programs for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Specified occupational diseases are compensable to some extent. In most states, benefits are related to the worker's salary. The benefits may or may not be augmented by dependent allowances or automatically adjusted to prevailing wage levels.

Income support—Income support programs are designed to provide benefits for persons with limited income and resources. The Supplemental Security Income (SSI) program and Temporary Assistance for Needy Families (TANF) program are the major programs providing monthly payments. In addition, a number of programs provide money payments in-kind benefits for special needs or purposes. Several programs offer food and nutritional services. Also, various federal state programs provide energy assistance, public housing, and subsidized housing to individuals and families with low incomes. General assistance may also be available at the state or local level.

The SSI program, administered by the Social Security Administration, provides income support to persons aged 65 or older and blind or disabled adults and children. Eligibility requirements and federal payment standards are nationally uniform. Most states supplement the basic SSI payment for all or selected categories of persons.

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 contained provisions that replaced the Aid to Families With Dependent Children (AFDC), Job Opportunities and Basic Skills (JOBS), and Emergency Assistance programs with the Temporary Assistance for Needy Families block grant program. The law contains strong work requirements, comprehensive child support enforcement, support for families moving from welfare to work, and other features. The TANF became effective as soon as each state submitted a complete plan implementing TANF, but no later than July 1, 1997. The AFDC program provided cash assistance based on need, income, resources, and family size.

Federal food stamp program—Under the food stamp program, single persons and those living in households meeting nationwide standards for income and assets may receive coupons redeemable for food at most retail food stores. The monthly amount of coupons a unit receives is determined by household size and income. Households without income receive the determined monthly cost of a nutritionally adequate diet for their household size. This amount is updated to account for food price increases. Households with income receive the difference between the amount of a nutritionally adequate diet and 30 percent of their income, after certain allowable deductions.

To qualify for the program, a household must have less than \$2,000 in disposable assets (\$3,000 if one member is aged 60 or older), gross income below 130 percent of the official poverty guidelines for the household size, and net income below 100 percent of the poverty guidelines. Households with a person aged 60 or older or a disabled person receiving SSI, social security, state general assistance, or veterans' disability benefits may have gross income exceeding 130 percent of the poverty guidelines. All households in which all members receive TANF or SSI are categorically eligible for food stamps without meeting these income or resource criteria. Households are certified for varying lengths of time, depending on their income sources and individual circumstances.

Health and welfare services—Programs providing health and welfare services are aided through federal grants to states for child welfare services, vocational rehabilitation, activities for the aged, maternal and child health services, maternity and infant care projects, comprehensive health services, and a variety of public health activities. For information about the medicaid program, see Section 3, Health and Nutrition.

Noncash benefits—The U.S. Census Bureau annually collects data on the characteristics of recipients of noncash (in-kind) benefits to supplement the collection of annual money income data in the Current Population Survey (see text, Section 1, Population, and Section 14, Prices). Noncash benefits are those benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. As for money income, the data for noncash benefits are for the calendar year prior to the date of the interview. The major categories of noncash benefits covered are public transfers (e.g., food stamps, school lunch, public housing, and medicaid) and employer or union-provided benefits to employees.

Statistical reliability—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to HHS and Census Bureau data, see Appendix III.

No. 510. Government Transfer Payments to Individuals—Summary: 1970 to 2000

[In billions of dollars (69.3 represents \$69,300,000,000)]

Other payments to individuals ¹⁰	1,770	1,622	2,105	1,669	1,888	2,050

¹ Consists largely of temporary disability payments, pension benefit guaranty payments, and black lung pay.
² Consists of medicaid and other medical vendor payments.
³ Consists of payments made under the Tricare Managed Care Program (formerly called CHAMPUS) for the medical care of dependents of active duty military personnel and of retired military personnel and their dependents at nonmilitary medical facilities.
⁴ Through 1995, consists of emergency assistance and families with dependent children. Beginning with 1998, consists of benefits—generally known as temporary assistance for families—provided under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. For 1996-97, consists of payments under all three of these programs.
⁵ Consists largely of general assistance, expenditures for food and supplemental program for women, infants, and children; refugee assistance; foster home care and adoption assistance; income tax credits; and energy assistance.
⁶ Consists of trade readjustment allowance payments, Redwood Park payments, public service employment benefit payments, and transitional benefit payments.
⁷ Consists largely of readjustment benefit payments, educational assistance to spouses and children of disabled or deceased veterans, payments to paraplegics, and payments for autos and conveyances for disabled veterans.
⁸ Consists largely of state and local government payments to veterans.
⁹ Excludes veterans. Consists largely of federal fellowship payments (National Science Foundation fellowships and traineeships, subsistence payments to state maritime academy cadets, and other federal fellowships), a subsidy on higher education loans, basic educational opportunity grants, and Job Corps payments.
¹⁰ Consists largely of Indian Affairs payments, education exchange payments, Alaska Permanent Fund dividend payments, compensation of public safety officers, compensation of victims of crime, disaster relief payments, compensation for Japanese internment, and other special payments to individuals.

Source: U.S. Census Bureau, "Table PINC-09. Source of Income in 2000—Number With Income and Mean Specified Type in 2000 of People 15 Years Old and Over, by Race, Hispanic Origin and Sex"; published 10 Decemr <<http://ferret.bls.census.gov/macro/032001/perinc/new09000.htm>>.

No. 514. Households Receiving Means-Tested Noncash Benefits: 1980 to

[In thousands (82,368 represents 82,368,000), except percent. Households as of March of following year. Civil noninstitutional population, including persons in the Armed Forces living off post or with their families on post. A means benefit program requires that the household's income and/or assets fall below specified guidelines in order to qualify for benefits. There are general trends toward underestimation of noncash beneficiaries. Households are classified according to type of family or nonfamily household; for explanation of poverty level, see text, Section 13, Income, Expenditures, and Wealth for 1980 and 1990 based on 1980 census population controls; beginning 1995, based on 1990 census population controls on Current Population Survey; see text, Section 1, Population, and Appendix III]

Type of benefit received	2000						
	1980	1990	1995	1999	Below poverty level		
					Total	Number	Percent of total
Total households	82,368	94,312	99,827	104,705	106,418	11,881	100
Receiving at least one noncash benefit	14,266	16,098	21,148	18,996	20,131	6,873	58
Not receiving cash public assistance	7,860	8,819	13,335	12,999	14,465	4,059	34
Receiving cash public assistance ¹	6,407	7,279	7,813	5,997	5,667	2,814	24
Total households receiving—							
Food stamps	6,769	7,163	8,388	5,738	5,563	3,501	30
School lunch	5,532	6,252	8,607	7,258	7,185	2,704	23
Public housing	2,777	4,339	4,846	4,447	4,689	2,397	20
Medicaid	8,287	10,321	14,111	13,477	14,328	5,264	44

¹ Households receiving money from aid to families with dependent children program (beginning 1999, temporary for needy families program), supplemental security income program or other public assistance programs.

Means-Tested Noncash Benefits Received by Households, by Selected Characteristics, Race and Hispanic Origin, and Poverty Status: 2000"; published 10 December 2001; <<http://ferret.bls.gov/macro/032001/noncash/nc1000.htm>> and *Current Population Reports*, P-60 reports.

No. 515. Government Expenditures for Income-Tested Benefits by Type of Benefit: 1980 to 2000

In millions of dollars (106,512 represents \$106,512,000,000). For years ending September 30. Programs covered provide cash, goods, or services to persons who make no payment and render no service in return. In case of many programs, including family medical care, food and housing programs, job and training programs, and some educational programs, not all expenditures are for the lowest income group. Constant dollar figures are based on the Consumer Price Index for all Urban Consumers.

Level of government and year	Total spending		Constant (2000) dollars

No. 516. Cash and Noncash Benefits for Persons With Limited Income: 1999 and 2000

(For years ending September 30, except as noted (408,405 represents \$408,405,000,000). Programs covered provide cash, goods, or services to persons who make no payment and render no service in return. In case of many programs, including family cash welfare, food and housing programs, job and training programs and some educational programs, some recipients must work or study. Most of the programs base eligibility on individual, household, or family income, but some use group or area income tests; and a few offer help on the basis of presumed need)

includes deposits by states and deductions for refund of estimated employee-tax overpayment. Beginning in 1990, includes tax on contributions on deemed wage credits for military service in 1957 and later. Includes taxation of benefits beginning in 1990, includes interest on advance tax transfers. Beginning 1990, includes interest on reimbursement for medical checks. ³ Includes payments for vocational rehabilitation services furnished to disabled persons receiving benefits if their disabilities. Beginning in 1990, amounts reflect deductions for unnegotiated benefit checks.

524. Private Pension Plans—Summary by Type of Plan: 1990 to 1998

1998 represents 712,300. "Pension plan" is defined by the Employee Retirement Income Security Act (ERISA) as "any plan, contract, or program which was heretofore or is hereafter established or maintained by an employer or an employee organization, or any trust, to the extent that such plan (a) provides retirement income to employees, or (b) results in a deferral of income by employees for periods extending to the termination of covered employment or beyond, regardless of the method of calculating the contributions made to the plan, the method of calculating the benefits under the plan, or the method of distributing benefits from the plan." A defined benefit plan provides a definite benefit formula for calculating benefit amounts - such as a flat amount per year service or a percentage of salary times years of service. A defined contribution plan is a pension plan in which the contributions are made to an individual account for each employee. The retirement benefit is dependent upon the account balance at retirement. The balance depends upon amounts contributed, investment experience, and, in the case of profit sharing plans, amounts which may be allocated to the account due to forfeitures by terminating employees. Employee Stock Ownership Plans (ESOP) and 401(k) plans (see Table 527) are included among defined contribution plans. Data are based on Form 5500 series reports filed with the Internal Revenue Service.

Item	Unit	Total				Defined contribution plan				Defined benefit plan			
		1990	1995	1997	1998	1990	1995	1997	1998	1990	1995	1997	1998

¹ Excludes all plans covering only one participant. ² Includes double counting of workers in more than one plan. ³ Total participants include active participants, vested separated workers, and retirees. ⁴ Any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. Includes any nonvested former employees who have not incurred breaks in service. ⁵ Includes both employer and employee contributions. ⁶ Benefits paid directly from trust and annuity payments made from plan to insurance carriers. Excludes benefits paid directly by insurance carriers.

525. Percent Of Workers Participating In Retirement Benefits by Worker Characteristics: 1999

Based on National Compensation Survey, a sample survey of 3,168 private industry establishments of all sizes, representing over 10 million workers; see Appendix III. See also Table 620.

Characteristic	Total			Characteristic			
	Total	Defined benefit	Defined contribution	Total	Defined benefit	Defined contribution	
Total	48	21	36	Full time ¹	56	25	42
Seasonal, technical, and clerical employees	69	29	56	Part time ¹	21	9	14
Technical and sales employees	45	17	34	Union ²	79	70	39
Blue-collar and service employees	42	21	28	Nonunion ²	44	16	35

¹ Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. ² Union workers are those whose wages are determined through collective bargaining.

No. 533. Workers' Compensation Payments by State: 1990 to 2000

[In millions of dollars (38,238 represents \$38,238,000,000). Calendar-year data, except fiscal-year data for federal civilian and other programs and for some states with state funds. Payments represent compensation and medical benefits and include insurance losses paid by private insurance carriers (compiled from state workers' compensation agencies and A.M. Best Co.); disbursements of state funds (compiled from the A.M. Best Co. and state workers' compensation agencies); and self-insurance payments, based on information from the National Association of Insurance Commissioners and the source's estimates. Includes benefit payments under Longshore and Harbor Workers' Compensation Act for states in which such payments are made]

Child Support Enforcement Program—Caseload and Collections: 1990 to 2001

Sept. 30 (12,796 represents 12,796,060). Includes Puerto Rico, Guam, and the Virgin Islands. The child support program locates absent parents, establishes paternity of children born out-of-wedlock, and establishes and orders. By law, these services are available to all families that need them. The program is operated at the state level but 68 percent of administrative costs are paid by the federal government. Child support collected for living Temporary Assistance for Needy Families (TANF) goes to the family to help it remain self-sufficient. Most of collected on behalf of TANF families goes to federal and state governments to offset TANF payments. Based on state agencies. Minus sign (-) indicates net outlay]

No. 541. Federal Food Programs: 1990 to 2001

[20.1 represents 20,100,000. For years ending Sept. 30. Program data include Puerto Rico, Virgin Islands, Guam, American Samoa, Northern Marianas, and the former Trust Territory when a federal food program was operated in these areas. Participation data are average monthly figures except as noted. Participants are not reported for the commodity distribution programs. Cost data are direct federal benefits to recipients; they exclude Federal administrative payments and applicable state and local contributions. Federal costs for commodities and cash-in-lieu of commodities are shown separately from direct cash benefits for those programs receiving both]

2000	7,335	53.9	21.0	27.5	17,091	51.3	10.0

¹ Persons 60 years old and over. ² Beginning 1995, disabled households are defined as households with at least one member under age 65 who received SSI, or at least one member age 18 to 61 who received Social Security, veterans benefits, or other government benefits as a result of a disability. For years prior to 1995, disabled households are defined as households with SSI but no members over age 59. The substantial increase in the percentage of households with a disabled member between 1994 and 1995 is due in part to the change in the definition of disabled households. Using the previous definition, 13.3 percent of households included a disabled person in fiscal year 1995.

No. 544. Food Stamp Households and Participants—Summary: 2000

[For year ending September 30. Based on a sample of 46,963 households from the Food Stamp Quality Control System]

Household type and income source	Households		Age, sex, race, and Hispanic origin	Participants	
	Number (1,000)	Percent		Number (1,000)	Percent
Total	7,335	100.0	Total¹	17,091	100.0
With children	3,955	53.9	Children	8,765	51.3
Single-parent households	2,704	36.9	Under 5 years old	2,848	16.7
Married-couple households	573	7.8	5 to 17 years old	5,919	34.6
Other	676	9.2	Adults	8,325	48.7
With elderly	1,542	21.0	18 to 35 years old	3,398	19.9
Living alone	1,226	16.7	36 to 59 years old	3,228	18.9
Not living alone	316	4.3	60 years old and over	1,702	10.0
Disabled	2,017	27.5	Male	6,891	40.3
Living alone	1,154	15.6	Female	10,198	59.7
Not living alone	863	11.8	White, non-Hispanic	6,837	40.0
Earned income	1,993	27.2	Black, non-Hispanic	6,123	35.8
Wages and salaries	1,857	25.3	Hispanic	3,168	18.5
Unearned income	5,775	78.7	Asian	591	3.5
TANF ²	1,891	25.8	Native American	290	1.7
Supplemental Security Income	2,324	31.7	Other	83	0.5
Social Security	1,870	25.5			
No income	617	8.4			

¹ Includes persons of unknown age not shown separately. ² Temporary Assistance for Needy Families (TANF) program.

Section 12

Labor Force, Employment, and Earnings

ion presents statistics on the
e; its distribution by occupation
stry affiliation; and the supply of,
for, and conditions of labor. The
rce of these data is the Current
in Survey (CPS) conducted by the
us Bureau for the Bureau of
tistics (BLS). Comprehensive
and current data are available
BLS Internet site <[http://www.
:ps/home.htm](http://www.bls.gov/home.htm)>. These data are
f on a current basis by the BLS
publication *Employment and*
. Detailed data on the labor force
available from the Census
ecennial census of population.

Field data—Most statistics in this
re obtained by two methods:
d interviews or questionnaires
rts of establishment payroll
Each method provides data
e other cannot suitably supply.
n characteristics, for example,
y obtainable only from the
d survey, while detailed indus-
ifications can be readily derived
1 establishment records.

id data are obtained from a
sample survey of the population.
s used to gather data for the cal-
ek including the 12th of the
id provides current comprehen-
on the labor force (see text, Sec-
upulation). The CPS provides
on on the work status of the
in without duplication since each
classified as employed, unem-
r not in the labor force.
f persons holding more than one
ounted only once, according to
: which they worked the most
ring the survey week.

quarterly, and annual data from
re published by the Bureau of
tistics in *Employment and Earn-*
a presented include national
the number of persons in the
bor force by sex, race, Hispanic

origin, and age; the number employed;
hours of work; industry and occupational
groups; and the number unemployed, rea-
sons for, and duration of unemployment.
Annual data shown in this section are
averages of monthly figures for each cal-
endar year, unless otherwise specified.

The CPS also produces annual estimates
of employment and unemployment for
each state, 50 large metropolitan statisti-
cal areas, and selected cities. These esti-
mates are published by BLS in its annual
Geographic Profile of Employment and
Unemployment. More detailed geographic
data (e.g., for counties and cities) are pro-
vided by the decennial population cen-
suses.

Data based on establishment records are
compiled by BLS and cooperating state
agencies as part of an ongoing Current
Employment Statistics program. Survey
data, gathered monthly from a sample of
employers through electronic interview-
ing or mail questionnaires or electronic
interviewing, are supplemented by data
from other government agencies and
adjusted at intervals to data from govern-
ment social insurance program reports.
The estimates exclude self-employed per-
sons, private household workers, unpaid
family workers, agricultural workers, and
the Armed Forces. In March 2001, report-
ing establishments employed 6 million
manufacturing workers (33 percent of the
total manufacturing employment at the
time), 18 million workers in private non-
manufacturing industries (19 percent of
the total in private nonmanufacturing),
and 15 million federal, state, and local
government employees (73 percent of
total government).

The establishment survey counts workers
each time they appear on a payroll during
the reference period (as with the CPS,
the week including the 12th of the month).
Thus, unlike the CPS, a person with two
jobs is counted twice. The establishment
survey is designed to provide detailed

industry information for the nation, states, and metropolitan areas on non-farm wage and salary employment, average weekly hours, and average hourly and weekly earnings. Establishment survey data also are published in *Employment and Earnings*. Historical national data are available on the site <<http://www.bls.gov/ces/>>. Historical data for states and metropolitan areas are available on the site <<http://www.bls.gov/sae/>>.

In June 2000, BLS began to phase in a comprehensive sample redesign of the establishment survey, changing from a quota sample to a probability-based sample. Probability-based sample estimates for the wholesale trade industry were published at that time. In June 2001, estimates for the mining, construction, and manufacturing industries were published under the new sample design for the first time. In June 2002, estimates for the transportation and public utilities; retail trade; and finance, insurance, and real estate industries were published under the new sample design for the first time. The sample redesign will be completed in June 2003 with the publication of estimates for the services industry under the new design. More information on the sample redesign appears in "BLS Establishment Estimates Revised to Incorporate March 2001 Benchmarks" in the June 2002 issue of *Employment and Earnings*, as well as the Establishment Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings*.

Labor force—According to the CPS definitions, the civilian labor force comprises all civilians in the noninstitutional population 16 years and over classified as "employed" or "unemployed" according to the following criteria: Employed civilians comprise (a) all civilians, who, during the reference week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise and (b) all civilians who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, weather conditions, vacation, labor-management dispute, etc.) whether they were paid for the time off or

were seeking other jobs. Unemployed persons comprise all civilians who had no employment during the reference week, who made specific efforts to find a job within the previous 4 weeks (such as applying directly to an employer or to a public employment service or checking with friends) and who were available for work during that week, except for temporary illness. Persons on layoff from a job and expecting recall also are classified as unemployed. All other civilian persons, 16 years old and over, are "not in the labor force."

Beginning in 1982, changes in the estimation procedures and the introduction of 1980 census data caused substantial increases in the population and estimates of persons in all labor force categories. Rates on labor force characteristics, however, were essentially unchanged. In order to avoid major breaks in series, some 30,000 labor force series were adjusted back to 1970. The effect of the 1982 revisions on various data series and an explanation of the adjustment procedure used are described in "Revisions in the Current Population Survey in January 1982," in the February 1982 issue of *Employment and Earnings*. The revisions did not, however, smooth out the breaks in series occurring between 1972 and 1979, and data users should make allowances for them in making certain data comparisons.

Beginning in January 1994, several changes were introduced into the CPS that effect all data comparisons with prior years. These changes include the results of a major redesign of the survey questionnaire and collection methodology, revisions to some of the labor force concepts and definitions, and the introduction of 1990 census population controls, adjusted for the estimated undercount. An explanation of the changes and their effects on the labor force data appears in "Revisions in the Current Population Survey Effective January 1994" in the February 1994 issue of *Employment and Earnings*.

Beginning 1996, 1990 census population controls, adjusted for the estimated undercount, were extended back to January 1990. A discussion of the changes and their effects on the labor force data

n "Revisions In Household Sur- Effective February 1996" in the 196 issue of *Employment and*

g In January 1997, the CPS updated 1990 census-based population controls. g In January 1998, the CPS he introduction of new compos- ition procedures and revised isus-based population controls. nation of the changes and their 1 labor force estimates appear in is in the Current Population Sur- tive January 1998" in the Febru- Issue of *Employment and Earn-*

g In January 1999 and January e CPS reflects the introduction of 990 census-based population that incorporate newly updated on on immigration. An explana- e changes and their effects on e estimates appear in "Revisions rrent Population Survey Effective 999" and "Revisions in the Cur- lation Survey Effective January the February 1999 and February es, respectively, of *Employment ings*.

nd earnings—Average hourly based on establishment data, earnings (i.e., earnings before euctions) and include overtime s; they exclude irregular bonuses e of payments in kind. Hours are hich pay was received. Wages ies from the CPS consist of total eceived for work performed by yee during the income year. It wages, salaries, commissions, e-rate payments, and cash earned before deductions were taxes, bonds, union dues, etc. ho worked 35 hours or more fied as working full time.

Industry and occupational groups—

Industry data derived from the CPS for 1983-91 utilize the 1980 census Indus- trial classification developed from the 1972 SIC. CPS data from 1971 to 1982 were based on the 1970 census classifica- tion system which was developed from the 1967 SIC. Most of the industry catego- ries were not affected by the change in classification.

Establishments responding to the estab- lishment survey are classified according to the *Standard Industrial Classification (SIC) Manual*. Beginning in June 2003, the establishment survey will begin using the 2002 North American Industrial Classifica- tion System (NAICS) to classify establish- ments responding to the survey. See text, Section 15, Business Enterprise, for infor- mation about the SIC manual and NAICS.

The occupational classification system used in the 1980 census and in the CPS for 1983-91, evolved from the 1980 Standard Occupational Classification (SOC) system, first introduced in 1977. Occupational categories used in the 1980 census classification system are so radi- cally different from the 1970 census sys- tem used in the CPS through 1982, that their implementation represented a break in historical data series. In cases where data have not yet been converted to the 1980 classifications and still reflect the 1970 classifications (e.g., Table 615), comparisons between the two systems should not be made. To help users bridge the data gap, a limited set of estimates was developed for the 1972-82 period based on the new classifications. The esti- mates were developed by means of apply- ing conversion factors created by double coding a 20-percent sample of CPS occu- pational records for 6 months during 1981-82. For further details, contact BLS.

Beginning in January 1992, the occupa- tional and industrial classification system used in the 1990 census were introduced into the CPS. (These systems were largely based on the 1980 Standard Occupational Classification and the 1987 Standard Industrial Classification.) There were a few breaks in comparability between the 1980 and 1990 census-based systems, particularly within the "technical, sales, and administrative support" categories.

The most notable changes in industry classification were the shift of several industries from “business services” to “professional services” and the splitting of some industries into smaller, more detailed categories. A number of industry titles were changed as well, with no change in content.

Productivity—BLS publishes data on productivity as measured by output per hour (labor productivity), output per combined unit of labor and capital input (multifactor productivity), and, for manufacturing industries, output per combined unit of capital, labor, energy, materials, and purchased service inputs. Labor productivity and related indexes are published for the business sector as a whole and its major subsectors: nonfarm business, manufacturing, and nonfinancial corporations, and for over 450 specific industries. Multifactor productivity and related measures are published for the private business sector and its major subsectors. Productivity indexes which take into account capital, labor, energy, materials, and service inputs are published for the 18 major industry groups which comprise the manufacturing sector, the utility services industry group, for 108 three-digit SIC manufacturing industries, and railroad transportation. The major sector data are published in the BLS quarterly news release, *Productivity and Costs* and in the annual *Multifactor Productivity Trends* release. Industry productivity measures are published annually in the news releases *Productivity and Costs, Manufacturing Industries, and Productivity and Costs, Services - Producing and Mining Industries*. Detailed information on methods, limitations, and data sources appears in the BLS *Handbook of Methods*, BLS Bulletin 2490 (1997), Chapters 10 and 11.

Unions—As defined here, unions include traditional labor unions and employee associations similar to labor unions. Data on union membership status provided by

BLS are for employed wage and salary workers and relate to their principal job. Earnings by union membership status are usual weekly earnings of full-time wage and salary workers. The information is collected through the Current Population Survey. Collective bargaining settlements data are available for bargaining situations involving 1,000 or more workers in private industry and state and local government.

Work stoppages—Work stoppages include all strikes and lockouts known to BLS which last for at least 1 full day or shift and involve 1,000 or more workers. All stoppages, whether or not authorized by a union, legal or illegal, are counted. Excluded are work slowdowns and instances where employees report to work late or leave early to attend mass meetings or mass rallies.

Seasonal adjustment—Many economic statistics reflect a regularly recurring seasonal movement which can be estimated on the basis of past experience. By eliminating that part of the change which can be ascribed to usual seasonal variation (e.g., climate or school openings and closings), it is possible to observe the cyclical and other nonseasonal movements in the series. However, in evaluating deviations from the seasonal pattern—that is, changes in a seasonally adjusted series—it is important to note that seasonal adjustment is merely an approximation based on past experience. Seasonally adjusted estimates have a broader margin of possible error than the original data on which they are based, since they are subject not only to sampling and other errors, but also are affected by the uncertainties of the adjustment process itself.

Statistical reliability—For discussion of statistical collection, estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau and BLS data, see Appendix III.

I. Employment Status of the Civilian Population: 1960 to 2001

in (117,245 represents 117,245,000), except as indicated. Annual averages of monthly figures. For the civilian noninstitutional 6 years old and over. Based on Current Population Survey; see text, Section 1, Population, and Appendix III]

No. 586. Labor Force Status of Persons With a Work Disability by Age: 2001

[In percent, except as indicated (21,331 represents 21,331,000). As of March. For civilians 16 to 74 who have a condition which prevents them from working or limits the amount of work they can do. Data from the Current Population Survey and subject to sampling error; see text, Section 1, Population, and Appendix III]

Labor force status	Age							
	Total	16 to 24 years old	25 to 34 years old	35 to 44 years old	45 to 54 years old	55 to 64 years old	65 to 69 years old	70 to 74 years old
Number (1,000)	21,331	1,330	2,102	3,569	4,641	5,226	2,123	2,140
In labor force	24.8	37.5	41.7	33.6	30.9	18.0	7.4	5.7
Employed	22.3	28.5	36.9	30.2	28.8	16.7	6.8	5.6
Full-time	14.4	14.4	25.2	21.5	20.2	9.9	2.0	1.7
Not in labor force	75.2	62.5	58.3	66.4	69.1	82.0	92.6	94.3
Unemployment rate	10.0	23.9	11.5	10.0	6.8	7.5	7.2	2.8

No. 587. Persons Not in the Labor Force: 2001

[In thousands (70,050 represents 70,050,000). Annual average of monthly figures. For the civilian noninstitutional population 16 years old and over. Based on the Current Population Survey; see text, Section 1, Population, and Appendix III]

Status and reason	Age			Sex		
	Total	16 to 24 years old	25 to 54 years old	55 years old and over	Male	Female
Total not in the labor force	70,050	12,384	19,495	38,171	26,114	43,885
Do not want a job now ¹	65,483	10,629	17,509	37,345	24,119	41,363
Want a job now	4,567	1,755	1,986	826	1,995	2,572
In the previous year—						
Did not search for a job	2,705	946	1,130	629	1,130	1,575
Did search for a job ²	1,862	809	856	197	865	997
Not available for work now	591	306	248	36	227	364
Available for work now, not looking for work	1,271	503	608	161	638	634
Reason for not currently looking for work:						
Discouraged over job prospects ³	319	105	165	49	191	128
Family responsibilities	131	31	87	13	30	101
In school or training	208	174	32	2	112	96
Ill health or disability	95	16	55	24	45	50
Other ⁴	518	177	268	74	260	258

¹ Includes some persons who are not asked if they want a job. ² Persons who had a job in the prior 12 months must have searched since the end of that job. ³ Includes such things as believes no work available, could not find work, lacks necessary schooling or training, employer thinks too young or old, and other types of discrimination. ⁴ Includes such things as child care and transportation problems.

¹ Mining, not shown separately. ² Mining included with construction.

U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly, May issues. Compiled from data supplied by state agencies.

No. 603. Nonfarm Industries—Employees and Earnings: 1990 to 2001

[Annual averages of monthly figures (100,403 represents 100,403,000). Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for construction, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, Table 601]

¹ Arrangements permitting employees to work at home several days of the workweek.
² A cash payment not directly related to output of the employee or group of employees, such as attendance or profit sharing bonuses.
³ Employers subsidize employees' cost of commuting to and from work via public transportation, company sponsored van pool, discounted subway fares, etc.
⁴ Under flexible benefit plans, employees are able to create a benefits package from among several options; reimbursement accounts are funded by employee pretax contributions to pay for health care or dependent care benefits; premium conversion plans allow union plan participants to pay the required plan premium with pretax dollars.
⁵ Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment.
⁶ Union workers are those whose wages are determined through collective bargaining.
⁷ Includes mining not shown separately.
⁸ For composition of regions, see map, inside front cover.

No. 623. Industries With the Highest Total Case Incidence Rates for Nonfatal Injuries and Illnesses: 1999 and 2000

[Rates per 100 full-time employees. Industries shown are those with the highest rates for 2000. For nonfarm employment data, see Table 603. Rates refer to any occupational injury or illness resulting in (1) lost workday cases, or (2) nonfatal cases without lost workdays. Incidence rates were calculated as: Number of injuries and illnesses divided by total hours worked by all employees during year multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks a year)]

No. 624. Nonfatal Occupational Injury and Illness Incidence Rates: 1999 and 2000

(Rates per 100 full-time employees. For nonfarm employment data, see Table 603. Rates refer to any occupational injury or illness resulting in (1) lost workday cases, or (2) nonfatal cases without lost workdays. Incidence rates were calculated as: Number of injuries and illnesses divided by total hours worked by all employees during year multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks a year))

Section 13

Income, Expenditures, and Wealth

sents data on gross ct (GDP), gross national tional and personal and investment, money , and national and per-e data on income and easure two aspects of the ne aspect relates to the and product accounts ation reflecting the entire nation's economic income the interaction of its nts; the other relates to of money income to fami- als or consumer income.

orce for data on GDP, GNP, rsonal income, gross sav- ent, and fixed reproduc- alth is the *Survey of Cur-* ublished monthly by the mic Analysis (BEA). A revision to the NIPAs was ing in October 1999. Dis- revision appeared in the ber, October, December pril 2000 issues of the *nt Business*. Summary his- ; appeared in the August e *Survey of Current Busi-* Historical data will appear *National Income and 's of the United States*,

ne distribution data are nuses of population and lation Survey (CPS), both U.S. Census Bureau (see nd new Section 31). ncome of families, indi- eholds are presented in *ion Reports, Consumer es*, in print, and many d on the census Web site census.gov/hhes/ ni>.

als' saving and assets are : Board of Governors of rve System in the quar- ds Accounts. The Board

also periodically conducts the *Survey of Consumer Finances*, which presents finan- cial information on family assets and net worth. Detailed information on personal wealth is published periodically by the Internal Revenue Service (IRS) in *SOI Bulletin*.

National income and product—Gross domestic product is the total output of goods and services produced by labor and property located in the United States, valued at market prices. GDP can be viewed in terms of the expenditure categories that comprise its major components—purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production located in the United States. Gross state product (GSP) is the gross market value of the goods and services attributable to labor and property located in a state. It is the state counterpart of the nation's gross domestic product.

In January 1996, BEA replaced its fixed-weighted index as the featured measure of real GDP with an index based on chain-type annual weights. Changes in this measure of real output and prices are calculated as the average of changes based on weights for the current and preceding years. (Components of real output are weighted by price, and components of prices are weighted by output.) These annual changes are “chained” (multiplied together to form a time series that allows for the effects of changes in relative prices and changes in the composition of output over time. Quarterly and monthly changes are also based on annual

weights. The new output indexes are expressed as 1996=100, and for recent years, in 1996 dollars; the new price indexes are based to 1996=100.

Chained (1996) dollar estimates of most components of GDP are not published for periods prior to 1987, because during periods far from the base period, the levels of the components may provide misleading information about their contributions to an aggregate. Values are published in index form (1996=100) for 1929 to the present to allow users to calculate the percent changes for all components, changes which are accurate for all periods. In addition, the Bureau of Economic Analysis publishes estimates of the contribution of major components to the percent change in GDP for all periods.

Gross national product measures the output attributable to all labor and property supplied by United States residents. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect business taxes (sales and property taxes); see Table 646.

In December 1991, the Bureau of Economic Analysis began featuring gross domestic product rather than gross national product as the primary measure of U.S. production. GDP is now the standard measure of growth because it is the appropriate measure for much of the short-term monitoring and analysis of the economy. In addition, the use of GDP facilitates comparisons of economic activity in the United States with that in other countries.

National income is the aggregate of labor and property earnings which arises in the current production of goods and services. It is the sum of employee compensation, proprietors' income, rental income of persons, corporate profits, and net interest. It measures the total factor costs of the goods and services produced by the economy. Income is measured before deduction of taxes.

Capital consumption adjustment for corporations and for nonfarm sole proprietorships and partnerships is the difference between capital consumption based

on income tax returns and capital consumption measured using empirical evidence on prices of used equipment and structures in resale markets, which have shown that depreciation for most types of assets approximates a geometric pattern. The tax return data are valued at historical costs and reflect changes over time in service lives and depreciation patterns as permitted by tax regulations. *Inventory valuation adjustment* represents the difference between the book value of inventories used up in production and the cost of replacing them.

Personal income is the current income received by persons from all sources minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions that primarily serve individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, public assistance, etc., but excludes transfers among persons. Also included are certain nonmonetary types of income—chiefly estimated net rental value to owner-occupants of their homes and the value of services furnished without payment by financial intermediaries. Capital gains (net losses) are excluded.

Disposable personal income is personal income less personal tax and nontax payments. It is the income available to persons for spending or saving. Personal tax and nontax payments are tax payments (net of refunds) by persons (except personal contributions for social insurance) that are not chargeable to business expense and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes and motor vehicle licenses. Nontax payments include passport fees, fines and forfeitures, and donations.

Consumer Expenditure Survey—The Consumer Expenditure Survey program was begun in late 1979. The principal objective of the survey is to collect current consumer expenditure data which provide a continuous flow of data on the

habits of American consumers. are necessary for future revisions of the Consumer Price Index.

Survey conducted by the Census Bureau or the Bureau of Labor Statistics consists of two components: (1) An interlocking household survey in which the expenditures of consumer units are obtained from interviews conducted every 3 months and (2) a diary or recordkeeping survey completed by participating households for two consecutive 1-week

components of the survey queries a representative sample of consumer units representative of the U.S. total population.

Each week of the year, 5,000 consumer units are sampled for the diary survey. Each consumer unit keeps a diary for 2-week periods yielding approximately 2,000 diaries a year. The interlocking sample is selected on a rotating basis, targeted at 5,000 consumer units each quarter. Data are collected in 88 urban and 16 rural areas of the country representative of the U.S. total population. The survey includes students and housing. Data from the two surveys are combined; integration is necessary to permit analysis of total family expenditures because neither the diary nor the interlocking interview survey was designed to collect a complete account of household spending.

Measurement of money income to individuals and households—Money income statistics are based on data from various field surveys of income collected since 1936. Since 1947, the Census Bureau has collected the data on a household basis and published them in *Population Reports*, P60 Series. In other surveys, field representatives interview samples of the population with respect to income received during the year. Money income as defined by the Census Bureau differs from the BEA definition of "personal income."

Money income collected in the surveys of the Census Bureau cover money income received (exclusive of certain receipts such as capital gains)

before payments for personal income taxes, social security, union dues, Medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits (see Section 12) such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. For data on noncash benefits, see Section 12. None of the aggregate income concepts (GDP, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

In October 1983, the Census Bureau began to collect data under the new Survey of Income and Program Participation (SIPP). The information supplied by this survey is expected to provide better measures of the status and changes in income distribution and poverty of households and persons in the United States. The data collected in SIPP will be used to study federal and state aid programs (such as food stamps, welfare, Medicaid, and subsidized housing), to estimate program costs and coverage, and to assess the effects of proposed changes in program eligibility rules or benefit levels. The core questions are repeated at each interview and cover labor force activity, the types and amounts of income received, and participation status in various programs. The survey also contains questions covering attendance in postsecondary schools and private health insurance coverage. Various supplements or topical modules covering areas such as educational attainment, assets and liabilities, and pension plan coverage are periodically included.

Poverty—Families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980.

The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The following technical changes to the thresholds were made in 1981: (1) distinctions based on sex of householder have been eliminated, (2) separate thresholds for farm families have been dropped, and (3) the matrix has been expanded to families of nine or more persons from the old cut-off of seven or more persons. These changes have been incorporated in the calculation of poverty data beginning with 1981. In the recent past, the Census Bureau has published a number of technical papers that presented experimental

poverty estimates based on income definitions that counted the value of selected government noncash benefits. The Census Bureau has also published annual reports on after-tax income (see Tables 664 and 665). The annual income and poverty reports (P60 Series) have brought together the benefit and tax data that previously appeared in the separate reports. These reports have shown the distribution of income among households and the prevalence of poverty under the official definition of money income and under definitions that add or subtract income components. In addition, in July 1999, the Census Bureau released a report (P60-205) that showed the effect of using experimental poverty following the recommendations of a National Academy of Sciences panel on redefining our nation's poverty measure.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

No. 656. Median Income of Households in Constant (2000) Dollars by State: 3-Year Averages for 1990 to 2000

[Constant dollars based on the CPI-U-RS deflator. Data based on the Current Population Survey; see text, this section and Section 1 and Appendix III. The CPS is designed to collect reliable data on income primarily at the national level and secondarily at the regional level. When the income data are tabulated by state, the estimates are considered less reliable and, therefore, particular caution should be used when trying to interpret the results.]

No. 657. Money Income of Families—Percent Distribution by Income Level, Race, and Hispanic Origin in Constant (2000) Dollars: 1980 to 2000

[Constant dollars based on CPI-U-RS deflator. Families as of March of following year (60,309 represent 60,308,000). Beginning with 1980, based on householder concept and restricted to primary families. Based on Current Population Survey; see text, this section, Section 1, Population, and Appendix III. For definition of median, see Guide to Tabular Presentation]

Year	Number of families (1,000)	Percent distribution							Median income (dollars)
		Under \$15,000	\$15,000-\$24,999	\$25,000-\$34,999	\$35,000-\$49,999	\$50,000-\$74,999	\$75,000-\$99,999	\$100,000 and over

are too small to meet statistical standards for reliability of a derived figure.
 U.S. Census Bureau, <<http://ferret.bls.census.gov/macro/032001/pov/new10001.htm>> (released 10 December 2001)

Persons Below Poverty Level—Number and Rate by State: 1998 to 2000 Average

ents 32,596,000 Based on the Current Population Survey; see text, see above, and Appendix III. The CPS is the most reliable data on income primarily at the national level and secondarily at the regional level. When the income data are used by state, the estimates are considered less reliable and, therefore, particular caution should be used when trying to compare results; for additional detail, see source]

No. 676. Nonfinancial Assets Held by Families by Type of Asset: 1998

[Median value in thousands of dollars. Constant dollar figures are based on consumer price index for all urban consumers published by U.S. Bureau of Labor Statistics. Families include one-person units and, as used in this table, are comparable to the U.S. Census Bureau household concept. For definition of family, see text, Section 1, Population. Based on Survey of Consumer Finance; see Appendix III. For data on financial assets, see Table 1144. For definition of median, see Guide to Tabular Presentation]

Prices

n presents indexes of producer ner prices, actual prices for immodities, and energy prices. y sources of these data are blications of the Department ureau of Labor Statistics (BLS), ide *Monthly Labor Review*, *Con-e Index*, *Detailed Report*, *Pro-: Indexes*, and *U.S. Import and e Indexes*. The Department of , Bureau of Economic Analysis ce for gross domestic product

price index (PPI)—This index, n 1890, is the oldest continu- cal series published by BLS. It d to measure average changes ceived by producers of all es, at all stages of processing, n the United States.

has undergone several revi- *Monthly Labor Review*, February l 1978, and August 1988). It is on approximately 10,000 indi- ducts and groups of products about 100,000 quotations per lexes for the net output of ring and mining industries added in recent years. Prices rstructing the index are col- l sellers and generally apply to gnificant large-volume commer- ction for each commodity—i.e., cturer's or other producer's e or the selling price on an exchange or at a central mar-

ts used in the index represent et selling value of commodities r processed in this country. f.o.b. (free on board) produc- and are exclusive of excise ctive with the release of data r 1988, many important pro- : indexes were changed to a nce base year, 1982=100, =100. The reference year of pment weights has been taken

primarily from the 1987 Census of Manufactures. For further detail regarding the PPI, see the BLS *Handbook of Methods*, Bulletin 2490 (April 1997), Chapter 16. The PPI Web page is <<http://stats.bls.gov/ppihome.htm>>.

Consumer price indexes (CPI)—The CPI is a measure of the average change in prices over time in a "market basket" of goods and services purchased either by urban wage earners and clerical workers or by all urban consumers. In 1919, BLS began to publish complete indexes at semiannual intervals, using a weighting structure based on data collected in the expenditure survey of wage-earner and clerical-worker families in 1917-19 (BLS Bulletin 357, 1924). The first major revision of the CPI occurred in 1940, with subsequent revisions in 1953, 1964, 1978, 1987, and 1998.

Beginning with the release of data for January 1988 in February 1988, most consumer price indexes shifted to a new reference base year. All indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982-84= 100. The expenditure weights are based upon data tabulated from the Consumer Expenditure Surveys for 1993, 1994, and 1995.

BLS publishes CPIs for two population groups: (1) a CPI for all urban consumers (CPI-U) which covers approximately 80 percent of the total population; and (2) a CPI for urban wage earners and clerical workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers; the self-employed; short-term workers; the unemployed; and retirees and others not in the labor force.

The current CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, drugs, etc. purchased for

day-to-day living. Prices are collected in 87 areas across the country from over 50,000 housing units and 23,000 establishments. Area selection was based on the 1990 census. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected monthly in the three largest geographic areas and every other month in other areas.

In calculating the index, each item is assigned a weight to account for its relative importance in consumers' budgets. Price changes for the various items in each location are then averaged. Local data are then combined to obtain a U.S. city average. Separate indexes are also published for regions, area size-classes, cross-classifications of regions and size-classes, and for 26 local areas, usually consisting of the Metropolitan Statistical Area (MSA); see Appendix II. Area definitions are those established by the Office of Management and Budget in 1983. Definitions do not include revisions made since 1992. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For further detail regarding the CPI, see the BLS *Handbook of Methods*, Bulletin 2490, Chapter 17; the *Consumer Price Index*, and the CPI home page: <<http://stats.bls.gov/cpihome.htm>>. In January 1983, the method of measuring homeownership costs in the CPI-U was changed to a rental equivalence approach. This treatment calculates homeowner costs of shelter based on the implicit rent owners would pay to rent the homes they own. The rental equivalence approach was introduced into the CPI-W in 1985. The CPI-U was used to prepare the consumer price tables in this section.

Other price indexes—Chain-weighted price indexes, produced by the Bureau of Economic Analysis (BEA), are weighted averages of the detailed price indexes used in the deflation of the goods and services that make up the gross domestic product (GDP) and its major components. Growth rates are constructed for years and quarters using quantity weights for

the current and preceding year or quarter; these growth rates are used to move the index for the preceding period forward a year or quarter at a time. The gross domestic purchases chained price index measures the average price of goods and services purchased in the United States. It differs from the GDP chained price index, which measures of the average price of goods produced in the United States, by excluding net exports. All chain-weighted price indexes are expressed in terms of the reference year value 1996=100.

Measures of inflation—Inflation is defined as a time of generally rising prices for goods and factors of production. The Bureau of Labor Statistics samples prices of items in a representative market basket and publishes the result as the CPI. The media invariably announce the inflation rate as the percent change in the CPI from month to month. A much more meaningful indicator of inflation is the percent change from the same month of the prior year. The producer price index measures prices at the producer level only. The PPI shows the same general pattern of inflation as does the CPI but is more volatile. The PPI can be roughly viewed as a leading indicator. It often tends to foreshadow trends that later occur in the CPI.

Other measures of inflation include the gross domestic purchases chain-weighted price index, the index of industrial materials prices; the Dow Jones Commodity Spot Price Index; Futures Price Index; the Employment Cost Index, the Hourly Compensation Index, or the Unit Labor Cost Index as a measure of the change in cost of the labor factor-of production; and changes in long-term interest rates that are often used to measure changes in the cost of the capital factor of production.

International price indexes—The BLS International Price Program produces export and import price indexes for non-military goods traded between the United States and the rest of the world.

The export price index provides a measure of price change for all products sold by U.S. residents to foreign buyers. The import price index provides a measure of price change for goods purchased from

other countries by U.S. residents. The reference period for the indexes is 1995=100, unless otherwise indicated. The product universe for both the import and export indexes includes raw materials, agricultural products, semifinished manufactures, and finished manufactures, including both capital and consumer goods. Price data for these items are collected primarily by mail questionnaire. In nearly all cases, the data are collected directly from the exporter or importer, although in a few cases, prices are obtained from other sources.

To the extent possible, the data gathered refer to prices at the U.S. border for exports and at either the foreign border or the U.S. border for imports. For nearly all products, the prices refer to transactions completed during the first week of

the month. Survey respondents are asked to indicate all discounts, allowances, and rebates applicable to the reported prices, so that the price used in the calculation of the indexes is the actual price for which the product was bought or sold.

In addition to general indexes for U.S. exports and imports, indexes are also published for detailed product categories of exports and imports. These categories are defined according to the five-digit level of detail for the Bureau of Economic Analysis End-Use Classification, the three-digit level of detail for the Standard International Trade Classification (SITC), and the four-digit level of detail for the Harmonized System. Aggregate import indexes by country or region of origin are also available.

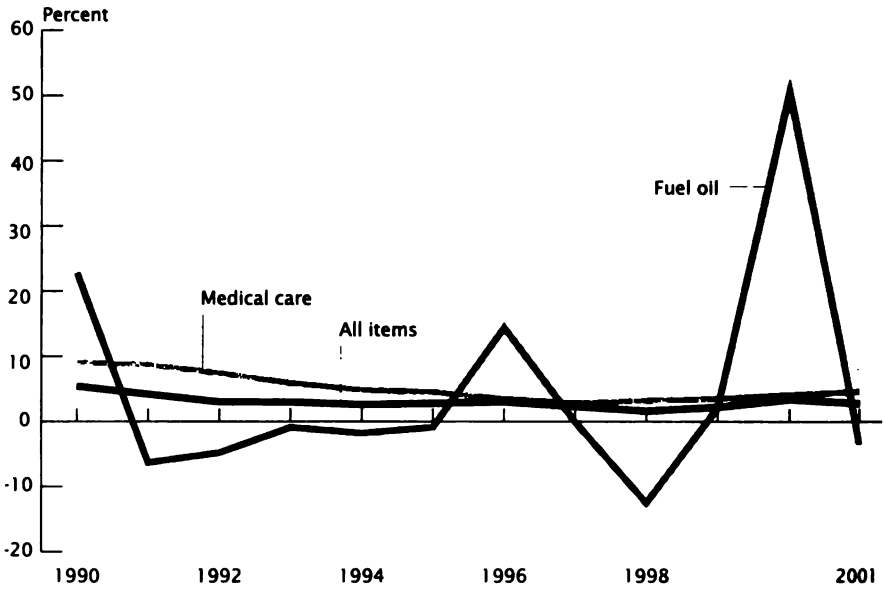

No. 680. Purchasing Power of the Dollar: 1950 to 2001

[Indexes: PPI, 1982=\$1.00; CPI, 1982-84=\$1.00. Producer prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Producer prices based on finished goods index. Obtained by dividing the average price index for the 1982=100, PPI; 1982-84=100, CPI base periods (100.0) by the price index for a given period and expressing the result in dollars and cents. Annual figures are based on average of monthly data.]

82. Consumer Price Indexes (CPI-U)—Selected Areas: 2001

=100, except as indicated. Represents annual averages of monthly figures. Local area CPI indexes are byproducts of the CPI program. Each local index has a smaller sample size than the national index and is therefore, subject to substantially more volatility and other measurement error. As a result, local area indexes show greater volatility than the national index, but their long-term trends are similar. Area definitions are those established by the Office of Management and Budget in 1983. For detail see the U.S. Bureau of Labor Statistics Handbook of Methods, Bulletin 2285, Chapter 19, the Consumer Price Index Report 736, the CPI: 1987 Revision. See also text, this section]

No. 684. Cost of Living Index—Selected Metropolitan Areas: Fourth Quarter 2001

[Measures relative price levels for consumer goods and services in participating areas for a mid-management standard of living. The nationwide average equals 100, and each index is read as a percent of the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas as defined by the Office of Management and Budget. For definitions and components of MSAs, see source for details]

Metropolitan areas (MA)	Composite index (100%)	Grocery items (16%)	Housing (28%)	Utilities (8%)	Transportation (10%)	Health care (5%)	Misc. goods and services (33%)

No. 687. Producer Price Indexes by Stage of Processing: 1990 to 2001

[1982=100, except as indicated]

Stage of processing	1990	1995	1996	1997	1998	1999	2000	2001
Finished goods	119.2	127.9	131.3	131.8	130.7	133.0	138.0	140.7
Finished consumer goods	118.2	125.6	129.5	130.2	128.9	132.0	138.2	141.5
Finished consumer foods	124.4	129.0	133.6	134.5	134.3	135.1	137.2	141.3
Fresh fruits and melons	118.1	85.8	100.8	99.4	90.5	103.6	91.4	97.2
Fresh and dry vegetables	118.1	144.4	135.0	123.1	139.5	118.0	126.7	124.7
Eggs for fresh use (Dec. 1991=100)	(NA)	86.3	105.1	97.1	90.1	77.9	84.9	81.8
Bakery products	141.0	164.3	169.8	173.9	175.8	178.0	182.3	187.8
Milled rice	102.5	113.1	129.4	127.3	124.9	121.3	101.2	87.5
Pasta products (June 1985=100)	114.1	125.0	127.4	125.1	122.6	122.1	121.6	122.1
Beef and veal	116.0	100.9	100.2	102.8	99.4	106.3	113.7	120.4
Pork	119.8	101.5	120.9	123.1	96.6	96.0	113.4	119.9
Processed young chickens	111.0	113.5	121.5	118.6	125.2	113.4	110.4	117.2
Processed turkeys	107.6	104.9	105.5	101.0	95.2	94.8	98.7	99.0
Finfish and shellfish	147.2	170.8	165.9	178.1	183.2	190.9	198.1	191.0
Dairy products	117.2	119.7	130.4	128.1	138.2	139.2	133.7	145.3
Processed fruits and vegetables	124.7	122.4	127.6	126.4	125.7	128.1	128.6	129.4
Confectionery end products	140.0	160.7	166.9	168.3	168.7	170.4	170.6	171.3
Soft drinks	122.3	133.1	134.0	133.2	134.8	137.9	144.1	148.1
Roasted coffee	113.0	146.5	129.2	152.9	143.9	134.7	133.5	124.3
Shortening and cooking oils	123.2	142.5	138.5	137.8	143.4	140.4	132.4	132.9
Finished consumer goods excluding foods	115.3	124.0	127.6	128.2	126.4	130.5	138.4	141.4
Alcoholic beverages	117.2	128.5	132.8	135.1	135.2	136.7	140.6	145.3
Women's apparel	116.1	119.6	119.9	120.5	123.3	123.9	124.6	123.4
Men's and boy's apparel	120.2	130.3	132.1	132.7	133.2	133.1	133.2	132.4
Girls', children's, and infants' apparel	115.3	121.6	122.4	122.9	121.8	118.2	117.4	116.7
Textile house furnishings	109.5	119.5	122.3	122.6	123.1	122.7	122.0	122.5
Footwear	125.6	139.2	141.6	143.7	144.7	144.5	144.9	145.8
Residential electric power (Dec. 1990=100)	(NA)	111.8	112.8	112.8	110.7	109.5	110.8	116.6
Residential gas (Dec. 1990=100)	(NA)	104.4	110.4	116.5	114.0	114.3	135.5	158.3
Gasoline	78.7	63.7	72.8	71.9	53.4	64.7	94.6	90.5
Fuel oil No. 2	73.3	56.6	69.5	64.8	48.1	56.1	93.5	84.1
Pharmaceutical preps, ethical (Prescription)	200.8	257.0	265.4	273.5	322.9	335.0	344.4	(NA)
Pharmaceutical preps, proprietary (Overcounter)	156.8	186.5	185.1	184.8	184.5	186.0	187.7	(NA)
Soaps and synthetic detergents	117.7	122.9	125.2	126.4	126.1	126.3	128.2	130.8
Cosmetics and other toilet preparations	121.6	129.0	130.2	130.6	132.9	135.4	137.4	138.6
Tires, tubes, and tread	96.8	100.2	97.0	95.2	94.0	92.9	93.0	94.1
Sanitary papers and health products	135.3	144.4	149.9	147.1	145.1	144.3	146.7	147.2
Newspaper circulation	144.1	185.6	198.8	201.9	202.9	207.1	210.0	219.4
Periodical circulation	150.3	176.6	180.6	188.1	193.8	196.9	198.9	200.9
Book publishing	153.4	185.0	193.9	200.1	205.9	213.0	218.2	225.4
Household furniture	125.1	141.8	144.5	146.2	148.4	150.5	152.7	154.9
Floor coverings	119.0	123.7	126.6	128.0	128.3	127.2	129.6	130.1
Household appliances	110.8	112.4	112.7	110.1	108.9	108.5	107.3	105.3
Home electronic equipment	82.7	78.9	79.0	77.1	75.9	73.7	71.8	70.4
Household glassware	132.5	153.2	157.3	161.3	162.7	163.9	166.0	169.6
Household flatware	122.1	138.3	138.4	138.5	139.2	139.7	142.6	142.8
Lawn and garden equipment, except tractors	123.0	130.4	132.3	132.2	131.7	132.0	132.0	132.7
Passenger cars	118.3	134.1	135.4	133.6	131.9	131.3	132.8	132.1
Toys, games, and children's vehicles	118.1	124.3	125.3	125.2	124.4	123.1	121.9	123.4
Sporting and athletic goods	112.6	122.0	123.3	124.7	126.2	126.2	126.1	125.8
Tobacco products	221.4	231.3	237.4	248.9	283.6	374.0	397.2	441.9
Mobile homes	117.5	145.6	149.8	152.2	154.3	158.4	161.3	164.2
Jewelry, platinum, and karat gold	122.8	127.8	129.4	129.2	128.1	127.1	127.2	128.5
Costume jewelry and novelties	125.3	135.1	136.9	139.9	139.6	140.1	141.6	144.0
Capital Equipment	122.9	136.7	138.3	138.2	137.6	137.6	138.8	139.7
Agricultural machinery and equipment	121.7	142.9	146.8	149.0	150.4	152.1	153.7	155.7
Construction machinery and equipment	121.6	136.7	139.8	142.2	145.2	147.2	148.6	149.1
Metal cutting machine tools	129.8	148.0	152.6	156.0	159.9	160.7	161.9	158.8
Metal forming machine tools	128.7	145.7	149.6	153.9	157.6	159.7	161.8	164.7
Tools, dies, jigs, fixtures, and industrial molds	117.2	133.8	136.2	138.1	138.8	139.8	141.1	141.3
Pumps, compressors, and equipment	119.2	139.4	143.5	146.5	149.0	151.7	154.1	157.5
Industrial material handling equipment	115.0	125.3	127.4	129.7	131.3	132.9	134.7	136.9

See footnote at end of table.

7. Producer Price Indexes by Stage of Processing: 1990 to 2001—Con.

except as indicated]

Stage of processing	1990	1995	1996	1997	1998	1999	2000	2001
Equipment—Continued								
computers (Dec. 1990=100)	(NA)	51.8	42.4	33.2	24.7	87.2	73.0	56.6
machinery	128.8	146.7	148.4	152.1	152.7	154.2	156.2	157.9
textiles machinery (June 1982=100)	134.8	151.0	153.8	157.4	160.3	162.8	164.7	166.9
wood machinery	124.9	133.6	136.8	138.8	141.5	141.0	142.1	143.5
air and power regulators	120.9	128.9	129.7	129.5	131.0	132.6	135.8	134.3
air conditioning/related equip. (Dec. 1985=100)	106.1	112.1	113.0	114.0	114.0	112.7	110.6	109.4
electromedical equipment	109.8	111.8	109.9	107.4	106.7	104.3	101.5	100.1
oil and gas field machinery	102.4	114.1	117.8	122.8	125.8	126.5	128.2	134.6
textile machinery and equipment	121.0	135.6	139.0	140.3	142.2	144.2	146.1	148.5
store machines and equipment	109.5	111.5	112.0	112.4	112.3	112.3	112.7	112.6
metal furniture	133.4	148.2	151.7	154.3	155.2	156.6	158.4	160.3
motor trucks	130.0	159.0	160.3	158.9	155.1	157.5	157.6	155.0
trailer trucks	120.3	144.1	144.5	140.4	142.1	146.5	148.0	147.9

Cyclic (coal tar) crudes and intermediates, organic dyes and pigments	2865	12/82	115.2	109.3	110.1	124.3	114.3
Industrial organic chemicals, n.e.c.	2869	12/82	171.5	168.0	169.1	185.5	182.9
Agricultural chemicals, n.e.c.	2879	06/82	137.6	139.4	135.4	136.6	138.1
Adhesives and sealants	2891	12/83	148.8	151.4	151.7	153.6	158.1
Chemicals and chemical preparations, n.e.c.	2899	06/85	133.2	134.3	134.8	135.8	137.9
Petroleum refining	2911	06/85	83.1	62.3	73.6	111.6	103.1
Tires and inner tubes	3011	06/81	103.4	102.2	100.4	100.4	101.6
Fabricated rubber products, n.e.c.	3069	06/83	132.1	132.4	132.2	133.1	134.6
Unsupported plastic film and sheet	3081	06/93	108.3	103.8	103.2	109.0	113.7
Plastic bottles	3085	06/93	107.1	105.5	106.1	110.4	111.3
Plastic foam products	3086	06/93	109.7	108.6	108.6	110.1	110.2
Custom compounding of purchased plastic resins	3087	06/93	106.7	107.4	104.2	111.1	113.7
Plastic products n.e.c.	3089	06/93	106.3	106.3	106.7	108.0	109.2
Products of purchased glass	3231	06/83	127.1	127.5	128.4	131.6	133.6
Concrete products	3272	12/79	151.6	156.7	161.0	166.4	172.2
Ready-mixed concrete	3273	06/81	138.0	142.3	145.6	150.2	153.4
Blast furnaces and steel mills	3312	06/82	114.2	111.4	102.0	104.1	96.9
Cold finishing of steel shapes - m/ptm	3316	06/82	116.7	114.7	110.3	113.6	107.5
Steel pipe and tubes - m/ptm	3317	06/82	131.8	132.7	127.1	132.1	129.5
Gray iron foundries	3321	12/80	143.0	143.3	144.5	147.1	148.1
Primary copper	3331	06/80	137.3	106.2	102.2	111.6	-
Secondary nonferrous metals	3341	06/80	94.5	85.9	84.8	88.4	85.8
Rolling, drawing and extruding of copper	3351	12/80	149.9	131.9	130.0	137.6	132.3
Aluminum sheet, plate, foil and welded tube products	3353	06/81	152.9	145.5	139.5	150.4	148.0
Nonferrous wire drawing and insulating	3357	12/82	154.5	148.1	143.7	153.2	149.3
Metal cans	3411	06/81	110.4	110.2	107.8	108.1	108.0
Hardware, n.e.c.	3429	06/85	125.0	126.0	127.4	129.7	132.0
Fabricated structural metal	3441	06/82	132.8	136.8	139.1	142.0	140.9
Metal doors, sash and trim	3442	06/83	152.5	152.9	153.6	156.1	158.2
Fabricated plate work (boiler shops)	3443	03/80	161.9	164.7	167.2	168.9	170.4
Sheet metal work	3444	12/82	138.6	139.9	140.1	141.8	141.5
Bolts, nuts, screws, rivets, and washers	3452	06/82	125.6	127.0	126.4	126.5	126.4
Automotive stampings	3465	12/82	112.8	112.1	110.4	110.6	110.1
Metal stampings, n.e.c.	3469	06/84	128.5	128.9	128.6	128.7	129.9
Metal coating and allied services	3479	12/84	119.4	119.1	118.8	119.1	122.6
Industrial valves	3491	06/91	117.3	119.7	122.4	123.9	126.3
Fabricated metal products, n.e.c.	3499	06/85	129.9	131.8	131.8	133.0	133.8
Turbines and turbine generator sets	3511	06/82	146.9	146.9	148.7	149.6	150.9
Internal combustion engines, n.e.c.	3519	12/82	135.7	136.2	138.1	139.0	140.1
Farm machinery and equipment	3523	12/82	138.8	140.4	142.2	143.9	146.3
Lawn and garden equipment	3524	12/82	126.0	124.9	124.5	124.6	125.1
Construction machinery	3531	12/80	164.4	167.8	170.8	172.7	173.5
Special tools, dies, jigs, fixtures and industrial molds	3544	06/81	144.1	144.9	145.8	147.0	148.8
Special industry machinery, n.e.c.	3559	12/81	163.3	166.0	168.2	169.4	169.8
Pumps and pumping equipment	3561	12/83	150.4	153.3	156.2	158.6	162.3
General industrial machinery, n.e.c.	3569	12/84	149.5	151.3	153.8	156.8	159.2
Electronic computers	3571	12/90	36.5	29.1	91.1	80.8	71.2
Computer storage devices	3572	12/92	51.1	45.3	95.0	85.2	77.5
Computer peripheral equipment, n.e.c.	3577	12/93	90.5	84.5	80.1	78.8	78.3
Refrigeration and heating equipment	3585	12/82	129.2	131.3	131.5	130.6	130.6
Service industry machinery, n.e.c.	3589	06/82	159.3	161.7	164.0	165.9	168.5
Machinery, except electrical, not elsewhere classified	3599	06/84	125.4	126.9	127.6	129.8	132.3
Switchgear and switchboard apparatus	3613	06/85	135.0	138.2	141.0	143.3	147.6
Electric motors and generators	3621	06/83	138.6	139.8	139.9	140.4	141.7
Relays and industrial controls	3625	06/85	137.8	140.4	142.8	144.4	148.2

See footnotes at end of table.

38. Producer Price Indexes for the Net Output of Selected Industries: 1997 to 2001—Con.

dnote, page 461

Industry	SIC code ¹	Index base ²	1997	1998	1999	2000	2001
audio & video equipment	3651	03/80	80.5	79.7	77.8	76.1	74.6
radio & telegraph apparatus	3661	12/85	119.4	117.9	115.8	113.1	108.7
television broadcast and communication equipment	3663	12/91	105.7	105.5	104.1	101.5	101.7
printed circuit boards	3672	06/91	95.0	93.9	92.2	91.7	91.8
semiconductors and related devices	3674	06/81	76.7	70.6	97.4	91.1	87.0
electronics components, n.e.c.	3679	06/82	114.2	114.2	113.8	114.5	109.2
equipment for internal combustion engines	3694	12/82	128.8	127.9	127.4	127.6	127.9
equipment and supplies, not elsewhere classified	3699	12/85	118.5	117.5	118.6	118.3	119.0
trucks and passenger car bodies	3711	06/82	138.7	136.8	137.6	138.7	137.6
motor bus bodies	3713	12/82	153.5	155.3	157.0	160.3	163.3
trailer parts and accessories	3714	12/82	113.1	112.6	112.0	111.6	111.4
trucks	3721	12/85	142.3	142.6	144.1	150.5	155.7
engines and engine parts	3724	12/85	134.8	135.7	136.8	139.7	144.0
parts and auxiliary equipment, n.e.c.	3728	06/85	139.0	140.9	142.2	143.3	145.8
repairing and repairing	3731	12/85	133.3	134.8	135.4	137.6	139.7
equipment	3743	06/84	127.4	127.5	128.1	128.6	128.4
navigation, and guidance systems and aerial and nautical navigation systems	3812	12/91	107.0	109.0	109.0	108.7	108.1
process control instruments	3823	06/83	147.7	149.9	151.0	152.3	154.3

No. 689. Chain-Type Price Indexes For Personal Consumption Expenditures (PCE): 1980 to 2001

[1996=100. For explanation of "chain-type," see text, Section 13, Income]

Item	1980	1985	1990	1995	1999	2000	2001
Personal consumption expenditures	55.2	71.0	85.8	97.9	104.7	107.5	108.5
Durable goods	78.5	88.6	96.0	101.1	93.0	91.5	89.8
Motor vehicles and parts	61.0	74.2	83.8	98.4	99.1	99.0	100.1
Furniture and household equipment	106.3	116.3	113.6	104.5	85.2	81.5	77.0
Nondurable goods	65.3	77.3	91.0	97.9	103.7	107.6	109.1
Food	60.8	72.9	88.2	97.3	108.1	108.6	111.9
Clothing and shoes	86.5	93.3	103.5	101.4	96.4	95.2	93.3
Gasoline, fuel oil, and other energy goods	90.6	93.3	95.2	93.7	94.6	121.9	118.2
Gasoline and oil	91.4	92.8	94.8	94.2	94.8	121.1	117.0
Fuel oil and coal	87.4	97.6	98.6	89.6	92.6	129.3	130.2
Services	45.9	64.4	81.0	97.3	107.8	111.1	114.3
Housing	47.1	66.7	84.1	97.0	109.3	112.8	117.2
Household operation	56.3	81.8	87.6	98.1	100.4	102.1	106.5
Transportation	51.9	65.5	81.8	98.4	105.5	108.8	110.2
Medical care	37.2	55.9	76.0	97.9	107.1	110.2	113.4
Recreation	53.7	67.9	83.3	98.8	108.9	112.9	116.8
Addenda:							
Energy goods and services	75.5	90.3	92.5	95.6	98.3	113.3	116.9
PCE less food and energy	52.4	69.2	84.7	98.2	105.0	107.0	108.7
